IQVIA-FTC-004711607
PX1254-001

Pause IQVIA's Proposed Acquisition of DeepIntent

- Preserves the status quo pending full trial on the merits
- If allowed to proceed, the proposed acquisition will have the following effects:
 - ⬆ Higher prices
 - ⬇ Diminished innovation
 - ⬇ Lower quality offerings

- 1. Intro**
- 2. Legal Standard**
- 3. HCP Programmatic Advertising**
- 4. The Merging Parties: Head to Head Competition**
- 5. IQVIA's Data Dominance**
- 6. Market Definition**
- 7. Defendants' Arguments**
- 8. Equities**

Legal Standard for Preliminary Injunction

"Likelihood of Ultimate Success"

- "[T]he FTC meets its burden on the 'likelihood of success' issue if it shows preliminarily, by affidavits or other proof, that it has a fair and tenable chance of ultimate success on the merits" or raises "serious, substantial" questions to "make them fair ground for thorough investigation, study, deliberation and determination by the FTC in the first instance and ultimately by the Court of Appeals."

FTC v. Lancaster Colony Corp., 434 F. Supp. 1088, 1090-91 (S.D.N.Y. 1977).

- The FTC's burden is met by a "tenable showing" of a proposed market, even if there is also "conflicting evidence on the relevant product market" or "market shares."

FTC v. Warner Commc'ns Inc., 472 F.2d 1156, 1162, 1164 (9th Cir. 1984); *Lancaster*, 434 F. Supp. at 1089.

Equities and "Public Interest"

- "The equities to be weighed here are not the usual equities of private litigation but public equities. . . . [T]he aim of the Clayton Act to nip anticompetitive acquisitions in the bud and is to be implemented, injunctions prohibiting those acquisitions serve the public interest."

Lancaster at 1096.

- Private injury from delaying or abandonment "not proper considerations for granting or withholding injunctive relief under 13(b)."

Lancaster at 1097 (citing *FTC v. Food Town Stores, Inc.*, 539 F.2d 1339, 1342, 1346 (4th Cir. 1976)).

FTC Is Entitled to Preliminary Injunction Unless It Has No Fair And Tenable Chance on Any Alleged Basis for Harm

1 Loss of Head-to-Head Competition

- Overwhelming evidence of head-to-head competition between Lasso and DeepIntent in terms of both pricing and innovation.

2 Presumptively Illegal Increase in Market Concentration

- Market concentration figures are well past the 30% thresholds outlined by the Supreme Court and the Horizontal Merger Guidelines.
- Current market concentration is solidified by high barriers to entry and expansion.

