10 UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF CALIFORNIA
11 SAN FRANCISCO DIVISION

12 UNITED STATES OF AMERICA,

13 *Plaintiff,*

14 v.

15 BAZAARVOICE, INC.

16 *Defendant.*

Case No.: 13

JSC
0133

17
18 COMPLAINT

19 The United States of America, acting under the direction of the Attorney General of the
20 United States, brings this civil action to obtain equitable relief remedying the June 2012
21 acquisition of PowerReviews, Inc. ("PowerReviews") by Defendant Bazaarvoice, Inc.
22 ("Bazaarvoice"). The United States alleges as follows:
23

INTRODUCTION

1
2 1. Many retailers and manufacturers purchase product ratings and reviews platforms
3 (“PRR platforms”) to collect and display consumer-generated product ratings and reviews online.
4 Bazaarvoice provides the market-leading PRR platform, and PowerReviews was its closest
5 competitor. No other PRR platform competitor has a significant number of PRR platform
6 customers in the United States. By acquiring PowerReviews, Bazaarvoice eliminated its most
7 significant rival and effectively insulated itself from meaningful competition.

8 2. The acquisition of PowerReviews was a calculated move by Bazaarvoice that was
9 intended to eliminate competition. Bazaarvoice’s senior executives spent more than a year
10 considering whether buying PowerReviews would reduce pricing pressure and diminish
11 competition in the marketplace. As a result of their extensive deliberations, the company’s
12 business documents are saturated with evidence that Bazaarvoice believed the acquisition of
13 PowerReviews would eliminate its most significant competitive threat and stem price
14 competition.

15 3. In April 2011, Brant Barton, one of Bazaarvoice’s co-founders, outlined the
16 benefits of the acquisition in an e-mail to senior Bazaarvoice executives. He noted that acquiring
17 PowerReviews would “[e]liminat[e] [Bazaarvoice’s] primary competitor” and provide “relief
18 from [] price erosion.” He also discussed the absence of competitive alternatives for customers,
19 concluding that Bazaarvoice would “retain an extremely high percentage of [PowerReviews]
20 customers,” because available alternatives for disgruntled customers were “scarce” and “low-
21 quality.”

22 4. On May 4, 2011, Brett Hurt, Bazaarvoice’s Chief Executive Officer, supported
23 Barton’s analysis and advocated the company’s pursuit of PowerReviews in an e-mail to the

1 Bazaarvoice board of directors. According to Hurt, the acquisition of PowerReviews was an
2 opportunity to “tak[e] out [Bazaarvoice’s] only competitor, who . . . suppress[ed] [Bazaarvoice]
3 price points []by as much as 15%”

4 5. Two days later, Barton, Hurt, and Stephen Collins, Bazaarvoice’s Chief Financial
5 Officer, met with senior PowerReviews executives to discuss the potential acquisition. In his
6 notes from the meeting, Barton wrote that the transaction would enable the combined company
7 to “avoid margin erosion” caused by “tactical ‘knife-fighting’ over competitive deals.” He later
8 prepared a presentation for Bazaarvoice’s board of directors in which he claimed the transaction
9 would “[e]liminate [Bazaarvoice’s] primary competitor” and “reduc[e] comparative pricing
10 pressure.”

11 6. In October 2011, Collins e-mailed other senior Bazaarvoice executives to provide
12 his perspective regarding the potential acquisition. He recommended that Bazaarvoice continue
13 its pursuit of PowerReviews because he feared price competition with PowerReviews would
14 impair the long-term value of Bazaarvoice’s business. Collins believed that Bazaarvoice had
15 “literally, no other competitors,” and he expected “pricing accretion” from the combination of
16 the two firms. In November 2012, Stephen Collins replaced Brett Hurt as Bazaarvoice’s Chief
17 Executive Officer.

18 7. In November 2011, Hurt sought permission from Bazaarvoice board members to
19 continue exploring a potential deal with PowerReviews, observing that Bazaarvoice would have
20 “[n]o meaningful direct competitor” after acquiring PowerReviews, thereby reducing “pricing
21 dilution.”

