

Farelogix Responds to Sabre's Announcement of Deal Termination

May 1, 2020 | Press Releases

Farelogix today issued the following statement in response to the termination of the Sabre/Farelogix merger agreement.

MIAMI, FL – May 1, 2020 – Farelogix today issued the following statement in response to the termination of the Sabre/Farelogix merger agreement.

We are disappointed that our plan to join with Sabre is not going forward. However, due to the inherent uncertainty with any regulatory process, we have been well prepared for this possibility. Over the past eighteen months, we have made great strides in advancing our technology infrastructure, optimizing our product delivery, streamlining our operational processes, and implementing new customers.

We are very grateful to our airline customers who have been supportive of Farelogix throughout this process and amid the pandemic. We do not take this support lightly and continue to be laser focused on providing airlines with superior levels of service and product innovation. And while the economy and travel industry have been significantly impacted by COVID-19, one thing is clear – Farelogix remains committed to quickly and creatively delivering technology solutions airlines need today and into the ever-evolving future.

About Farelogix

Farelogix is a recognized leader and innovator in the travel industry. Its groundbreaking technology is modernizing the airline commerce and distribution landscape, and is used by several of the world's leading airlines. The company's flagship Airline Commerce Gateway is a technology platform comprised of fully integrated and optimized components for airline-controlled distribution, shopping, pricing, merchandising, and retailing across channels. Recognized for its pioneering role in creating the distribution innovation known today as NDC, Farelogix now provides NDC (Level 4 certified) distribution for more than 20 airlines with connectivity to 10 major PSS systems. The company's "Offer and Delivery Engines" (shopping/pricing, merchandising, availability calculation, schedule building, and NDC API) enable airlines to create, control, and deliver their offers independent of their PSS or GDS. These engines also represent the industry's only shopping and merchandising suite designed for extreme high volume searching with infinite scalability in alignment with the NDC vision. Farelogix is headquartered in Miami, Florida, with offices in Toronto, Canada; and Dubai, United Arab Emirates. For additional information, visit www.farelogix.com.