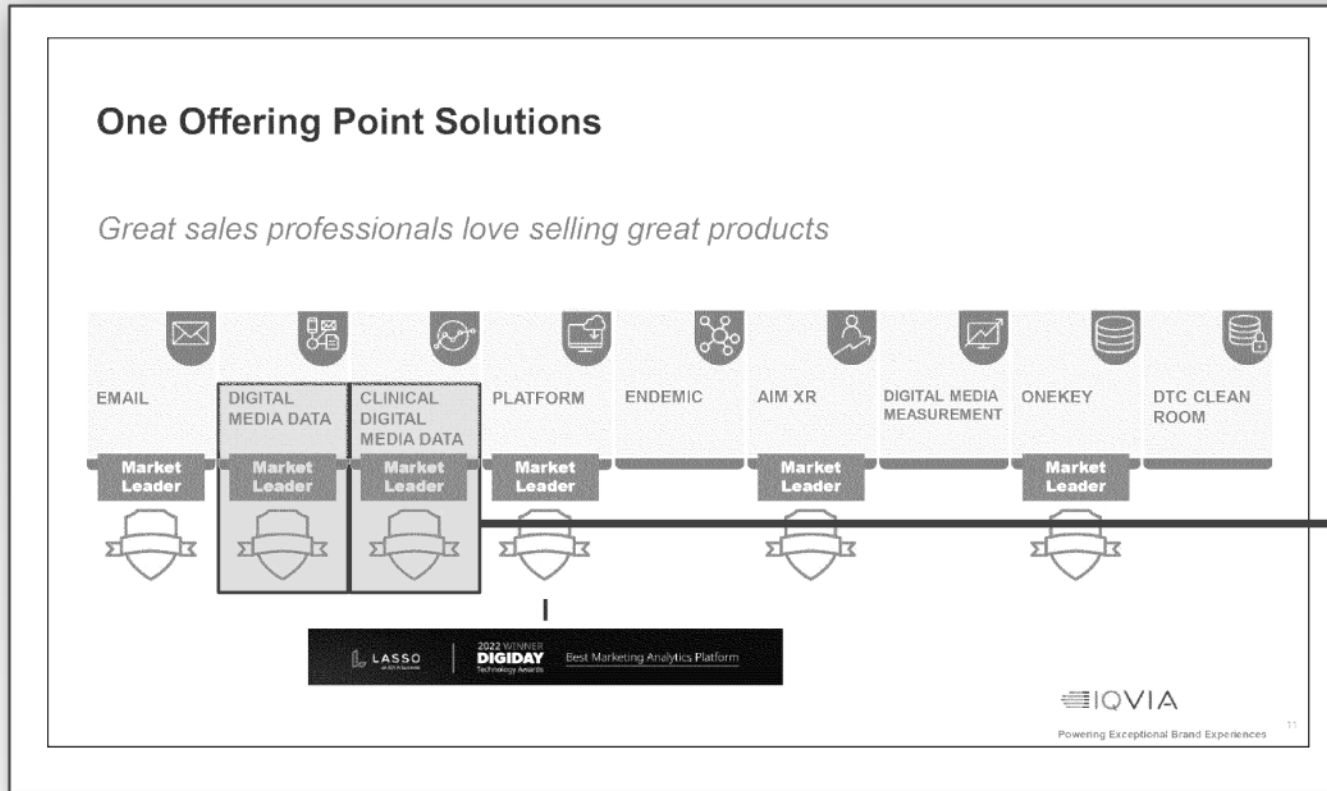

3 Illegal Vertical Merger

- IQVIA's dominance in HCP data and post-acquisition market leadership in HCP programmatic advertising creates a likelihood it may act as a "clog on competition"—the "primary vice" of a vertical merger. *Brown Shoe Co. v. United States*, 370 U.S. 294, 333-34 (1962) (citations omitted).
- Post-acquisition, IQVIA will have the ability and enhanced incentive to harm competition.

IQVIA Has the Ability to Harm

IQVIA controls key HCP data for which no adequate alternatives exist

Q. Okay. Are you familiar with other vendors that provide the sort of claims data that you need for audience creation?

A. No. Because in every single company I worked with, we worked with IQVIA.

IQVIA is the Gold Standard for HCP Data

From: Miller, Barry <barry.miller@iqvia.com>
Date: Monday, July 25, 2022 at 7:14 AM
To: Sarel Meirovich <Sarel.Meirovich@acuityads.com>
Subject: IQVIA Follow up for Acuity

[EXTERNAL]

Sarel,

Per our conversation last week, I did speak with Bob Whiting about ways in which can help support and jump start the AcuityAds HCP business. Before we get to the details, we just wanted to once again say thank you for your continued investment in this space and in our partnership. We know that there are lesser expensive alternatives in the market but by working with IQVIA, Acuity is aligning itself with the gold standard in healthcare data.