22 8. In December 2011, Collins and Barton met with PowerReviews representatives
23 again. Following the meeting, Collins prepared a memorandum for Bazaarvoice’s board of

1 directors to outline the expected benefits of the acquisition. He wrote that the acquisition of
2 PowerReviews would (1) “eliminat[e] feature driven one-upmanship and tactical competition;”
3 (2) “[c]reate[] significant competitive barriers to entry;” (3) “eliminate the cost in time and
4 money to take [PowerReviews’] accounts;” and (4) “reduce [Bazaarvoice’s] risk of account
5 losses as [PowerReviews] compete[d] for survival.”

6 9. In May 2012, Bazaarvoice executives completed their due diligence for the
7 acquisition. To support their recommendation to proceed with the acquisition of PowerReviews,
8 they prepared a 73-page memorandum for the company’s board of directors. In this
9 memorandum, the executives touted the transaction’s dampening effect on competition,
10 concluding the acquisition would “block[] entry by competitors” and “ensure [Bazaarvoice’s]
11 retail business [was] protected from direct competition and premature price erosion.”

12 10. Bazaarvoice’s acquisition of PowerReviews closed on June 12, 2012. The
13 purchase price, including cash and non-cash consideration, was approximately \$168.2 million.

14 **THE DEFENDANT AND THE TRANSACTION**

15 11. Bazaarvoice is a publicly traded Delaware corporation and is headquartered in
16 Austin, Texas. During its 2012 fiscal year, Bazaarvoice earned approximately \$106.1 million in
17 revenue.

18 12. PowerReviews was a privately held Delaware corporation. Before the
19 transaction, PowerReviews was headquartered in San Francisco, California. During the 2011
20 calendar year, the company earned approximately \$11.5 million in revenue.

21 **JURISDICTION**

22 13. The United States brings this action under Section 15 of the Clayton Act, 15
23 U.S.C. § 25, to restrain Bazaarvoice’s violation of Section 7 of the Clayton Act, 15 U.S.C. § 18.

1 developed with internal resources to sophisticated commercial platforms offering a combination
2 of software, moderation services, and data analytics tools.

3 19. Ratings and reviews are a popular feature for retailers and manufacturers to
4 display on their websites. Ratings and reviews can provide highly relevant, product-specific
5 information on a retailer's or manufacturer's website near the time of purchase. The additional
6 information provided by ratings and reviews can increase sales, decrease product returns, and
7 attract more consumers to a retailer's or manufacturer's website. Ratings and reviews also can
8 provide valuable data about consumer preferences and behavior, which retailers and
9 manufacturers can use to make inventory purchasing or product design decisions.

10 20. Ratings and reviews may also benefit a retailer or manufacturer by boosting a
11 product's ranking on a search engine results page. Internet search engine algorithms generally
12 assign higher rankings to websites with fresh and unique content. Ratings and reviews are
13 frequently updated, and this content is highly tailored to the retailer's or manufacturer's product
14 catalog. Accordingly, when ratings and reviews are indexed by a search engine, the underlying
15 product pages will likely receive a higher ranking on a search engine results page.

16 21. From a consumer's perspective, ratings and reviews are useful because they can
17 provide authentic information regarding another consumer's experience with a particular
18 product. Feedback from other consumers can help a prospective buyer make a more informed
19 purchasing decision. Product ratings and reviews often provide information that is not easily
20 ascertainable when shopping online (*e.g.*, quality of construction, fit, durability).

21 22. The software component of a PRR platform provides the user interface and
22 review form for the collection and display of ratings and reviews. Most review forms prompt
23 consumers to rate a product on a five-star scale and offer consumers an option to write an open-

1 ended comment about their experience with the product. Other forms also allow consumers to
2 rate products along several dimensions (e.g., product appearance, ease of assembly, value).

3 23. In addition to the technology components of their respective platforms, some PRR
4 platform providers also provide moderation services. After a consumer submits a review, the
5 PRR platform provider applies software algorithms to scan the submission for inappropriate or
6 fraudulent content. After the automated scan, a human moderator examines each submission to
7 ensure it complies with a particular client's moderation standards. These moderation standards
8 may vary between clients. For example, some clients may prefer not to display references to
9 their competitors on their websites.

10 24. After moderation, the PRR platform publishes approved submissions in a display
11 interface on a client's website. Many PRR platforms display a summary of a product's rating
12 and review information and allow consumers to view individual reviews for more detailed
13 information. The review summary may display the number of reviews, the product's average
14 overall rating, a review distribution histogram, or information related to particular product
15 attributes. The display interface may also allow consumers to filter reviews according to their
16 interests.

