INSTRUCTIONS

Timing

1. All references to year refer to calendar year. Unless otherwise specified, this Request calls for documents, data, and other information created, altered, or received by the Company within two years of the date on which this Request was issued. For interrogatory responses, submit a separate response for each year or year-to-date unless otherwise specified. If calendar-year data are not available, supply the Company’s fiscal-year data indicating the twelve-month period covered, and submit the Company’s best estimate of calendar-year data.
2. Unless otherwise specified, this Request requires the production of all responsive documents, data, and other information in the possession, custody, or control of the Company on the date that this Request was issued.
 - a. If the Company complies fully with this Request within 90 days of issuance, then only specifications marked with an asterisk (e.g., *) are continuing in nature. If the company complies fully with this Request more than 90 days after it was issued, then all of the specifications in this Request are continuing in nature.
 - b. Specifications that are continuing in nature require production of documents, data, and information created or obtained by the Company up to 30 calendar days before the Company complies fully with this Request, except for materials that require translation into English. Materials that must be translated into English, as described in Instruction 6 below, must be produced if they are created, altered, or received by the Company up to 45 calendar days before the Company complies fully.

Production Format

3. Department representatives must approve the format and production method of any documents, data, or other information before the Company makes an electronic production in response to this Request. Before preparing its production, the Company must contact the Department to explain what materials are available and how they are stored. This discussion must include Company personnel who are familiar with its electronically stored information and databases/data sets.
4. Before using software or technology (including search terms, predictive coding, de-duplication, or similar technologies) to identify or eliminate documents, data, or information potentially responsive to this Request, the Company must submit a written description of the method(s) used to conduct any part of its search. In addition, for any process that relies on search terms to identify or eliminate documents, the Company must submit: (a) a list of proposed terms; (b) a tally of all the terms that appear in the collection and the frequency of each term; (c) a list of stop words and operators for the platform being used; and (d) a glossary of industry and company terminology. For any process that instead relies on predictive coding to identify or eliminate documents, you must include (a) confirmation that subject-matter experts will be reviewing the seed set and training rounds; (b) recall, precision, and confidence-level statistics (or an equivalent); and (c) a validation process that allows for Department review of statistically-significant samples of documents categorized as non-responsive documents by the algorithm.
5. If the Department agrees to narrow the scope of this Request to a limited group of custodians, a search of each custodian's files must include files of their predecessors; files maintained by their assistants or under their control; and common or shared databases or data sources maintained by the Company that are accessible by each custodian, their predecessors, or assistants.
6. Responses to this Request must be submitted in a reasonably usable format as required by the Department in the letter dated [DATE]. Documents must be complete and unredacted, except for privilege. Documents must be submitted as found and ordered in the Company's files and must not be shuffled or otherwise rearranged. Documents written in a language other than English must be translated into English, and the foreign-language document must be submitted with the English translation. The Company is encouraged to submit copies of hard-copy documents electronically (with color hard copies where necessary to interpret the document) in lieu of producing original hard-copy documents. Absent a Department request, electronic documents must be produced in electronic form only. Electronic productions must be free of viruses. The Department will return any infected media for replacement, which may delay the Company's date of compliance with this Request. The Department may retain documents or copies of any documents or electronic media for law enforcement purposes or pursuant to the Federal Records Act.

7. Do not produce any Sensitive Personally Identifiable Information (“Sensitive PII”) or Sensitive Health Information (“SHI”) before discussing the information with the Department representatives. If any document responsive to a particular request contains Sensitive PII or SHI that is not responsive to that request, redact the unresponsive Sensitive PII or SHI before producing the document. To avoid any confusion about the reason for the redaction, produce a list of such redacted documents by document control number.

Sensitive PII includes a person’s Social Security Number; or a person’s name, address, or phone number in combination with one or more of their: (a) date of birth; (b) driver’s license number or other state identification number, or a foreign country equivalent; (c) passport number; (d) financial account number; or (e) credit or debit card number.

Sensitive Health Information includes medical records and other individually identifiable health information, whether on paper, in electronic form, or communicated orally. SHI relates to the past, present, or future physical or mental health or condition of an individual, the provision of health care to an individual, or the past, present, or future payment for the provision of health care to an individual.