IQVIA-FTC-003849736

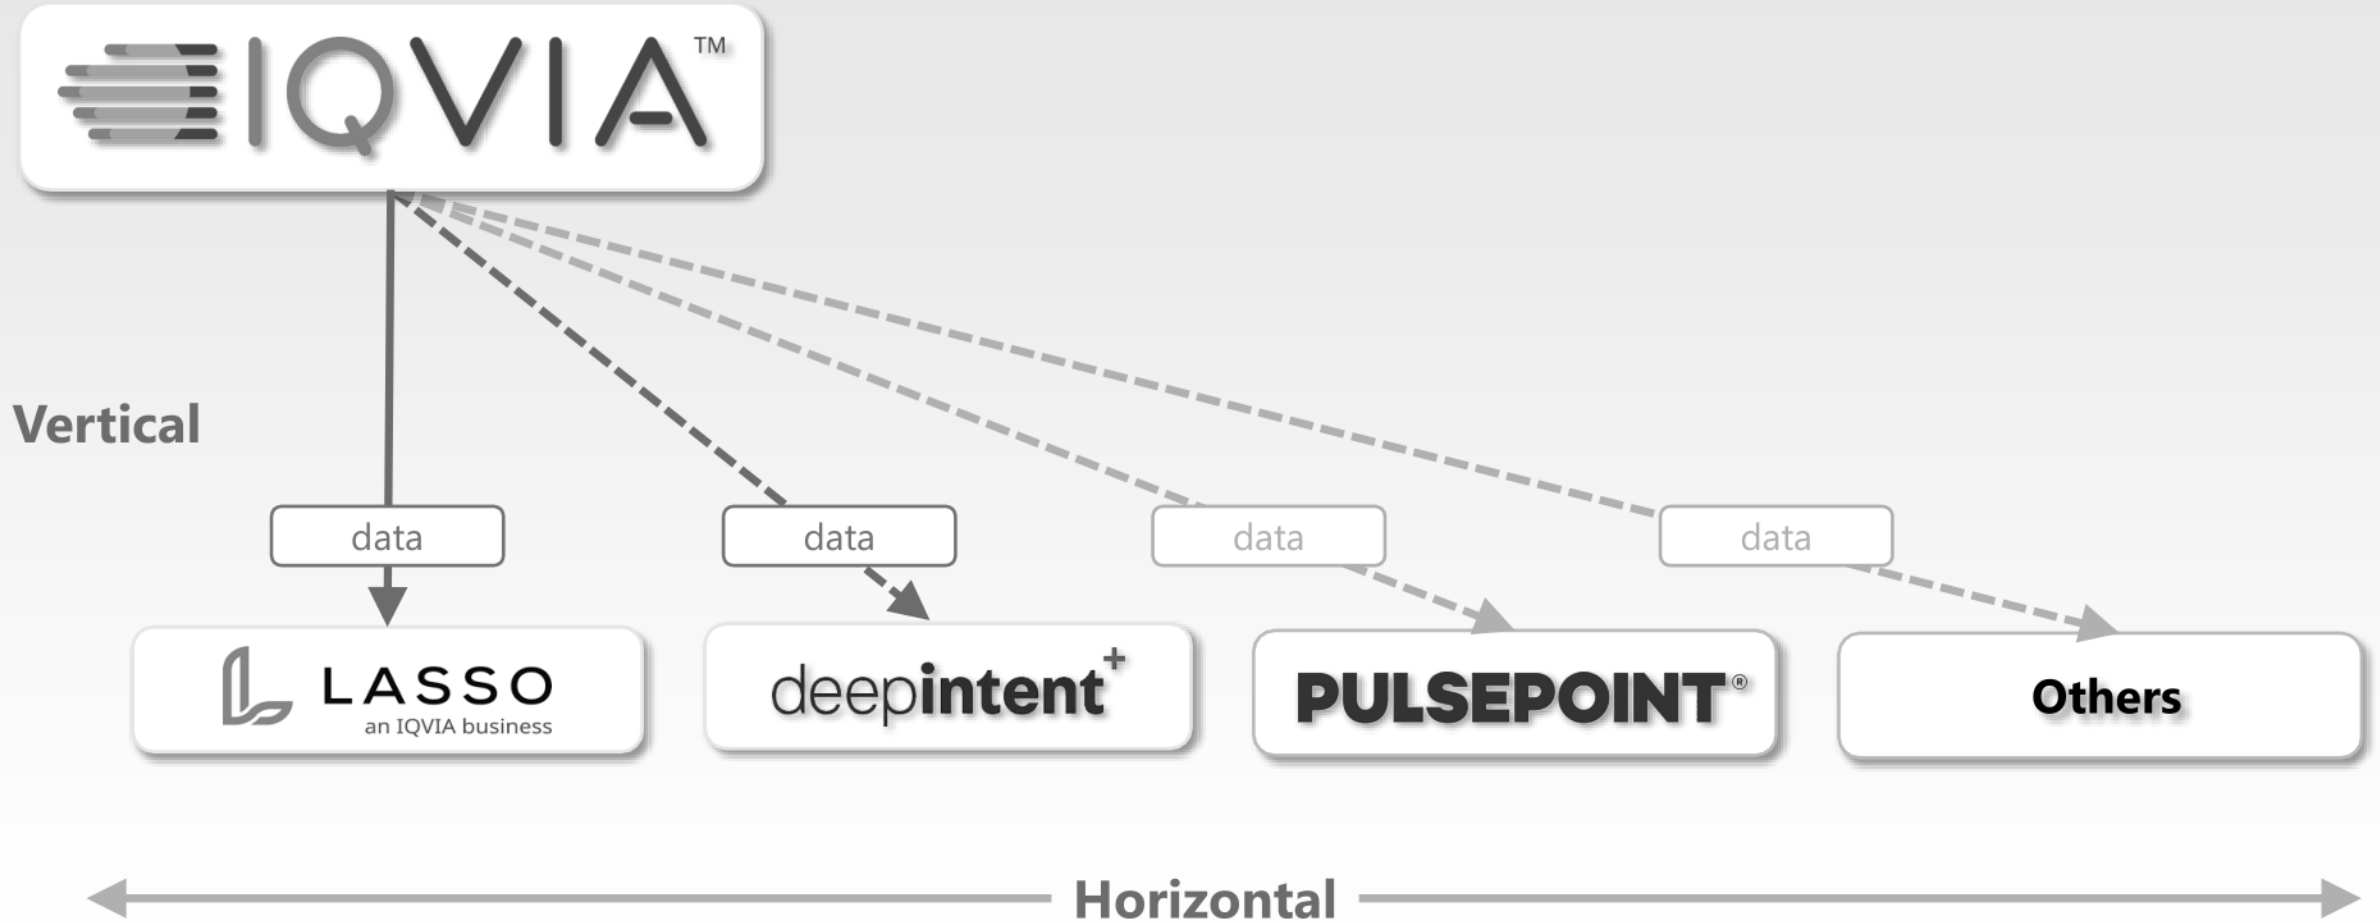

- A. [T]he majority of the advertising are from lists that were provided via TPA from IQVIA.
- Q. Do you know why that is?
- A. IQVIA, you know, is considered to be the gold standard data especially around our prescription data, Rx data, and they use – the pharma company uses it internally.

These are very good Mike!

Once Lana designs a template with Digiday logo on it -- we can create others posts that don't mention Digiday but our claims instead (the digiday logo and competitors would be a part of the creative, underpinning our claim)

Some context to the entire team → the Digiday awards gives us an excuse to remind clients that our DSP is better than Xandr's (calling them out by name) in a non-aggressive way. The entire Senior Leadership Team feels that we should definitely address Lasso heads on via marketing and sales 1:1s. They are not slopy like PP. Their leaders are very sophisticated and with Xandr deep pockets & ability for any DSP (i.e. TTD) to transact on their data through Xandr SSP seamlessly they are a real treat -- namely our #1 competitor.