17 25. Sophisticated PRR platforms allow manufacturers to share, or "syndicate," ratings
18 and reviews with their retail partners. Through the syndication network, retailers can display
19 reviews that were originally collected by a product's manufacturer. Syndication helps retailers
20 obtain more content than they could independently. Manufacturers and retailers both benefit
21 from the ability to display more reviews at the point of sale. Syndication between a
22 manufacturer and a retailer using different PRR platforms is possible, but requires expensive,
23 customized integration work to connect the platforms.

1 26. Some PRR platforms also include analytics software that manufacturers and
2 retailers use to analyze information collected from ratings and reviews. With these tools,
3 manufacturers and retailers can track and analyze real-time consumer sentiment. Manufacturers
4 and retailers can use this information to identify product design defects, make product design
5 decisions, or identify consumers for targeted marketing efforts.

6 27. PRR platforms are sold by Bazaarvoice and other commercial suppliers in direct
7 sales processes that require a significant amount of time and negotiation. Prices are individually
8 negotiated, and each customer's price is independent of the prices that other customers receive.
9 Arbitrage, or indirect purchasing from other customers, is not possible because customers cannot
10 re-sell PRR platforms that they have purchased from a commercial supplier. Accordingly,
11 customers commonly receive different prices, even when purchasing similar products and
12 services.

13 28. PRR platform providers negotiate prices in light of each customer's demand
14 characteristics, taking into account competitive alternatives. Bazaarvoice calls this method of
15 setting prices "value-based" pricing, meaning "the more value the [client] perceives, the higher
16 [Bazaarvoice's] price point." During the sales process, it is typical for a salesperson to ask the
17 prospective customer to divulge detailed information related to its business, which may include
18 information related to (1) annual volume of online sales; (2) product return rates; (3) historic
19 conversion rates; (4) e-commerce vendor relationships; or (5) project budgets. This process
20 enables the PRR platform provider to assess the prospect's willingness to pay for a PRR
21 platform. After acquiring as much information as possible about the prospect, the PRR platform
22 provider offers a price that aligns closely with its perception of the prospect's willingness to pay
23 for its product.

1 above pre-merger levels. In fact, Bazaarvoice's current CEO pressed for the company to acquire
2 PowerReviews because he anticipated "pricing accretion" due to the consolidation of the two
3 firms.

4 33. Prospective customers routinely played Bazaarvoice and PowerReviews against
5 each other during negotiations. Consequently, a Bazaarvoice "playbook" for competing with
6 PowerReviews mandated that "[p]ricing only [be] delivered when [the customer's] BATNA and
7 ZOPA have been clearly identified." BATNA and ZOPA are acronyms which stand for "best
8 alternative to negotiated agreement" and "zone of possible agreement." For many manufacturers
9 and retailers, PowerReviews was the best alternative to a negotiated agreement with
10 Bazaarvoice. Accordingly, competitive pressure from PowerReviews frequently forced
11 Bazaarvoice to offer substantial price discounts.

12 34. Other commercial suppliers of PRR platforms are not sufficiently close substitutes
13 to Bazaarvoice's platform to prevent a significant post-merger price increase. PowerReviews
14 was the most substantial restraint on Bazaarvoice's conduct in the United States before the
15 merger, and no other competitor was a comparable rival. Bazaarvoice now faces virtually the
16 same competitive landscape of "scarce" and "low quality" alternatives that Brant Barton
17 identified in April 2011.

18 35. The absence of other meaningful competitors also has been recognized by both
19 industry analysts and PowerReviews' former CEO, Pehr Luedtke, in calling the PRR platform
20 market a "duopoly." Erin Defossé, Bazaarvoice's Vice President of Strategy, has agreed that
21 "[t]here really isn't a market . . . to understand (as it relates [to ratings and reviews]), it is
22 [Bazaarvoice] or PowerReviews." Additionally, PowerReviews' CEO, Ken Comée, and
23 PowerReviews' Chief Financial Officer, Keith Adams, acknowledged that the combination of

1 Bazaarvoice and PowerReviews would create a “[m]onopoly in the market” when evaluating the
2 anticipated benefits of the acquisition.

