LAST UPDATED: NOVEMBER 2, 2010

In the Matter of Intel Corporation, a corporation.

FTC MATTER/FILE NUMBER: 061 0247

DOCKET NUMBER: 9341

ENFORCEMENT TYPE: Part III Administrative Complaint

CASE SUMMARY

The Commission filed an administrative complaint against Intel Corp., the world's leading computer chip maker, charging that the company had illegally used its dominant market position for a decade to stifle competition and strengthen its monopoly. The complaint alleged that Intel engaged in a course of conduct to shut out rivals' competing microchips by cutting off their access to the marketplace. In particular, the complaint alleged that Intel unlawfully maintained its monopoly in relevant central processing unit, or CPU, markets, and sought to acquire a second monopoly in the relevant graphics markets, using a variety of unfair methods of competition. In August of 2010, Intel agreed to a settlement containing provisions that would undo the effects of Intel's past conduct, and prohibiting Intel from suppressing competition in the future.
