Interim Lead Counsel for the End Payer Plaintiffs

[Additional Counsel Listed on Signature Page]

UNITED STATES DISTRICT COURT
FOR THE SOUTHERN DISTRICT OF CALIFORNIA

IN RE: PACKAGED SEAFOOD
PRODUCTS ANTITRUST
LITIGATION

Case No. 15-MD-2670 JLS (MDD)

**[REDACTED] REPLY
MEMORANDUM OF POINTS AND
AUTHORITIES IN FURTHER
SUPPORT OF MOTION FOR
CLASS CERTIFICATION**

This Document Relates To:

All End Payer Plaintiff Actions

(FILED UNDER SEAL)

DATE: December 20, 2018
TIME: 9:00 a.m.
JUDGE: Hon. Janis L. Sammartino
CTRM: 4D (4th Floor – Schwartz)

I. INTRODUCTION.....	1
II. DR. SUNDING’S CLASS AND BENCHMARK PERIODS ARE EVIDENCE-DRIVEN.....	3
A. EPPs' Narrowed Class Period Provides a Proper Basis for Determining the Propriety of Class Certification.....	3
B. Dr. Sunding’s “Held Out” Period is Properly Evidence-Driven	5
C. Dr. Sunding’s Regression Models Support His Analysis and Conclusions Regarding the Benchmark Period	6
D. Dr. Sunding’s Documentary Analysis is Sound Economic Practice and Provides a Basis for His Statistical Calculations	7
III. DR. SUNDING’S OVERCHARGE ANALYSIS IS SOUND AND CLEARLY SHOWS COMMON IMPACT.....	8
A. Defendants’ Subregressions are a Statistical Sleight of Hand	9
B. Dr. Sunding’s Model Does Not Produce Absurd Results	11
C. Individualized Price Negotiations Have No Bearing on the Validity of Dr. Sunding’s Model, Which is Consistent with the Packaged Tuna Market	13
D. Dr. Sunding’s Model Shows Harm For All Defendants’ Customers	15
E. Defendants Rely on Cases That Do Not Support Their Position.....	18
IV. PREDOMINANTLY COMMON PROOF WILL BE USED TO SHOW PASS THROUGH AND IMPACT TO EPPS.....	20
A. Defendants’ Meritless Arguments Regarding “Loss Leader” and Focal Point Pricing Do Not Defeat Predominance	21
B. Dr. Sunding’s Pass-Through Studies Account for Geographic and Product Variation	24
C. Dr. Sunding Presents Predominantly Common Proof of Pass-Through Throughout the Distribution Chain	28
D. Dr. Sunding’s Pass-Through Model is Both Representative and Extremely Robust.....	30

I. INTRODUCTION

End Payer Plaintiffs (“EPPs”) submit this Memorandum in further support of their Motion for Class Certification (Dkt. No. 1130). In this case, criminal guilty pleas and admissions establish that the Defendant tuna companies coordinated increases in their national list and net prices for Packaged Tuna, and help establish the time period during which they did so. The price-fixed product traveled unaltered through a simple chain of commerce to the consumers. Dr. David Sunding, the chair of a prestigious economics department, has developed and presented economic analysis and econometric market models that help demonstrate the resulting market-wide overcharge for Packaged Tuna, and that impact on EPP class members. Sunding Report.¹ Against this backdrop, Defendants and their retained economist, Dr. Haider,² fire a blunderbuss, attacking the Class Period and benchmark period, the overcharge regression model, the nine pass-through studies, and (for the third time) the classes under state laws. Each of those attacks fails as follows:

- The Class Period and benchmark are not cherry-picked. The Plaintiffs begin the Class Period based on admissions of market-wide illegal conduct. The “benchmark” period allows a reasonable economic examination of how Defendants’

¹ Expert Report of David Sunding in Support of Plaintiffs’ Motion for Class Certification, May 29, 2018 (“Sunding Report”), attached as Ex. 1 to the Supplemental Declaration of Thomas H. Burt in further support of End Payer Plaintiffs’ Motion for Class Certification (“Supp. Burt Decl.”).

² Dr. Haider has published only one paper in a peer-reviewed academic journal, and that work was based upon her dissertation and co-authored with her advisors. She has since published only in practitioner publications, and even these were done with her then-coworkers at various consulting firms. Haider Dep. Ex. 4 and Tr. 47:15-17, 55:11-16 (Supp. Burt Decl., Ex. 2). Dr. Haider has never held a faculty post (*id.* 57:10-16) and appears to specialize in attacking class actions. For example, while the press release issued upon her move to Edgeworth references class litigation six times (Haider Dep. Ex. 5),

Haider Tr. 78:17-79:9, 144:5-147:8.

Id. 82:7-83:3.

FILED UNDER SEAL

1 conduct affected the market. Dr. Sunding did not include the period from 2008 to
2 2011 because based on his review of the facts, doing so produced a more effective
3 benchmark period with which to compare the Class Period.

4 • Dr. Haider attacks Dr. Sunding’s overcharge regression largely using
5 statistical methods that fail a test of scientific falsifiability. [REDACTED]

6 [REDACTED]
7 [REDACTED]
8 [REDACTED] Similar
9 methods by the same economics firm were rejected last week by Judge Donato in *In*
10 *re Capacitors Antitrust Litig. (No. III)*, No. 17-md-02801-JD, 2018 U.S. Dist.
11 LEXIS 195310, at *64 n.4 (N.D. Cal. Nov. 14, 2018) (“*Capacitors*”) (criticizing Dr.
12 John Johnson, Dr. Haider’s employer and Defendants’ expert against DPPs here).

13 [REDACTED]
14 [REDACTED]
15 [REDACTED]

17 [REDACTED]
18 [REDACTED]
19 • [REDACTED] Dr. Sunding shows empirically [REDACTED]
20 [REDACTED]
21 [REDACTED]
22 [REDACTED]

23 • The attacks on the state law classes are an attempt to relitigate an issue
24 fully briefed and decided on the pleading motions.

25 For these reasons, and those explained below and those explained in Dr.
26 Sunding’s Reply Report (“Sunding Reply”) (Supp. Burt Decl., Ex. 3), the Court
27 should disregard Defendants’ attempts to obfuscate the simple truth: common
28 evidence will prove the case and the Court should certify the proposed Classes.