8. Provide a master list in sortable and searchable electronic form showing: each custodian’s name and the corresponding consecutive document control number(s) used to identify that custodian’s documents. The Department representatives will provide a sample master list upon request.
9. **[OPTIONAL – If the production from the prior CID is identified and available to the team]** If the Company previously produced a document responsive to this Request to the Department pursuant to Civil Investigative Demand Number [], it is not required to produce that document again; however, for any such documents, the Company must submit the document control numbers.
10. Data called for by this Request must be submitted electronically in a reasonably useable compilation that will allow the Department to access the information it contains. Producing a database or data set in its entirety often does not satisfy this requirement. For the Department to be able to access and interpret data, the Company must respond to Specification 1(f) including, for each database, a Data Dictionary that includes, for each table in the database:
 - a. the name of the table;
 - b. a general description of the information contained;
 - c. the size in both number of records and megabytes;
 - d. a list of fields;
 - e. the format, including variable type and length, of each field;

- f. a definition for each field as it is used by the Company, including the meanings of all codes that can appear as field values;
- g. the fields that are primary keys for the purpose of identifying a unique observation;
- h. the fields that are foreign keys for the purpose of joining tables; and
- i. an indication of which fields are populated.

It is likely that only a subset or compilation of the contents of any particular database or data set will need to be produced. After providing the information above, counsel and knowledgeable personnel from the Company should discuss with Department representatives what constitutes a sufficient production from the database or data set in a reasonably useable format.

11. The Company must continue to preserve documents and ESI contained in disaster recovery systems or back-up media that may contain information responsive to this Request even if the Company contends that the system or media or the information contained on the media is not reasonably accessible. Department representatives retain sole discretion to determine whether a search of the backup tapes or media is necessary to respond fully to this Request.
12. All non-privileged portions of any responsive document (including non-privileged or redacted attachments) for which a privilege claim is asserted must be produced. Each document withheld in whole or in part from production based on a claim of privilege must be assigned a unique privilege identification number and separate fields representing the beginning and ending document control numbers and logged as follows:
 - a. Each log entry must contain, in separate fields: privilege identification number; beginning and ending document control numbers; parent document control numbers; attachments document control numbers; family range; number of pages; all authors; all addressees; all blind copy recipients; all other recipients; date of the document; an indication of whether it is redacted; the basis for the privilege claim (e.g., attorney-client privilege), including the anticipated litigation for any work-product claim and the underlying privilege claim if subject to a joint-defense or common-interest agreement; and a description of the document's subject matter sufficiently detailed to enable the Department to assess the privilege claim and the facts relied upon to support that claim.
 - b. Include a separate legend containing an alphabetical list (by last name) of each name on the privilege log, identifying titles, company affiliations, the members of any group or email list on the log (e.g., the Board of Directors) and any name variations used for the same individual.

- c. On the log and the legend, list all attorneys acting in a legal capacity with the designation ESQ after their name (include a space before and after the “ESQ”).
 - d. Produce the log and legend in electronic form that is both searchable and sortable. Upon request, the Company must submit a hard copy of the log and legend.
 - e. Department representatives will provide an exemplar and template for the log and legend upon request.
 - f. Any document created by the Company’s in-house counsel or the Company’s outside counsel that has not been distributed outside the Company’s in-house counsel’s office or the Company’s outside counsel’s law firm does not have to be logged. But if the document was distributed to any attorney who does not work exclusively in the Company’s in-house counsel’s office or who has any business responsibilities, it must be logged. Unlogged documents are subject to any preservation obligations the Company or counsel may have.
13. If the Company is unable to answer a question fully, it must supply all available information; explain why such answer is incomplete; describe the efforts made by the Company to obtain the information; and list the sources from which the complete answer may be obtained. If the information that allows for accurate answers is not available, submit best estimates and describe how the estimates were derived. Estimated data should be followed by the notation “est.” If there is no reasonable way for the Company to estimate, provide an explanation.
14. If documents, data, or other information responsive to a particular request no longer exists for reasons other than the Company’s document retention policy, describe the circumstances under which it was lost or destroyed, describe the information lost, list the specifications to which it was responsive, and list persons with knowledge of such documents, data, or other information.
15. To complete this Request, the Company must submit the attached certification form, executed by the official supervising compliance with this Request, and notarized.