Following are some initial ideas for other claims:

First and only DSP with optimization toward script lift and Rx performance
Only DSP with clinical data integrated to allow HC marketers to plan, activate, measure and optimize campaigns against Rx performance
Proven to drive 35% script lift...
Only DSP with In-flight audio optimization towards script lift and Rx performance
"Fresh data" -- Daily updates

Some context to the entire team → the Digiday awards gives us an excuse to remind clients that our DSP is better than Xandr's (calling them out by name) in a non-aggressive way. The recent Lasso measurement announcement is a good reminder that the competitor is relentlessly pursuing DeepIntent. To stay ahead of the competition, Engineering and Product needs to move faster, with more shared urgency and agility to keep our competitive distance from Lasso and PulsePoint.

While the Lasso announcement around their optimization and measurement solution closed some of our competitive advantage with Outcomes, it also provides an excellent opportunity to brainstorm ways on how Engineering and Product can specifically and immediately accelerate shipping the Outcomes roadmap. Let's make acceleration of Outcomes development a priority together starting with this call.

IQVIA-focused commentary

What makes IQVIA the "800 lb. gorilla" in the life science data space? A key reason, highlighted by Mr. Schwarz, for IQVIA's commercial success is its solid data foundation, which was built on prescription share data. Mr. Schwarz shared that, prescription share data provides metrics by which pharma companies measure their performance, drive incentive

Subject: Analyst Notes - Wells Fargo and Credit Suisse

Good morning,

Attached are notes from Tim Daley (an expert call summary) and Dan Leonard (earnings preview). Below are summary comments and estimates.

IQVIA's moat is considerably sized and difficult to cross, even for the closest competitor; likely to continue enabling IQVIA's dominance. IQV's data systems are seemingly entrenched throughout much of the core data market, but the moat is not necessarily only because of their possession of data. From Mr. Shwarz's viewpoint, this company has spent many years developing relationships with data providers (i.e., specialty pharmacies and other resources), aggregating that data, and developing infrastructure algorithms that allow the data to be easily interpretable. Essentially, much of the value in IQVIA's capabilities as a business lie in their ability to not only access the data, but to reconcile and clean the data, as well as convert this information into market viable data sets. We will note that although IQV appears to be a

Elements of Market Definition

***Brown Shoe* Practical Indicia:**

- the product's peculiar characteristics and uses
 - unique production facilities
 - distinct customers
 - distinct prices
 - the existence of classes of customers who desire particular products
 - industry or public recognition of the market
 - Defendants' documents' portrayal of market realities
- *Brown Shoe*, 370 U.S. 294, 325 (1962)

Hypothetical Monopolist Test

- "The test requires that a hypothetical profit-maximizing firm . . . that was the only present and future seller of those products ("hypothetical monopolist") likely would impose at least a small but significant and non-transitory increase in price ("SSNIP") on at least one product in the market, including at least one product sold by one of the merging firms."
- "Groups of products may satisfy the hypothetical monopolist test without including the full range of substitutes from which customers choose. The hypothetical monopolist test may identify a group of products as a relevant market even if customers would substitute significantly to products outside that group in response to a price increase."

- *Horizontal Merger Guidelines* § 4.1.1

- 4. The Merging Parties: Head to Head Competition**
- 5. IQVIA's Data Dominance**
- 6. Market Definition**
- 7. Defendants' Arguments**
- 8. Equities**

1. Lasso and DeepIntent directly compete.
2. PulsePoint, DeepIntent, and Lasso are the three largest providers of HCP programmatic advertising.
3. Combined post-merger market share is in excess of 30%.
4. Combined firm controls an important input to HCP programmatic advertising.