II. DR. SUNDING’S CLASS AND BENCHMARK PERIODS ARE EVIDENCE-DRIVEN

The Class Period begins when Bumble Bee admits it began colluding. Amended Plea Agreement, *United States v. Bumble Bee Foods, LLC*, No. 3:17-cr-00249 (N.D. Cal. Aug. 2, 2017), ECF No. 32 (“Bumble Bee Plea Agreement”). This accords with admissions from others involved in the conspiracy.³ Defendants cannot argue that this is arbitrary or unfounded, and so they complain instead that the Class Period has been narrowed to correspond to evidence. EPPs filed a Sixth Amended Consolidated Class Action Complaint on October 5, 2018, ECF No. 1461 (“6AC”), defining the Class Period as presented in this motion. *Id.* at ¶ 2.⁴

A. EPPs’ Narrowed Class Period Provides a Proper Basis for Determining the Propriety of Class Certification

Plaintiffs may suggest a class period narrower (and thus contained in) a class period specified in a previously filed complaint. *See Abdeljailil v. General Electric Capital Corp.*, 306 F.R.D. 303, 306 (S.D. Cal. 2015) (new definition “simply a narrower version”); *see Holt v. Noble House Hotels & Resort, Ltd.*, No. 17cv2246-MMA (BLM), 2018 U.S. Dist. LEXIS 177940, at *6, 32 (S.D. Cal. Oct. 16, 2018) (allowing the plaintiffs to narrow a class definition at the time they sought certification; granting motion to certify the narrowed class)⁵; *Knutson v. Schwan’s*

³ Information, ¶ 2, *United States v. Kenneth Worsham*, No. 3:16-cr-00535 (N.D. Cal. Dec. 21, 2016), ECF No. 1; Information, ¶ 2, *United States v. Cameron*, No. 3:16-cr-00501 (N.D. Cal. Dec. 7, 2016), ECF No. 1. [REDACTED]

DPPs and CFPs use the same start date for their class period. ECF No. 1460, ¶ 2; ECF No. 1470, ¶ 1.

⁵ Modification of a proposed class period – with or without an accompanying amendment to the complaint, is particularly appropriate when plaintiffs narrow a class definition and thus defendants are not prejudiced. *See Zaklit v. Nationstar Mortg., LLC*, No. 5:15-cv-2190-CAS(KKx), 2017 U.S. Dist. LEXIS 117341, at *21 (C.D. Cal. July 24, 2017) (“courts routinely permit plaintiffs to narrow the scope of their class at the certification stage.”) (citing cases); *Gold v. Lumber Liquidators, Inc.*, No. 14-cv-05373-TEH, 2017 U.S. Dist. LEXIS 96724, at *14 (N.D. Cal. June

19
20 ground analysis in the actual facts of the case as using “projections and wishful
21 thinking.” *Id.* at *8.

22 ⁸ Defendants cite cases that they claim suggest that experts must verify a class
23 period. But these cases suggest merely that experts should do what Dr. Sunding did
24 here: examine the record facts for himself in reaching his opinions. *E.g.*, *CDW LLC*
25 *v. NETech Corp.*, 906 F. Supp. 2d 815, 822-23 (S.D. Ind. 2012) (finding expert “did
26 not simply accept ‘off-the-cuff’ figures supplied by the client” but instead
27 “determined the type of . . . data he required to make a proper analysis.”). The cases
do not and cannot require that an economic expert “verify” legal questions such as a
class period.

28 ⁹ Similarly, Dr. Sunding [REDACTED]
[REDACTED] Sunding Tr. 116:11-117:19. But contrary to Defendants’

*Id.*¹³

III. DR. SUNDING’S OVERCHARGE ANALYSIS IS SOUND AND CLEARLY SHOWS COMMON IMPACT

EPPs previously explained the legal presumption that market-wide conduct designed to increase prices creates a presumption of market-wide impact. *See* EPPs’ Memorandum of Points and Authorities in Support of Motion for Class Certification, ECF No. 1130-1 (“Mot.”), at 13-14 (and cases cited therein). Further, because the Packaged Tuna market is a national market for an easily transportable commodity good, opportunities for arbitrage mean that prices and overcharges among customers and areas should not vary substantially. *See* Sunding Report, ¶¶ 41-5; Sunding Tr. 116:13-19, 117:17-118:9. Moreover, it is abundantly clear that Defendants coordinated their prices, shared pricing information, and used the conspiratorially inflated prices for their pricing discussions and negotiations with customers. *See, e.g.,* Bumble Bee Plea Agreement, ¶ 4(b); Transcript of Proceedings at 12:20-13:10, *United States v. Bumble Bee Foods, LLC*, No. 3:17-cv-00249 (N.D. Cal. Aug. 4, 2017), ECF No. 36; Information, ¶ 9(a-c), *United States v. Starkist, Co.*, No. 3:18-cv-00513 (N.D. Cal. Oct. 18, 2018), ECF No. 1 (annexed as Ex. 1 to the Supplemental Declaration of Betsy C. Manifold in support of End Payer Plaintiffs’ Motion for Class Certification (“Supp. Manifold Decl.”)).

[REDACTED] Sunding Tr. 141:15-142:7; Sunding Report, ¶¶ 93, 102-112. This is the common approach in antitrust cases. *See, e.g., In re Urethane Antitrust Litig.*, 166 F. Supp. 3d 501, 504–05, 509 (D.N.J. 2016) (citations omitted) (there “are an

Sunding Reply, ¶ 59.

FILED UNDER SEAL

1 abundance of judicial decisions supporting” the use of regression models). Neither
2 Defendants nor Dr. Haider dispute that reduced form models are generally accepted.

3 **A. Defendants’ Subregressions are a Statistical Sleight of Hand**

4 Defendants attack Dr. Sunding’s overcharge model by purporting to show that
5 many large purchasers did not see a statistically significant overcharge.¹⁴ Dr.
6 Haider’s analysis is mere gimmickry and not sound economics. She shrinks the
7 sample sizes to produce spurious results.

8 Breaking down the data to the level of the individual purchaser and then
9 running a regression on each and every purchaser, as Dr. Haider did, virtually
10 ensures misleading results. *See* Sunding Tr. 168:25-169:11. The technique Dr.
11 Haider uses is similar to that used in *In re Air Cargo Shipping Servs. Antitrust Litig.*,
12 MDL No. 1775, 2014 U.S. Dist. LEXIS 180914 (E.D.N.Y. Oct. 15, 2014). There,
13 Magistrate Judge Pohorelsky examined what he called “sub-regression” techniques
14 similar to those performed here (Dr. Haider’s CV includes an article in a legal
15 newsletter in apparent direct response to *Air Cargo*, Haider Dep. Ex. 1). After an
16 extensive analysis, the court found such sub-regressions “fundamentally mis-
17 specified” and unpersuasive, and certified the class. *Id.* at *141-173, 266.

18 Dr. Johnson, who owns Edgeworth Economics, was just criticized in
19 *Capacitors* for the infirmity of this technique. *Capacitors*, 2018 U.S. Dist. LEXIS
20 195310, at *64 n.4. He and Dr. Haider, who worked with him at NERA and
21 Edgeworth, have developed this technique not in academic journals, but in and for
22 litigation, specifically opposing class certification. *See* Haider Exs. 1, 5. “At best,
23 such a slicing and dicing approach reflects ignorance of statistical properties; at
24 worst it is statistical trickery passed off as ‘rigor.’ Regardless, it must be called out
25 as invalid and unscientific.” DR. KENNETH FLAMM AND DR. MICHAEL NAAMAN,

1 *California*, 291 F.3d 1141, 1148 (9th Cir. 2002) (amended). *See also Capacitors*,
2 2018 U.S. Dist. LEXIS 195310, at *64 n.4; *In re High-Tech Emp. Antitrust Litig.*,
3 289 F.R.D. 555, 580 (N.D. Cal. 2013).

4 **B. Dr. Sunding’s Model Does Not Produce Absurd Results**

5 Defendants next turn to an argument that is rooted in neither the law nor
6 sound econometrics. Essentially, Defendants argue that even if they can’t
7 successfully identify flaws with Dr. Sunding’s model, it must be wrong because it
8 produces “absurd” results. Defendants’ argument is both wrong and highlights Dr.
9 Haider’s own computational mistakes.