3 36. The commanding position occupied by Bazaarvoice and PowerReviews is also
4 readily apparent from their combined market share in the Internet Retailer 500 (“IR 500”), which
5 is an annual ranking of the 500 largest internet retailers in North America according to online
6 sales revenue. Bazaarvoice regularly tracks its IR 500 market position, and company executives
7 considered the impact that the acquisition of PowerReviews would have on Bazaarvoice’s IR
8 500 market share. For example, in the diligence memorandum prepared for the company’s board
9 of directors, Bazaarvoice executives wrote, “[PowerReviews’] customer base includes 86 IR 500
10 retailers who have resisted becoming Bazaarvoice customers despite significant attempts to
11 displace [PowerReviews] from these accounts” and noted that the acquisition of PowerReviews
12 would “immediately increase the IR 500 penetration of Bazaarvoice by 49%.” Within the IR
13 500, more than 350 retailers collect and display ratings and reviews. Approximately 70% of
14 these firms use a PRR platform provided by Bazaarvoice or PowerReviews. Most of the
15 remaining websites use in-house PRR solutions.

16 37. In addition to purchasing a PRR platform from a commercial supplier, a retailer or
17 manufacturer seeking to include ratings and reviews on its website may elect to develop an in-
18 house PRR solution. For many retailers and manufacturers, however, it is impractical and cost-
19 prohibitive to build an internal solution that can satisfy their business requirements.
20 Accordingly, the acquisition particularly harms retailers and manufacturers for which an in-
21 house solution is not an economically viable alternative.

22 38. For many retailers and manufacturers, in-house PRR solutions are not sufficiently
23 close substitutes to Bazaarvoice’s platform to impede a post-merger price increase by

1 Bazaarvoice. It would be prohibitively expensive for many customers to develop a PRR solution
2 with functionality comparable to the features offered by Bazaarvoice, and it would be difficult to
3 maintain the same pace of innovation. Moreover, it would be very complex and expensive for a
4 customer to perform the same level of moderation. In-house solutions are only a viable option
5 for customers that are not interested in the full feature set offered by Bazaarvoice (including
6 moderation and syndication services), or customers that are willing to invest heavily in ongoing
7 platform development to maintain the software and create new features.

8 39. Bazaarvoice is able to use information obtained during the sales process to
9 determine whether an in-house PRR solution is an economically viable alternative for a
10 particular customer. Accordingly, in light of the merger, it will be a profit-maximizing strategy
11 for Bazaarvoice to impose targeted price increases on customers that do not consider in-house
12 solutions to be a viable alternative. Faced with an anticompetitive post-merger price increase,
13 these customers would not develop an in-house solution or abandon ratings and reviews
14 altogether.

15 40. Other social commerce products, including community platforms, forums, and
16 question and answer (“Q&A”) platforms, are also not substitutes for PRR platforms. These other
17 social commerce products do not collect the same type of structured, product-level data
18 associated with ratings and reviews. Because PRR platforms and other social commerce
19 products serve different purposes, retailers and manufacturers routinely use PRR platforms in
20 combination with one or more other social commerce products.

21 41. As a result of Bazaarvoice’s acquisition of PowerReviews, customers will lose
22 critical negotiating leverage. The elimination of PowerReviews has significantly enhanced
23 Bazaarvoice’s ability and incentive to obtain more favorable contract terms. Accordingly, many

1 retailers and manufacturers will now obtain less favorable prices and contract terms than
2 Bazaarvoice and PowerReviews would have offered separately absent the merger.

3 **B. PowerReviews’ “scorched earth approach to pricing” applied significant pressure to**
4 **Bazaarvoice in competitive deals.**

5 42. Price competition with Bazaarvoice was a core component of PowerReviews’
6 business strategy. PowerReviews positioned itself as a low-price alternative to Bazaarvoice and
7 aggressively pursued Bazaarvoice’s largest clients. The company set an internal goal to “[b]e in
8 every deal [Bazaarvoice] is in,” and encouraged price competition by building a “cost structure
9 to support price compression.” As a result of price competition between Bazaarvoice and
10 PowerReviews, manufacturers and retailers obtained substantial discounts—sometimes in excess
11 of 60%.

