

CREATING A  
**5G FUTURE FOR ALL**

**Every now and then, something comes along that changes our lives. Something that opens up America and lets culture, communities and commerce flourish. 5G can do this. But not if it's just 5G for the few. Not if it's 5G in the current broken system. The New T-Mobile will disrupt this system, spark the 5G economy and bring #5GforAll.**

With real, nationwide 5G for All, the New T-Mobile will **open massive wireless highways** and **lower prices** for ALL Americans. We can **ignite innovation** and **challenge a failed status quo**. A status quo that opponents of this merger want to preserve. A status quo that has left too many Americans looking across a Digital Divide, paying too much for too little, with too few options, tolerating terrible treatment and believing it can't change. **It can change. It should change.**

Americans to do what we do best: create a brighter future for everyone.

## SUPPORT 5G FOR ALL

A MESSAGE FROM

# JOHN & MARCELO

Only the New T-Mobile will have the world-leading network and spectrum capacity to quickly build a real, nationwide 5G network for all Americans. Not in the next decade, but as soon as possible. The New T-Mobile's 5G network will support the creation of thousands of new jobs across America, deliver lower prices and better value for wireless and in-home broadband customers and will transform lives in ways we can't even imagine yet.

# THE FACTS

## BEHIND A NEW T MOBILE

### Same

T-Mobile has committed to offer our customers the same or better rate plans as T-Mobile and Sprint offer today for three years

### \$40 Billion

We're investing nearly \$40 billion over three years to rapidly build our nationwide 5G network and to expand into new businesses

### 3x

Since T-Mobile acquired MetroPCS, the number of Metro and Metro dealer employees who support the brand – now Metro by T-Mobile - has more than tripled

### Indefinitely

New T-Mobile is also committed to maintaining the current Sprint and T-Mobile Lifeline services throughout the country indefinitely into the future

## 9.5 Million

Plan to bring competition to broadband and have 9.5 million households by 2024 using our in-home broadband service

## 59.4 Million

Expanding our rural wireless service to provide outdoor wireless coverage to reach 59.4 million rural residents

## 2x

New T-Mobile will have approximately double the total capacity and triple the total 5G capacity of standalone T-Mobile and Sprint combined

## AT&T / Verizon

Combining T-Mobile and Sprint does not change the massive market position of AT&T and Verizon but it gives them a fairly-sized competitor to force change that will benefit consumers

## Comcast, Charter, Altice

New T-Mobile plans to be the fourth largest internet service provider by 2021, creating real competition for

## 15x

~15 times faster in 2024 than T-Mobile today with ~450 Mbps nationwide average download speeds, compared to around just 30-40 Mbps today!

## 29%

29% of U.S. households have no competitive choice for in-home broadband service faster than 25 Mbps

## 1.5 Trillion

Roughly the cost for enough towers and cell sites to do nationwide 5G on Verizon's plan for mmWave alone

**3,625**

New direct, internal full-time U.S. jobs created at New T-Mobile in year one (2019) compared to standalone operations

**12,400**

New jobs created by New T-Mobile in small towns and rural America by 2021

**33,720**

Increase in overall U.S. jobs due to merger between 2019-2023, as estimated by Dr. Eisenach of NERA Economic Consulting, Inc

**5**

New customer experience centers planned to be built by New T-Mobile

**7,500**

Customer care jobs to be created by New T-Mobile in 2024 compared to standalone operations

**600**

Additional New T-Mobile retail locations to be opened across America, many to serve small towns and rural areas