10 For example, Dr. Haider claims [REDACTED]

11 [REDACTED]. Dr. Haider made a
12 mistake in her computations. Dr. Haider’s interpretation of the marginal effect of
13 pouches on Tuna is fundamentally flawed as she does not take into account the fact
14 that Dr. Sunding’s model allows fish prices and input prices to affect prices of can
15 and pouch products differently, thus dramatically overstating the statistical
16 calculation of the difference between pouch prices and can prices. When this mistake
17 is corrected, [REDACTED]

18 [REDACTED]
19 [REDACTED] Sunding Reply,

20 ¶ 32.¹⁵

21 _____
22 ¹⁵ Defendants also argue essentially, that mere variation in prices over time
23 and/or among purchasers defeats class certification. Opp. at 32. This is wrong. It is
24 the *relationship* between price and fundamentals which allows an economist to
25 estimate a but-for world and a calculation of overcharge. The expert must point to
26 “some objective, independent validation of the expert’s methodology” to be
27 admissible. *See Sullivan v. Costco Wholesale Corporation*, No. 1:17-cv-00959-LJO-
28 EPG, 2018 U.S. Dist. LEXIS 143840, at *7 (E.D. Cal. Aug. 23, 2018) (quoting
Daubert v. Merrell Dow Pharm., Inc., 43 F.3d 1311, 1316 (9th Cir. 1995)). *See*
Sunding Tr. 205:12-206:6, 207:20-23. This means that one looks not to a scatterplot
of prices, but rather connects the dots to examine market-wide price trends over
time.

FILED UNDER SEAL

1 In addition, Dr. Sunding’s approach is corroborated by the model used by
2 another expert in this case. Dr. Russell W. Mangum, a Direct Purchaser class
3 economic expert and Senior Vice President at Nathan Associates Inc., employed
4 slightly different data and variables but reached similar results and conclusions. Dr.
5 Mangum, for example, reached effectively the same conclusions after: [REDACTED]

6 [REDACTED]
7 [REDACTED]
8 [REDACTED]

9 [REDACTED] Declaration of Russell W. Mangum, III,
10 Ph.D., in Support of Direct Purchaser Plaintiffs’ Motion for Class Certification (ECF
11 No. 1140) (filed under seal May 29, 2018) (“Mangum Decl.”) at 83-100. He found
12 an overcharge for all Defendants across the market. *Id.* at 103-106.

13 *In re Rail Freight Fuel Surcharge Antitrust Litig.*, 292 F. Supp. 3d 14 (D.D.C.
14 2018), does not support Defendants’ contentions. The court ultimately accepted the
15 model that supposedly produced the “counterintuitive” result. *Id.* at 71. The reason
16 for that is simple: much more than conclusory statements are needed to undercut the
17 possible probative value of expert testimony. *See In re High-Tech Emp. Antitrust*
18 *Litig.*, No. 11-CV-02509-LHK, 2014 U.S. Dist. LEXIS 47181, at *93 (N.D. Cal.

[REDACTED].²⁰

¹⁸ Sales in most industries involve some negotiation, but a regression model like Dr. Sunding’s, measuring real-world prices over long periods, fully captures the overall effect of those negotiations in the relationship between prices and cost.

¹⁹ See, e.g., *Data Availability Policy*, AMERICAN ECONOMIC ASS’N, <https://www.aeaweb.org/journals/policies/data-availability-policy> (last visited Nov. 20, 2018) (“It is the policy of the American Economic Association to publish papers only if the data used in the analysis are clearly and precisely documented and are readily available to any researcher for purposes of replication.”); *Data Policy*, THE QUARTERLY JOURNAL OF ECONOMICS, https://academic.oup.com/qje/pages/Data_Policy (last visited Nov. 20, 2018) (“It is the policy of the *Quarterly Journal of Economics* to publish papers only if the data used in the analysis are clearly and precisely documented and are readily available to any researcher for purposes of replication.”).

²⁰ This may form the basis of a *Daubert* challenge at the merits stage; at this stage, primarily in order to expedite consideration of the Class Certification motion and avoid burdening the Court with more paper, EPPs ask instead that the Court simply

FILED UNDER SEAL

D. Dr. Sunding’s Model Shows Harm For All Defendants’ Customers

Defendants attack Dr. Sunding’s use of averages, which they assert conceals individual differences in impact and improperly conflates two issues: injury, or what common evidence is sufficient to allow a jury to find common, market-wide effects; and damages, or the use of a single average overcharge to estimate those effects. As to the first issue, whether there was impact on all Defendants’ customers, which should be the focus at class certification, Dr. Sunding’s model easily meets the test.

Dr. Sunding determined—and the Defendants do not dispute [REDACTED]. Defendants can point to no evidence that they limited their coordination to certain customers or market segments. In fact, all the evidence (common to all plaintiffs) regarding the market indicates that both in intent and in practice, Defendants’ collusion was designed to affect the market as a whole.

Sunding Reply, ¶ 24. After a thorough analysis of the market and the evidence in the case, Dr. Sunding concluded that [REDACTED].

[REDACTED]. *Id.*, ¶ 21.

In reaching this conclusion, Dr. Sunding did not rely purely on a structural analysis. Dr. Sunding was able to test empirically whether all or substantially all of Defendants’ customers would be impacted by the conspiracy. [REDACTED]

disregard Dr. Haider’s assertions [REDACTED]

FILED UNDER SEAL

1 [REDACTED] *Id.*, ¶ 22. [REDACTED]

2 [REDACTED]²¹

3 As stated above, the fact that each direct purchaser negotiated each purchase
4 does not require an individual analysis of each direct purchaser. Where a variety of
5 customers purchase commodity products over time, different nominal prices among
6 customers are inevitable. But as courts have repeatedly recognized, because
7 plaintiffs seek to establish the difference between actual price levels and necessarily
8 hypothetical but-for price levels, some averaging of data to examine market-wide
9 impact on price levels over time is appropriate, which is why courts routinely allow
10 the use of a single overcharge in antitrust cases. *See, e.g., In re NASDAQ Market-*
11 *Makers Antitrust Litig.*, 169 F.R.D. 493, 523 (S.D.N.Y. 1996) (“Neither a variety of
12 prices nor negotiated prices is an impediment to class certification if it appears that
13 plaintiffs may be able to prove at trial that, as here, the price range was affected
14 generally.”); *In re Processed Eggs Prods. Antitrust Litig.*, 312 F.R.D. 171, 198-99
15 (E.D. Pa. Nov. 12, 2015); *In re Polyurethane Foam Antitrust Litig.*, 314 F.R.D. 226,
16 283 (N.D. Ohio 2014) (allowing single overcharge regression model even when
17 statistically significant impact was only found for 20% of customers); *Kleen*
18 *Products LLC v. Int’l Paper*, 306 F.R.D. 585, 600 (N.D. Ill. 2015) (citation omitted).