12 43. PowerReviews’ aggressive approach to pricing frequently forced Bazaarvoice to
13 defend its more expensive list prices. Responding to competitive pressure from PowerReviews
14 in July 2011, Bazaarvoice’s Vice President of Retail Sales warned, “[PowerReviews] has been
15 VERY active in almost all of our deals from small to large” (emphasis in original). He claimed
16 that PowerReviews had adopted a “scorched earth approach to pricing,” which “force[d] all of
17 [Bazaarvoice’s] current prospects and customers to at least understand how and why there is
18 such a [difference] in price.”

19 44. If a prospective customer was unwilling to pay a premium over the
20 PowerReviews price, Bazaarvoice often responded with substantial price discounts. Bazaarvoice
21 frequently matched the PowerReviews price or offered a more favorable price than
22 PowerReviews. Tony Capasso, a Vice President of Sales for Bazaarvoice, described this trend in
23 a 2011 e-mail regarding an apparel manufacturer’s consideration of PowerReviews: “[L]ate

1 adopters see us as the stronger brand but struggle to justify 2X-3X greater costs for a solution
2 that looks somewhat the same. Even when we do show differences some [prospects] don't put
3 enough stock in those differences to justify the price [difference]. We may need to battle on
4 price in this case" Bazaarvoice ultimately offered to match the price that PowerReviews
5 had offered the apparel retailer, which represented a substantial discount from its initial proposal.

6 45. Even if PowerReviews was unable to win a customer's business, its low prices set
7 the bar for negotiations and compressed Bazaarvoice's margins. Bazaarvoice employees viewed
8 PowerReviews as "an ankle-biter that cause[d] price pressure in deals," and acknowledged that
9 many customers brought PowerReviews into negotiations as a "lever to knock [Bazaarvoice]
10 down on price."

11 46. PowerReviews also pursued Bazaarvoice's installed customer base. In some
12 cases, PowerReviews convinced Bazaarvoice customers to switch platforms. In other cases, an
13 offer from PowerReviews provided additional leverage for the customer to negotiate more
14 favorable terms from Bazaarvoice. In 2011, Alan Godfrey, Bazaarvoice's General Manager of
15 North American Retail, described this competitive dynamic as a "full frontal assault" by
16 PowerReviews that was "successfully penetrating the [executive] ranks of [Bazaarvoice's]
17 anchor clients and convincing them to evaluate alternatives, or at least, negotiate [Bazaarvoice]
18 to lower price points."

19 47. PowerReviews' efforts to target existing Bazaarvoice customers did not go
20 unnoticed. In July 2011, PowerReviews convinced a large electronics retailer to reevaluate its
21 relationship with Bazaarvoice. Afterwards, Mike Svatek, Bazaarvoice's Chief Strategy Officer,
22 expressed concern that Bazaarvoice was "seeing new competitive pressure" from PowerReviews
23 through an "aggressive blitz campaign." Svatek believed Bazaarvoice needed to "eradicate"

1 PowerReviews, and he proposed a counterattack on the PowerReviews base. He advocated an
2 “aggressive” approach to “unseat” PowerReviews from three of its largest accounts.

3 48. It was common for Bazaarvoice to pursue PowerReviews customers in this
4 fashion. For example, in response to a PowerReviews campaign targeting Bazaarvoice’s
5 manufacturing clients, Bazaarvoice put into motion a plan to “steal one or more major
6 [PowerReviews] clients . . . by offering them something they can’t refuse.” This strategy was
7 intended to send a signal to PowerReviews that Bazaarvoice was willing “to absorb some pain in
8 return for handing [PowerReviews] major client losses.” In at least two cases, Bazaarvoice
9 offered to provide its PRR platform to large PowerReviews customers for free.

10 49. Before the acquisition, a number of manufacturers and retailers switched between
11 the Bazaarvoice and PowerReviews platforms. Many times these switches were spurred by
12 aggressive offers that were intended to displace the incumbent PRR platform provider. As a
13 result of the acquisition, however, Bazaarvoice will no longer need to “absorb some pain” to
14 attract PowerReviews clients to the Bazaarvoice platform or retain customers in the face of lower
15 prices from PowerReviews. When recommending the transaction to the company’s board of
16 directors, Bazaarvoice executives noted that the transaction would enable Bazaarvoice to acquire
17 large PowerReviews customers that had “resisted becoming Bazaarvoice customers despite
18 significant attempts to displace [PowerReviews].” Absent the transaction, they believed it was
19 “unlikely that [Bazaarvoice could] attract these retailers to [its] platform in the foreseeable future
20 nor [sic] without significant cost.”