Smaller Relevant Product Markets Can Exist Within a Broader Market

Case	Relevant Market	Identical Product Sold in Other Channels Outside Relevant Market	Ruling
<i>FTC v. Peabody Energy Corp.</i> , 492 F.Supp.3d 865, 886 (E.D. Mo. 2020)	Southern Powder River Basin (SPRB) coal	Electricity Production	<ul style="list-style-type: none"> “It is indisputable on the record in this case that coal competes with natural gas and renewables in a broader energy market. Still, the FTC has presented more than sufficient evidence that there is also a distinct competitive market among SPRB coal producers that satisfies the applicable criteria for market definition. ... that is the market within which the Court must evaluate the legality of the proposed JV.”
<i>FTC v. Sysco</i> , 113 F.Supp.3d 1, 30-31 (D.D.C. 2015)	Broadline Food Distribution	Foodservice Distribution	<ul style="list-style-type: none"> The fact that “customers buy across channels” and Defendants “sometimes compete against other channels of distribution in the larger marketplace does not mean those alternative channels belong in the relevant product market for purposes of merger analysis.”
<i>(Staples I) FTC v. Staples, Inc.</i> , 970 F. Supp. 1066, 1075, 1079 (D.D.C. 1997)	Office Supplies Sold by Office Superstores	Consumable Office Supplies	<ul style="list-style-type: none"> Although office supply products are “undeniably the same,” the “unique combination of size, selection, depth and breadth of inventory offered by the superstores distinguishes them from other retailers.”
<i>(Staples II) FTC v. Staples, Inc.</i> , 190 F.Supp.3d 100, 126, 127 (D.D.C. 2016)	Consumable Office Supplies Sold and Distributed to Large Business to Business Customers	Consumable Office Supplies	<ul style="list-style-type: none"> “There is overwhelming evidence in this case that large B-to-B customers constitute a market that Defendants could target for price increases if they are allowed to merge,” even if they are “a targeted group that represents a relatively small part of an overall market” as Defendants argued.

“Without attempting to specify the smallest market share which would still be considered to threaten undue concentration, we are clear that 30% presents that threat.”

“Our conclusion [is] that these percentages raise an inference that the effect of the contemplated merger of appellees may be substantially to lessen competition.”

U.S. v. Philadelphia Nat'l Bank, 374 U.S. 321, 364-65 (1963).

Weighing the Equities

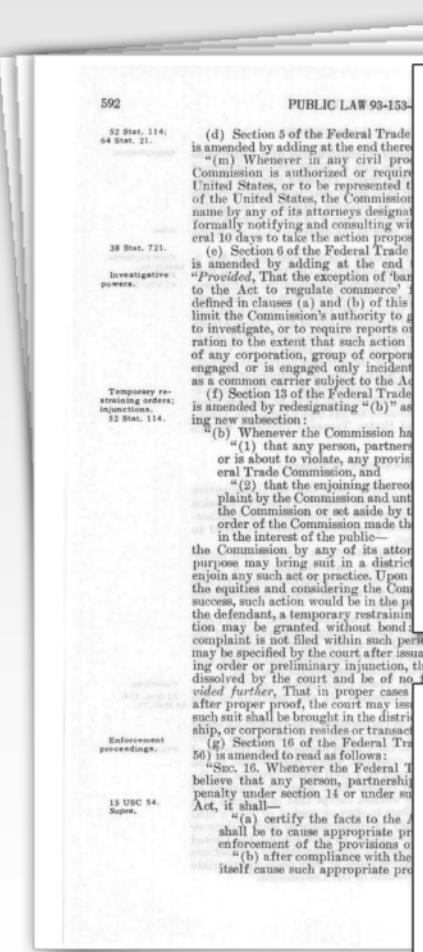

"The evidence before this court easily meets that standard. Absent preliminary relief, IQVIA can acquire and begin integrating DeepIntent. Customers would be harmed with higher prices and decreased innovation, and Defendants can "scramble the eggs" – that is, immediately merge their operations and make it extremely difficult, if not impossible, for competition to be restored to its previous state."

FTC v. Peabody Energy Corp., 492 F. Supp. 3d 865, 918 (E.D. Mo. 2020) (citing *FTC v. Sysco Corp.*, 113 F. Supp. 3d 1, 87 (D.D.C. 2015)); *Lancaster*, 434 F. Supp. at 1096-97.

"If the acquisition is allowed to proceed but is later found to be violative of the antitrust laws, divestiture will be required. At best, divestiture is a slow, cumbersome, difficult, disruptive and complex remedy."

Lancaster, 434 F. Supp. at 1096.

Thank you