19 Yet, Defendants attack Dr. Sunding’s use of a single overcharge for each
20 Defendant as not being sufficiently granular. Even the cases Defendants cite do not
21 support the broad proposition that relying on a single overcharge is problematic.
22 Defendants’ reliance on *Live Concert* is misplaced for a number of reasons,
23 including because plaintiffs in that case made no distinction between the artists
24 regardless of their popularity, an omission so critical that it destroyed the model’s

25 _____
26 ²¹ Dr. Sunding also notes [REDACTED]
27 [REDACTED]
28 [REDACTED] Mangum Decl., ¶

1 usefulness. *Live Concert*, 863 F. Supp. 2d at 978.²² Unlike purchasers of Packaged
2 Tuna, it is safe to assume potential concertgoers do not view tickets of minor acts as
3 interchangeable with major stars, especially across genres.

4 Defendants further cite to *Live Concert* in quibbling that Dr. Sunding might
5 have included additional or different inputs in his model. But Dr. Sunding has
6 provided sound reasons for selecting his inputs and his analysis: [REDACTED]

7 [REDACTED]
8 [REDACTED] See Sunding Report, ¶¶ 102-08, 111.²³ In fact, the *Live*
9 *Concert* court notes that where, as here, the model accounts for the “major factors”
10 in the market, the model has sufficient validity for admissibility. *Live Concert*, 863
11 F. Supp. 2d at 978. See also *McCrary v. Elations Co. LLC*, No. EDCV 13-0242 JGB
12 (SPx), 2014 U.S. Dist. LEXIS 200660, at *21 (C.D. Cal. Dec. 2, 2014) (“a court
13 ‘cannot simply assume that variables omitted from the analysis are, in fact, major
14 factors There must be some indication that the excluded variables would have
15 impacted the results.’”) (internal citations omitted). In any event, Defendants do not
16 suggest that additional or different inputs would materially change Dr. Sunding’s
17 results. See, e.g., *In re Lidoderm Antitrust Litig.*, No. 14-md-02521-WHO, 2017
18 U.S. Dist. LEXIS 24097, at *67 (N.D. Cal. Feb. 21, 2017) (“that the experts dispute
19 what the appropriate inputs should be does not undermine the approach or the
20

21 ²² Defendants also cite *Ellis v. Costco*, 657 F.3d 970 (9th Cir. 2011), but that
22 Title VII case merely stands for the unremarkable proposition that courts have to
23 weigh expert evidence on class requirements. *Id.* at 982.

24 ²³ Dr. Haider insists that [REDACTED]
25 [REDACTED] Haider Report, ¶ 9 (Ex. 1 to the Declaration of
26 Craig A. Benson in Support of Defendants’ Opposition to EPPs’ Motion for Class

FILED UNDER SEAL

1 reliability of . . . [Plaintiffs’ expert’s damages] model”). Defendants have not
2 demonstrated anything close to a fatal oversight in Dr. Sunding’s analysis.

3 **E. Defendants Rely on Cases That Do Not Support Their**
4 **Position**

5 The shortcomings of Defendants’ argument become even clearer when
6 looking at the cases they rely on. These cases are easily distinguished from this one
7 for at least three significant reasons: (1) they involve components of finished
8 products, sometimes customized by the buyer; (2) they involve more complex
9 distribution, with four to six steps, not one to three; and/or (3) they involve
10 massively concentrated purchasers, with OEMs buying 50-90%, which means
11 individual end users may not be typical and individual negotiation is a bigger factor.
12 Defendants rely on *In re Flash Memory Antitrust Litig.*, No. C 07-0086, 2010 U.S.
13 Dist. LEXIS 59491 (N.D. Cal. June 9, 2010) and *In re Graphics Processing Units*
14 *Antitrust Litig.*, 253 F.R.D. 478 (N.D. Cal.2008) (“GPU”), both of which are
15 components cases that “involve much more complicated questions about the effect
16 that a supracompetitively priced component had on the final purchase price for an
17 end user.” *In re Wellbutrin XL Antitrust Litig.*, 282 F.R.D. 126, 142 (E.D. Pa. 2011).

18 *In Flash Memory*, the model averaged prices for an array of different products
19 with very different attributes that were sold to different categories of buyers as part
20 of a five-step chain. *Flash Memory*, 2010 U.S. Dist. LEXIS 59491, at *28, 59-60.
21 Very few buyers accounted for more than 80% of the market, giving them unique
22 market power, and the power to demand customization, not present here.²⁴ *Id.* at
23 *48. *See also GPU*, 253 F.R.D. at 480 (nearly half the purchases by just six buyers).
24 Perhaps most importantly, there were absolutely no uniform practices concerning
25 price lists. *Flash Memory*, 2010 U.S. Dist. LEXIS 59491, at *46-47. *See also GPU*,
26 253 F.R.D. at 502 (“it is unclear as to what degree if any defendants kept list prices

27 _____
28 ²⁴ Dr. Sunding tested [REDACTED]
[REDACTED] Sunding Report, ¶¶ 41, 112.

FILED UNDER SEAL

1 for their products.”). Here, [REDACTED]
2 [REDACTED]
3 [REDACTED]. Sunding Report, ¶¶ 35-6. *See also* 6AC ¶¶ 114, 274; Burt
4 Decl., ¶¶ 41, 45, 51.

5 In *GPU*, the complexity of both products and market structure – hundreds of
6 product types, going to market by six different paths – led the court to determine
7 “defendants’ chain of distribution and the particularized sales transactions associated
8 with each sale of a GPU product present a significant barrier to certification.” *GPU*,
9 253 F.R.D. at 483. Price lists were a minor factor. *Id.* at 491.²⁵

10 Unlike in *GPU* and *Flash Memory*, purchasers in this market have smaller
11 market shares and less market power and the products come from the Defendants in
12 standardized content, sizes and packing. *In re Optical Disk Drive Antitrust Litig.*,
13 303 F.R.D. 311, 324 (N.D. Cal. 2014) (“*ODD*”) (“*ODDs* typically make up a
14 relatively small portion of the cost of the products into which they are
15 incorporated”), also suffers from the same issue of involving a market and class so
16 easily distinguishable from the facts here that it provides no guidance on the
17 question of the validity of Dr. Sunding’s use of averages. In *ODD*, “more than 80%
18 of sales were to a few large customers, two of which (accounting for nearly half of
19 sales) utilized a bidding process and ordered customized products.” *Id.* at 317.
20 Plaintiffs there could show a conspiracy involving just those large OEMs, which
21 may not have affected list prices and prices to smaller purchasers. *Id.* at 318. In
22 other words, the issue was not simply that there were individual negotiations, but
23

24 ²⁵ The one class the *GPU* court certified is instructive here; it included those
25 who, like here, bought directly and at the same point in distribution. *Id.* at 497-98.
26 *See also In re Indus. Diamonds*, 167 F.R.D. 374, 383 (S.D.N.Y. 1996) (certifying a
27 class for products for which there were price lists, excluding only custom products).
28 Here, Defendants acknowledge [REDACTED]

[REDACTED] Mot. at 5; Sunding Report, ¶ 103 n.169.