21 **C. Bazaarvoice and PowerReviews engaged in “feature driven one-upmanship,”**
22 **which drove both firms to innovate and develop new PRR platform features.**

23

1 50. As PowerReviews and Bazaarvoice grappled to differentiate their product
2 offerings, they developed new features and improved the functionality offered by their respective
3 platforms. Pehr Luedtke, PowerReviews' former CEO, described the pattern of innovation
4 competition between Bazaarvoice and PowerReviews in a 2010 e-mail to a large consumer
5 products retailer: "[T]here are a lot of similarities between Bazaar[v]oice and PowerReviews
6 when it comes to features . . . we have constantly traded places in terms of who leads and who
7 fast follows." Feature-driven competition between Bazaarvoice and PowerReviews hastened the
8 pace of innovation and made ratings and reviews an increasingly attractive proposition for
9 manufacturers and retailers.

10 51. For example, PowerReviews began offering an "in-line SEO solution" in January
11 2009. This was the first PRR platform feature to allow ratings and reviews to be indexed by
12 search engines directly from the product webpage, rather than a separate website designed for
13 search engine optimization. PowerReviews positioned its SEO feature as a best-in-class offering
14 and targeted the shortcomings of Bazaarvoice's SEO offering during sales calls. Bazaarvoice
15 quickly responded by developing comparable functionality.

16 52. Bazaarvoice, on the other hand, was the first company to create a review
17 syndication network that connected manufacturers and retailers. PowerReviews responded by
18 creating a similar review syndication feature for its clients. PowerReviews eventually pushed the
19 envelope even further, aggressively marketing an "open" content syndication platform that
20 facilitated syndication between manufacturers that were not PowerReviews clients and retailers
21 using the PowerReviews platform. When PowerReviews announced its open syndication
22 network, it invited all Bazaarvoice manufacturing clients to try its syndication service for free for
23 twelve months.

1 53. Bazaarvoice’s manufacturing clients began to ask Bazaarvoice to syndicate their
2 reviews to retail partners on the PowerReviews platform. Bazaarvoice initially resisted, in an
3 attempt to maintain its “closed” syndication platform. In communicating this approach to
4 Bazaarvoice’s sales leadership team, Michael Osborne, Bazaarvoice’s Chief Revenue Officer
5 wrote, “[T]ell all of your teams . . . that we do not support syndication outside of our network –
6 and if we get requests for it, escalate to the top immediately. There’s a new competitive battle
7 coming.” Internally, Bazaarvoice acknowledged that it was “making a strategic choice not to
8 create a custom (and safe) version of [the content] feed for retailers outside of [the Bazaarvoice]
9 network.”

10 54. Finally, Bazaarvoice relented to customer pressure and began developing a new
11 offering to syndicate content to PowerReviews’ retailers. In an internal announcement, Erin
12 Defossé, Bazaarvoice’s Head of Product Strategy, acknowledged that this move was in response
13 to PowerReviews’ open syndication network. Brett Hurt was optimistic about his company’s
14 new approach, stating, “I cannot wait until we turn the tables on PowerReviews with their
15 aggressive push. Our strategy is going to rock them and put them on their heels.” He pushed for
16 Bazaarvoice to execute on its plan to “destroy” PowerReviews, urging “[PowerReviews] is not
17 waiting for us I want to aim a big bazooka in their direction.”

18 **D. The anticompetitive effects of the transaction will not be counteracted by entry,**
19 **repositioning, or merger-specific efficiencies.**

20 55. Entry or expansion by other firms is unlikely to alleviate the competitive harm
21 caused by the transaction. Since its founding, Bazaarvoice has been the largest commercial
22 provider of PRR platforms, and PowerReviews was its closest competitor. Other providers exist,
23

1 but they have struggled to win customers and gain market share. Bazaarvoice's competitive
2 position is protected by substantial barriers to entry.