FILED UNDER SEAL

1 that the scheme may not have even been intended to affect all prices, just certain big
2 purchasers whose purchases were decoupled from list. Here, where two companies,
3 Bumble Bee and StarKist, and three executives have already pleaded guilty to price-
4 fixing,²⁶ where everyone got the exact same price lists, and where every end user
5 bought essentially the same simple product, there is simply no disconnect of the kind
6 seen in *ODD*. Dr. Sunding did not assume the [REDACTED]

7 [REDACTED]
8 [REDACTED]

9 [REDACTED]. Sunding Report,
10 ¶¶ 109-110. This is an approach that both the *GPU* and *ODD* courts embraced.
11 *ODD*, 303 F.R.D. at 320-321 (quoting *GPU*, 253 F.R.D. at 491).

12 **IV. PREDOMINANTLY COMMON PROOF WILL BE USED TO SHOW**
13 **PASS THROUGH AND IMPACT TO EPPS**

14 Given the straightforward product and distribution chain at issue here, a
15 presumption of impact to EPPs is warranted. *See* Mot. at 16-18. But EPPs do not rest
16 on that presumption. EPPs also demonstrated that common qualitative, quantitative
17 and anecdotal proof of pass-through predominates and that a reasonable method for
18 showing class-wide impact exists. *See* Mot. at 18-29. Defendants fail to rebut these
19 showings because they, *inter alia*, ignore their own admissions that pass-through
20 occurs, repeatedly and grossly mischaracterize Dr. Sunding’s opinions and analyses,
21 and attempt to graft indirect purchaser “component” case complexities onto a
22 conspiracy to fix the price of a commodity “finished product.”

23 Defendants fail to recognize or rebut the evidence from their own documents.

24 Each Defendant recognized [REDACTED]
25 [REDACTED]. Mot. at 28-29; Sunding Report, ¶¶ 140-
26 44. This evidence would be presented at a trial on behalf of one class member or all

pleas).

FILED UNDER SEAL

1 class members. As further demonstrated below, EPPs have easily demonstrated that
2 pass-through can be shown through common proof.

3 **A. Defendants’ Meritless Arguments Regarding “Loss Leader”**
4 **and Focal Point Pricing Do Not Defeat Predominance**

5 Defendants falsely claim “Dr. Sunding did not refer or cite to a single
6 document produced by any of the direct purchasers in this case regarding their
7 pricing or marketing strategies.” Opp. at 28 (emphasis omitted). Dr. Sunding
8 reviewed and cited [REDACTED]
9 (Sunding Report, ¶ 128 n.193) [REDACTED]

10 [REDACTED] *Id.*, ¶ 129 n.194. Dr. Sunding was [REDACTED]
11 [REDACTED] However, to lay this issue
12 to rest, Dr. Sunding conducted [REDACTED]

13 [REDACTED]
14 [REDACTED] Sunding Reply, ¶ 53-55. [REDACTED]
15 [REDACTED]

16 [REDACTED] *Id.* These findings further support Dr. Sunding’s
17 conclusion that [REDACTED]
18 [REDACTED].

19
20 This conclusion is consistent with Defendants’ documents, which show that
21 so-called “loss leaders” are [REDACTED]
22 [REDACTED]
23 [REDACTED]

24 [REDACTED]. See
25 Benson Decl., Ex. 15 ([REDACTED]); Ex. 18 ([REDACTED]
26 [REDACTED]).

27 Finally, even assuming, arguendo, that
28 retail prices at times dropped below wholesale prices, EPPs are still injured because
the same retailer pricing strategies would have occurred in the but-for world, and
“[t]he overcharge is passed through to the [EPPs] without regard to whether the

FILED UNDER SEAL

1 retailer sells above or below cost.” *In re Optical Disk Drive Antitrust Litig.*, No.
2 3:10-MD-2143 RS, 2016 U.S. Dist. LEXIS 15899, at *70-71 (N.D. Cal. Feb. 8,
3 2016) (describing same and certifying class); *Gordon v. Microsoft Corp.*, No. 00-
4 5994, 2001 U.S. Dist. LEXIS 26360, at *29 (D. Minn. Mar. 30, 2001).

5 Thus, Defendants’ claims that Dr. Sunding ignores loss-leader pricing and
6 “never looked at real-world evidence” (Opp. at 27, 28) are simply false. Dr. Sunding
7 performed the sort of “real world” analysis courts rely on and found that retail
8 discounts are often supported by manufacturer promotional discounts. *See, e.g., In re*
9 *Cathode Ray Tube (CRT) Antitrust Litig.*, No. C-07-5944-SC, 2013 U.S. Dist.
10 LEXIS 137944, at *75 (N.D. Cal. June 20, 2013) report and recommendation
11 adopted, 2013 U.S. Dist. LEXIS 137946, at *70-80 (N.D. Cal. Sept. 24, 2013);
12 Sunding Report, ¶¶ 129-30, Figure 13. Dr. Sunding’s study [REDACTED]

13 [REDACTED] far exceeded the cursory review in *Processed Eggs*. Sunding Report,
14 ¶¶ 163-69 ([REDACTED])
15 [REDACTED]
16 [REDACTED]; Sunding Reply, ¶¶ 56-58.²⁷

17 Similarly, Defendants’ assertion that Dr. Sunding “ignored” focal point
18 pricing, and that he “conducted no economic analysis” of its impact on pass-through,
19 Opp. at 30-32, is demonstrably false. Dr. Sunding analyzed [REDACTED]

20 [REDACTED]
21 [REDACTED]
22 [REDACTED]
23 [REDACTED]”

24 Sunding Report, ¶¶ 131-34. His conclusions were not based on a “single document”
25 as Defendants claim (Opp. at 30 n.27), but on the combination of his review of
26 Defendants’ documents, cited academic articles and *his quantitative analyses* of

27 _____
28 ²⁷ *In re Fla. Cement & Concrete Antitrust Litig.*, 278 F.R.D. 674, 685 (S.D. Fla. 2012) is similarly inapposite because loss leaders were not at issue, and the expert “offer[ed] no methodology for determining whether pass-through actually occurred.”

FILED UNDER SEAL

1 Walmart, Sam’s Club, Trader Joe’s and Kroger data. *Id.*, ¶¶ 131-34. Thus, while
2 Defendants purport to criticize Dr. Sunding [REDACTED]

3 [REDACTED]
4 [REDACTED]
5 [REDACTED] *Id.*, ¶ 169. As Dr. Sunding found, for example, [REDACTED]
6 [REDACTED]
7 [REDACTED]
8 [REDACTED]
9 [REDACTED]

10 Defendants’ cases on this topic do not address either the quantitative proof
11 presented by Dr. Sunding showing pass-through regardless of price promotion and
12 retailer (*id.*, ¶¶ 145-73), or the qualitative proof of pass through reflected in
13 Defendants’ own documents (*id.*, ¶¶ 140-44). As such, Defendants’ reliance on
14 *Flash Memory*,²⁸ *ODD* and *Lithium Ion Batteries* – all cases where the price-fixed
15 product was largely or entirely incorporated in other products before resale – is
16 misplaced.

17 In *Flash Memory*, this meant that not only were there a variety of categories
18 and types of flash memory chips and finished products incorporating such chips, the
19 chips were sold to some indirect purchasers on a stand-alone basis and as a
20 component of another product to others, creating a highly complex distribution
21 system. *Id.*, 2010 U.S. Dist. LEXIS 59491, at *28-30. Importantly, the court in *Flash*
22 *Memory* expressly distinguished the facts before it — which involved a component
23 part incorporated into a larger finished product in a highly complex manufacturing
24 and distribution system — from “situations in which the product received by an
25 indirect purchaser from the distributor was in the same form that it was originally
26

27 ²⁸ It should be noted that the *Flash Memory* court expressly relied upon the fact
28 that “the [U.S. DOJ] investigated claims of price fixing in the flash memory industry
and made *no findings of wrongdoing*.” 2010 U.S. Dist. LEXIS 59491, at *41
(emphasis added).

FILED UNDER SEAL

1 sold by the defendant manufacturer.” *Id.* at *63. The *Flash Memory* court noted that
2 in the latter “situations . . . the effects of the price-fixing [are] not obscured by
3 substantially altering or adding to the item received from the manufacturer,” and
4 hence, it is permissible in that instance to presume that the overcharge was passed-
5 through in a manner that impacted the class in a “generalized” manner. *Id.* (quoting
6 *B.W.I. Custom Kitchen v. Owens-Illinois, Inc.*, 191 Cal. App. 3d 1341, 1352 (1987)).
7 Thus, *Flash Memory* supports applying a presumption of impact to price-fixed
8 commodities—like Packaged Tuna—that remain unchanged from Defendant
9 manufacturer to end purchaser.

10 In both *ODD* and *Lithium Ion Batteries*, the component parts “typically make
11 up a relatively small portion of the cost of the products into which they are
12 incorporated” *ODD*, 303 F.R.D. at 324. *See also In re Lithium Ion Batteries*
13 *Antitrust Litig.*, No. 13-MD-240 YGR, 2017 U.S. Dist. LEXIS 57340, at *90 (N.D.
14 Cal. Apr. 12, 2017). In contrast, the price-fixed item here is the complete product
15 that the retailers sold to class members. Thus, the wholesale price largely determined
16 the price at which the retailer would sell. The grocery retailers simply did not have
17 the ability to absorb even a small cost change in the face of thin margins in a highly
18 competitive grocery retail industry.²⁹

19 **B. Dr. Sunding’s Pass-Through Studies Account for Geographic**
20 **and Product Variation**

21 Defendants assert that Dr. Sunding’s pass-through models “incorrectly assume
22 that prices paid by EPPs were constant across geographic locations” (Opp. at 32),
23 and that the aggregation of certain data obscures price variations (*id.* at 33).
24 Defendants mischaracterize Dr. Sunding’s work. In addition to estimating pass-
25 through at the state-level, Dr. Sunding’s analyses [REDACTED]

26
27 ²⁹ Defendants do not dispute that the grocery retail industry is characterized by
28 high level of competition. Defendants’ own documents acknowledge [REDACTED]
[REDACTED] *See, e.g.*, Supp. Burt Decl., Exs. 7-9 (BB_Civil_000270216; SKC000096682; SKC000611965).

FILED UNDER SEAL

1 [REDACTED]
 2 [REDACTED]
 3 [REDACTED] See Sunding Reply, ¶ 37 [REDACTED]
 4 [REDACTED]. Thus, any assertion that Dr. Sunding “assumed”
 5 that prices were the same across or within states is false.

6 Defendants’ criticism of Dr. Sunding’s use of IRI data is particularly curious
 7 in light of the fact that Defendants themselves regularly use IRI data to keep track of
 8 their own and competitors’ retail sales, to evaluate consumer demand in response to
 9 price changes, and to make important business decisions.³⁰ Indeed, IRI data is well-
 10 accepted and widely used in market studies by government agencies, academia, and
 11 market participants. Sunding Report, ¶ 147, n.211.

12 The use of aggregated or average data in antitrust economics, including pass-
 13 through, is well-accepted. *See, e.g., LCD*, 267 F.R.D. at 605 (“a number of courts
 14 have held that averaged and aggregated data may be used to demonstrate pass-
 15 through”); *see also In re Static Random Access Memory (SRAM) Antitrust Litig.*, 264
 16 F.R.D. 603, 614 (N.D. Cal. 2009) (“*SRAM*”) (rejecting the defendants’ criticism that
 17 the indirect-purchaser plaintiffs’ use of average and aggregated data in their
 18 structural model could yield “false-positive pass-through”). Indeed, in rejecting
 19 arguments similar to those made by Defendants here, the *LCD* court found the
 20 following analysis of the *Gordon v. Microsoft* court applicable: that the issue was
 21 not tracking a specific increase, but “how a series of Microsoft price increases,
 22 and/or a series of Microsoft failures to reduce prices, impacted the price each
 23

13 requirement,³² which the Ninth Circuit has *expressly rejected*. *Briseno v. ConAgra*
14 *Foods, Inc.*, 844 F.3d 1121, 1126-33 (9th Cir. 2017). After holding that the class
15 could not be certified for lack of ascertainability, the *Processed Egg* court noted, for
16 example, that plaintiffs lacked a method for distinguishing eggs sold by defendants
17 from eggs sold by non-conspirators, necessitating individualized inquiries.
18 *Processed Eggs*, 312 F.R.D. at 149. Further, the *Processed Egg* expert relied on only
19 one retailer study (*i.e.*, Kroger) and geographically estimated pass-through for that
20 retailer as whole. *Id.* at 158. Dr. Sunding, in contrast, relied [REDACTED]

21 [REDACTED]. Moreover, Dr. Sunding’s analysis here mirrors
22 the defense expert’s approach in *Processed Egg* which that court found persuasive.

23
24
25 reliability requirements); *Reed Const. Data Inc. v. McGraw-Hill Cos.*, 49 F. Supp.
26 3d 385, 404-05 (S.D.N.Y. 2014) (finding a “a severe multicollinearity problem” in
27 expert’s method that “contribute[d] to the Court’s conclusion that [the method was]
inadmissible under Rule 702”).

28 ³² *See Processed Eggs*, 312 F.R.D. at 137-142 (class not certifiable for lack of
ascertainability as defined in *Byrd v. Aaron’s Inc.*, 784 F.3d 154, 162–63 (3d Cir.
2015) and *Carrera v. Bayer Corp.*, 727 F.3d 300, 306–08 (3d Cir. 2013)).

FILED UNDER SEAL

1 Dr. Sunding also estimated [REDACTED]
2 [REDACTED]
3 [REDACTED] See Sunding Report, ¶ 166. With respect to use of IRI data,
4 unlike the plaintiffs’ expert in *Processed Egg*, Dr. Sunding’s IRI data [REDACTED]
5 [REDACTED]
6 [REDACTED]. *Id.*, Table 3; Sunding Reply, ¶ 36.
7 Given the similarities between Dr. Sunding’s method and the one embraced in
8 *Processed Egg* as well as the critical factual differences, *Processed Egg* actually
9 supports certification here.³³ See *In re Korean Ramen Antitrust Litig.*, No. 13-cv-
10 04115-WHO, 2017 U.S. Dist. LEXIS 7756, *59 n.38 (N.D. Cal. Jan. 19, 2017)
11 (distinguishing the complex market and meager empirical analysis in *Processed Egg*
12 and certifying a class of indirect purchasers of Korean ramen noodles).