3 56. Bazaarvoice's syndication network is a formidable barrier to entry in the market
4 for PRR platforms. As more manufacturers purchase Bazaarvoice's PRR platform, the
5 Bazaarvoice network becomes more valuable to retailers because it will allow them to gain
6 access to a greater volume of ratings and reviews. Similarly, as more retailers purchase
7 Bazaarvoice's PRR platform, the Bazaarvoice network becomes more valuable for
8 manufacturers because it will allow them to syndicate content to a greater number of retail
9 outlets. The feedback between manufacturers and retailers creates a network effect that is a
10 significant and durable competitive advantage for Bazaarvoice.

11 57. Bazaarvoice has acknowledged the importance of its syndication network as a
12 substantial barrier to entry that protects its dominant position. Before its initial public offering in
13 February 2012, Bazaarvoice prepared a document for an investor roadshow in which it explained
14 the "powerful network economies" created by linking retailers to manufacturers. Bazaarvoice
15 claimed that it competes in a "winner-take-all" market, and identified its "ability to leverage the
16 data" from its customer base as "a key barrier [to] entry." During investor roadshows, the
17 company boasted, "[A]ny company entering the market would have to start from the beginning
18 by securing all of the retail clients," which would be difficult because most of the largest retail
19 clients are already using the Bazaarvoice platform. Since its IPO, Bazaarvoice's SEC filings
20 have continued to identify "powerful network effects" from syndication as a "competitive
21 strength[] [that] differentiate[s] [Bazaarvoice] from [] competitors and serve[s] as [a] barrier to
22 entry."

23

1 58. The acquisition of PowerReviews will extend the reach of Bazaarvoice's network
2 and deprive its remaining competitors of the scale that is necessary to truly compete. Even
3 before the acquisition, the company boasted to potential investors, "[T]he power of
4 [Bazaarvoice's] network effect and significant advantage on a global scale is starting to crowd
5 out competition." As Stephen Collins predicted in October 2011, Bazaarvoice's acquisition of
6 PowerReviews threatens to "tip the scales in [Bazaarvoice's] permanent favor on the network
7 front." During its diligence process for the transaction, Bazaarvoice anticipated that the
8 assimilation of major PowerReviews retailers into the Bazaarvoice network would "further
9 increase[] . . . switching costs" and "deepen[] [its] protective moat."

10 59. Bazaarvoice cannot demonstrate merger-specific efficiencies sufficient to
11 counteract the acquisition's anticompetitive effects.

12 **CAUSE OF ACTION**

13 **(Violation of Section 7 of the Clayton Act by Bazaarvoice)**

14 60. The United States realleges and incorporates paragraphs 1 through 59 as if set
15 forth fully herein.

16 61. Bazaarvoice's acquisition of PowerReviews is likely to substantially lessen
17 competition in interstate trade and commerce in violation of Section 7 of the Clayton Act, 15
18 U.S.C. § 18.

19 62. Among other things, the transaction has had the following anticompetitive effects:

20 (a) Significant head-to-head competition between Bazaarvoice and PowerReviews
21 has been extinguished;

22 (b) Bazaarvoice has significantly reduced incentives to discount prices, increase the
23 quality of its services, or invest in innovation;

1 (c) Prices will likely increase to levels above those that would have prevailed absent
2 the transaction, forcing retailers and manufacturers to pay higher prices for PRR platforms; and

3 (d) Quality and innovation for PRR platforms will likely be less than the levels that
4 would have prevailed absent the transaction.

5 **REQUEST FOR RELIEF**

6 63. The United States requests that:

7 (a) Bazaarvoice's acquisition of PowerReviews be adjudged to violate Section 7 of
8 the Clayton Act, 15 U.S.C. § 18;

9 (b) the Court order Bazaarvoice to divest assets, whether possessed originally by
10 PowerReviews, Bazaarvoice, or both, sufficient to create a separate, distinct, and viable
11 competing business that can replace PowerReviews' competitive significance in the marketplace;

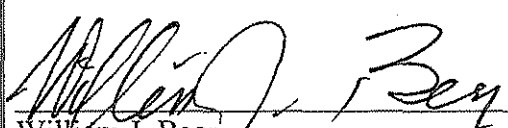

12 (c) the United States be awarded the costs of this action; and

13 (d) the United States be awarded any other equitable relief the Court deems just and
14 proper.