13 **C. Dr. Sunding Presents Predominantly Common Proof of Pass-**
14 **Through Throughout the Distribution Chain**

15 Defendants argue that Dr. Sunding’s quantitative analysis of the canned tuna
16 distribution channel omitted sales from distributors to retailers such as grocery
17 stores, and that therefore he cannot show pass-through on a class-wide basis. Opp. at
18 33-34. This argument is wrong on both facts and law.

19 Legally speaking, at the class certification stage, EPPs need not prove injury
20 to all class members. The proper question is whether “there is a reasonable method
21 for determining, on a classwide basis, the antitrust impact’s effects on the class
22 members. . . . This is a question of methodology, not merit.” *CRT*, 2013 U.S. Dist.
23 LEXIS 137946, at *78-79. Thus, while EPPs have presented evidence, common to
24 all class members, that pass-through occurs at all links in the distribution chain, they

25 _____
26 ³³ The two other cases relied upon by Defendants are entirely inapplicable. Opp.
27 at 33. The plaintiffs in *In re Methionine Antitrust Litig.*, 204 F.R.D. 161, 165 (N.D.
28 Cal. 2001), failed to show how they intended to show that the indirect purchaser
resellers did not pass on the overcharge; there are no resellers in the EPP class here.
Pierson v. Orlando Health, No. 6:08-cv-466, 2010 U.S. Dist. LEXIS 96906 (M.D.
Fla. Aug. 30, 2010) involved a suit for breach of contract, not antitrust claims.

FILED UNDER SEAL

1 need not do so here. “Defendants [effort] to push . . . the Court toward a full-blown
2 merits analysis . . . is forbidden and unnecessary at this point.” *Id.* (citing *Amgen Inc.*
3 *v. Conn. Ret. Plans & Trust Funds*, 568 U.S. 455, 464-65 (2013)).

4 For example, EPPs have presented common evidence showing pass-through
5 throughout the distribution chain, [REDACTED]

6 [REDACTED] (*see* Sunding
7 Report, ¶¶ 140-144, nn.202-210). Additionally, Dr. Sunding’s analysis [REDACTED]

1 economic analysis, satisfies EPPs’ burden.³⁴ See *Korean Ramen*, 2017 U.S. Dist.
2 LEXIS 7756, at *42 (certifying a class of indirect purchasers where the expert’s
3 pass-through opinion was bolstered by direct purchaser deposition testimony that
4 price increases were passed through to customers).

5 **D. Dr. Sunding’s Pass-Through Model is Both Representative**
6 **and Extremely Robust**

7 Defendants simply misstate the scope of data Dr. Sunding examined. Dr.
8 Sunding’s analyses [REDACTED]

9 [REDACTED].³⁵ The data also covers the time period well-before, during and
10 after the Class Period. Sunding Report, Table 4. The studies include [REDACTED]

11 [REDACTED].
12 Sunding Reply, Table 3. The studies include data from each level of the chain of
13 distribution, and analyses of mass merchandisers, club stores, food and grocery
14 stores, drug stores, dollar stores, convenience stores and others. Sunding Report, ¶¶
15 146-48 & Table 4. Dr. Sunding’s data sets are sufficiently complete and
16 representative. Cf. *Korean Ramen*, 2017 U.S. Dist. LEXIS 7756, at *59 (monthly
17 averages from two retailers and two wholesalers); *In re OSB Antitrust Litig.*, No. 06-
18 826, 2007 U.S. Dist. LEXIS 56617, at *30-31 (E.D. Pa. Aug. 3, 2007) (data from

19
20 ³⁴ Defendants’ cited authorities are clearly distinguishable. *In re Domestic*
21 *Drywall Antitrust Litig.*, No. 13-MD-2437, 2017 U.S. Dist. LEXIS 135758 (E.D. Pa.
22 Aug. 24, 2017) involved a complex distribution scheme where the IPP putative class
23 members “var[ied] widely in the manner in which they purchased drywall.” *Id.*, at
24 *41. Defendants also cite to an early *ODD* decision, where the expert failed to
25 “present[] a persuasive explanation as to why it would be reasonable to assume a
26 uniform pass through rate given that *ODDs* typically make up a relatively small
27 portion of the cost of the products into which they are incorporated” *ODD*, 303
28 F.R.D. at 324–25. The present case involves neither a complex distribution chain nor
a built-in component of a larger product.

³⁵ Dr. Sunding’s data covers 29 of 30 states and the District of Columbia. The
only geographic areas that are not covered by at least one study are Hawaii and
Guam, the populations of which amount to less than 1% of the total state populations
at issue. Sunding Reply, ¶ 36.

FILED UNDER SEAL

1 seven sellers); *Polyurethane Foam*, 314 F.R.D. at 280-281 (pass-through analysis
2 had 35,000 usable observations of retail price).

3 Defendants also assert, with no support, that the IRI data does not include
4 discounts at the point of sale such as coupons, and that it therefore reflects higher
5 prices. Opp. at 35. Even if true, it is irrelevant because the consumer still pays the
6 overcharge embedded in the tuna’s inflated sticker price. For example, if a \$2 can of
7 tuna priced at \$2.00 includes 20 cent overcharge, a consumer using a ten cent
8 coupon pays \$1.90. In the but-for world, however, the consumer would have saved
9 the same ten cents, but would have paid 20 cents less – \$1.70. Thus, the overcharge
10 is passed-through regardless of the coupon. *See, e.g., CRT*, 2013 U.S. Dist. LEXIS
11 137945, at *132 (N.D. Cal. June 20, 2013) (“CRT manufacturers would have offered
12 special price concessions to those buyers in the but-for as well as the actual world.”);
13 *Rosack v. Volvo of Am. Corp.*, 131 Cal. App. 3d 741, 755 (1982) (“[Contentions] of
14 infinite diversity of product, marketing practices, and pricing have been made in
15 numerous cases and rejected.” (citation omitted)). In any event, Dr. Sunding did not
16 rely [REDACTED]

17 [REDACTED]
18 [REDACTED]³⁶

19
20
21 ³⁶ *In re Class 8 Transmission Indirect Purchaser Antitrust Litig.*, 140 F. Supp.
22 3d 339 (D. Del. Oct. 21, 2015), *aff’d in part, vacated in part*, 679 F. App’x 135 (3d
23 Cir. 2017), another component case Defendants rely upon, is misplaced. The product
24 at issue—transmissions—was a component in the Class 8 trucks sold to end
25 purchasers which are “unique and highly customized for use in different
26 applications” that were delivered through a “complex distribution chain [that]
27 frustrates [measurement] of pass-through.” *Id.* at 354. Those complexities simply do
28 not exist in this case. Notably, the expert’s pass-through studies in *Transmissions*
accounted for about 2% of the transmissions sales at issue. *Id.* at 356. In contrast, Dr.
Haider concedes that [REDACTED]

V. CHOICE OF LAW SUPPORTS CERTIFICATION

A. The Cartwright Class Should Be Certified

The Court’s prior holding that the Cartwright Class does not “create material differences between California and the relevant states’ laws” *In re Packaged Seafood Prods. Antitrust Litig.*, 277 F. Supp. 3d 1167, 1183 (S.D. Cal. 2017) remains valid, and the Court’s prediction that “discovery will likely not affect the legal analysis implicated by the circumstances of this particular case” (*In re Packaged Seafood Prods. Antitrust Litig.*, 242 F. Supp. 3d 1033, 1066 (S.D. Cal. 2017)) has proven sound. Having successfully pushed for and received an examination of the choice of law issue at the motion to dismiss stage,³⁷ Defendants show no basis to revisit it.³⁸ *See, e.g., Yellowowl-Burdeau v. City of Tukwila*, No. 2:16-cv-01632-RAJ, 2017 U.S. Dist. LEXIS 67693, at *2, 8 (W.D. Wash. May 3, 2017).

EPPs’ allegations of the Defendants’ intertwined collusive conduct occurring in California and its impact on California are sufficient. 6AC ¶¶ 417-427; *see also* ¶¶ 171, 174 (COSI and TUG business in California), 184 (Dongwon’s ownership of a shipping company in Commerce, CA), and 342 (BB and COSI’s joint packing plant in Santa Fe Springs, CA). Moreover, former StarKist executive Steve Hodge admitted [REDACTED].” Burt Decl., ¶ 52, Ex. 72 at 11:23-12:5, 12:8-13, 12:23-13:2 (Hodge allocution transcript). *See also* 6AC ¶¶ 52, 57 ([REDACTED]). This defeats StarKist’s belated argument that its Pennsylvania offices exempt it from application

³⁷ Defendants previously argued that examining choice of law “on a motion to dismiss is appropriate, especially when discovery will not substantially inform the choice-of-law analysis.” *In re Packaged Seafood Prods.*, 242 F. Supp. 3d at 1065.

³⁸ Defendants employ nearly the identical argument and case law as in their motion to dismiss (*see* ECF No. 207-6), which still fail. *See* EPPs’ Appendix A, attached hereto.

FILED UNDER SEAL

1 of California law. Opp. at 39.³⁹

2 Moreover, StarKist admittedly conspired in California with other defendants
3 (California corporations) which establishes an incontrovertible and material
4 connection between StarKist and California and a reasonable expectation by StarKist
5 that it would be held accountable under California laws for such conduct. Manifold
6 Supp. Decl., Exs. 1-2.

7 **B. The Individual State Classes Should Be Certified**

8 Defendants’ argument that variations among the state laws cause “individual
9 issues to predominate” is fundamentally ill-conceived. No one state (and Defendants
10 do not contend otherwise) poses manageability issues; nor could they, as each state
11 presents one to three state law claims. 6AC ¶¶ 429–1088. Declining to adjudicate the
12 valid and jurisdictionally proper class action claim of Plaintiff A simply because the
13 Court also has before it the valid and jurisdictionally proper separate state law class
14 claims of Plaintiffs B and C in a consolidated case would constitute an effective
15 abdication of fair process and adjudication on the merits in all the cases.⁴⁰

16 ³⁹ StarKist’s sudden claims that the Cartwright Class would violate its due
17 process rights have been waived by its failure to raise the point in the Court’s prior
18 examination of the issue. *See, e.g., Aicco, Inc. v. Ins. Co. of N. Am.*, 90 Cal. App. 4th
19 579, 595 (2001) (rejecting claims by defendant located in Pennsylvania that
20 Pennsylvania law rather than California should govern as waived where it had not
previously “made a serious attempt to support its argument.”).

21 ⁴⁰ The convergence of large national antitrust conspiracies, state *Illinois Brick*
22 repealer statutes, and the passage of the Class Action Fairness Act of 2005
23 (“CAFA”) (28 U.S.C. § 1322 (d)) made it inevitable that sizable class claims
24 involving the laws of multiple states would find their way into consolidated
25 proceedings in Federal Court. Kershell, Holly, *Comment: An Approach to*
26 *Certification Issues in Multi-State Diversity Class Actions in Federal Court After the*
27 *Class Action Fairness Act of 2005*, 40 U.S.F. L. REV. 769, 770 (2006). It is thus
28 unremarkable that in such a case a federal court will be called upon to coordinate
varying state classes involving the laws of multiple states. As noted by the *SRAM*
court, “[T]here is no qualitative difference between a federal district court
considering class certification of state claims under that state law and a federal court
serving as a multi-district litigation forum performing the same task for many federal
courts.” *SRAM*, 264 F.R.D. at 615.

FILED UNDER SEAL

1 As to “manageability,” Defendants ignore the fact that “manageability” is just
2 one part of the larger question under Rule 23(b)(3) of whether class treatment is
3 “superior to other available methods for fairly and efficiently adjudicating the
4 controversy.” Fed. R. Civ. P. 23(b)(3). *See Moore v. Ulta Salon, Cosmetics &*
5 *Fragrance, Inc.*, 311 F.R.D. 590, 608 (C.D. Cal. 2015) (citing superiority factors);
6 *Leyva v. Medline Indus. Inc.*, 716 F.3d 510, 514 (9th Cir. 2013) (certification
7 erroneously denied because all four criteria must be considered). And there is a
8 “well settled presumption that courts should not refuse to certify a class merely on
9 the basis of manageability concerns.” *Briseno v. ConAgra Foods, Inc.* 844 F.3d
10 1121, 1128 (9th Cir.) *cert denied*, 138 S. Ct. 813 (2017).

11 Defendants ignore the other factors. The identically situated consumers in
12 each proposed class have exceedingly modest losses compared to the resources
13 necessary to prosecute these actions. They must proceed in classes or not at all.⁴¹

14 Finally, Defendants ignore this Court’s progress in the case to date. The pre-
15 trial stage of this case has been managed through motion practice and discovery,
16 which is nearly at a close. The same will necessarily be true of any summary
17 adjudication motions.

18 While there may be some complexity at the jury instruction stage on some
19 individual claims, that complexity is greatly overblown in the Defendants’ zeal to
20 avoid all accountability for their admitted criminal conduct. Courts recognize that
21 while some differences in claims will exist, such differences pale in comparison with
22 the common elements and can be handled by federal courts committed to the
23 resolution of disputes, including in complex cases, on the merits. *Lidoderm*, 2017
24 U.S. Dist. LEXIS 24097, at *43, 111-12 (class of EPPs in 17 states certified;

25
26 ⁴¹ *SRAM*, 264 F.R.D. at 615 (27 state law classes); *LCD*, 267 F.R.D. at 608 (23
27 state law classes). Denial of class certification sounds the death knell to modest
28 consumer claims such as these. *See Carnegie v. Household Int’l, Inc.*, 376 F.3d 656,
661 (7th Cir. 2004); *Opperman v. Path, Inc.*, Case No. 13-cv-00453-JST, U.S. Dist.
LEXIS 92403, at *56 (N.D. Cal. July 15, 2016).

24 ⁴² Defendants’ reliance on pre-CAFA cases and cases which either rely on pre-
25 CAFA authority or fail to give due consideration to the federalizing effect CAFA
26 had on national interest multi-state cases such as this one, is out of step with
27 jurisdictional realities. Better reasoned cases take account of the fact that “federal
28 courts are the primary forum in which multi-state class actions may now be
brought.” These courts realize that “[m]ulti-state class actions can be made
manageable if federal courts are willing to undertake the proper, albeit complex
analysis of the laws of multiple states; and in this post-CAFA era it is imperative
that they do so.” *Kershell*, 40 U.S.F. L. REV. at 770.
