BACKGROUND1

DISCUSSION.....4

 I. APPLE NOW PERMITS DEVELOPERS WITH APPS ON THE IOS OR
 IPADOS APP STORE U.S. STOREFRONTS TO COMMUNICATE
 WITHIN THE APP REGARDING ALTERNATIVE PURCHASING
 MECHANISMS.....4

 II. APPLE ALSO PERMITS DEVELOPERS TO COMMUNICATE OUTSIDE
 THE APP REGARDING ALTERNATIVE PURCHASING MECHANISMS.....15

CONCLUSION.....16

INTRODUCTION

1
2 On September 10, 2021, the Court issued an Injunction enjoining Apple from prohibiting
3 in the United States developers from “(i) including in their apps and their metadata buttons,
4 external links, or other calls to action that direct customers to purchasing mechanisms, in addition
5 to In-App Purchas[e] [‘IAP’] and (ii) communicating with customers through points of contact
6 obtained voluntarily from customers through account registration within the app.” Declaration of
7 Mark A. Perry (“Perry Decl.”) Ex. 6 ¶¶ 1–2. The Ninth Circuit affirmed the Injunction on April
8 24, 2023 (Perry Decl. Ex. 9, at 77), and denied Apple’s petition for rehearing on June 30, 2023
9 (Perry Decl. Ex. 10). The Supreme Court denied Apple’s petition for a writ of certiorari on January
10 16, 2024. Perry Decl. Ex. 20.

11 As of January 16, 2024, Apple has fully complied with the Injunction: It is striking the
12 relevant parts of the App Store Review Guidelines applicable to apps on the U.S. storefronts of the
13 iOS and iPadOS App Stores and implementing new rules that permit developers to (i) include in
14 their apps buttons or links with calls to action that direct customers to purchasing mechanisms in
15 addition to IAP and (ii) communicate with customers through points of contact obtained
16 voluntarily from customers through account registration within the app. As a result of these
17 changes, developers have the option of informing consumers, both within and outside the app,
18 about alternative purchase mechanisms in addition to IAP. Apple respectfully makes this
19 submission to summarize these changes for the Court.¹

BACKGROUND

21 For over a decade, Apple has imposed certain requirements on developers that use Apple’s
22 proprietary tools and technologies protected by intellectual property to develop iOS and iPadOS
23 apps. Those requirements are memorialized in the Apple Developer Program License Agreement
24 (“DPLA”) and the App Store Review Guidelines. Perry Decl. Ex. 5, at 31, 143. Epic Games, Inc.
25 initiated this lawsuit to challenge two contractual and technical restrictions: Apple’s requirement

26 _____
27 ¹ Apple incorporates by reference the definition of IAP used by the Court in its post-trial findings
28 of fact and conclusions of law. Perry Decl. Ex. 5, at 3 n.3.

1 that developers distribute iOS and iPadOS apps through the App Store, and Apple’s requirement
2 that iOS and iPadOS apps use IAP for in-app purchases of digital goods and services. After a
3 bench trial, the Court held that these requirements do not violate state and federal antitrust laws or
4 the California Unfair Competition Law (“UCL”). *Id.* at 162, 179. The Ninth Circuit affirmed.
5 Perry Decl. Ex. 9.

6 Epic also challenged two anti-steering rules in the App Store Review Guidelines, which at
7 the time of trial provided that (i) “[a]pps and their metadata may not include buttons, external links,
8 or other calls to action that direct customers to purchasing mechanisms other than [IAP],” and (ii)
9 “[a]pps in this section cannot, either within the app or through communications sent to points of
10 contact obtained from account registration within the app (like email or text) encourage users to
11 use a purchasing method other than [IAP].” Perry Decl. Ex. 11.²

12 The Court concluded that the quoted parts of these two Guidelines were unfair under the
13 UCL because they impaired information transparency, noting that “[i]n the context of technology
14 markets, the open flow of information becomes even more critical.” Perry Decl. Ex. 5, at 164.
15 The Court expressed particular concern that these two provisions prohibited developers from
16 “letting users know that [other payment] options exist.” *Id.* at 165. Accordingly, the Court entered
17 a Permanent Injunction enjoining Apple from prohibiting app developers from (i) “including in
18 their apps and their metadata buttons, external links, or other calls to action that direct customers
19 to purchasing mechanisms, in addition to In-App Purchasing,” or (ii) “communicating with
20 customers through points of contact obtained voluntarily from customers through account
21 registration within the app.” Perry Decl. Ex. 6 ¶¶ 1–2.

22 The Court described the Injunction as a “limited measure” that “balance[d] the justification
23 for maintaining a cohesive ecosystem with the public interest in unclocking the veil hiding pricing
24 information on mobile devices and bringing transparency to the marketplace.” Perry Decl. Ex. 5,
25 at 166. The Court recognized, however, that while transparency and consumer choice are

26
27 ² As the Court noted, Apple has other anti-steering rules that are not implicated by the Injunction.
28 *See* Perry Decl. Ex. 5, at 32 n.194.

1 important, Apple and millions of iPhone users still have a substantial interest in the “integrity of
2 the ecosystem.” *Id.* at 164. The Court expressly noted that Apple could continue to require the
3 use of IAP for in-app transactions. Perry Decl. Ex. 7, at 4. Moreover, the Court clarified that
4 Apple could still “take steps to protect users” from new threats created by the Injunction’s mandate.
5 Perry Decl. Ex. 7, at 3. The Court stated it would not “micromanage” the new framework. *Id.*
6 The Ninth Circuit stayed the Injunction pending issuance of the appellate mandate. *See* Perry
7 Decl. Ex. 8.

8 Shortly before the Court issued the Injunction, Apple entered into a settlement in another
9 case that resolved the antitrust and unfair competition law claims of 99% of U.S. app developers,
10 who, like Epic, had asserted that Apple monopolized an alleged iOS app and in-app product
11 distribution services market. As part of the settlement, Apple agreed to revise Guideline 3.1.3
12 and thereby allow developers to “send communications outside of the app to their user base about
13 purchasing methods other than in-app purchase,” including through points of contact obtained
14 through account registration. *See* Perry Decl. Ex. 13. Apple has made that revision. Declaration
15 of Matthew Fischer (“Fischer Decl.”) ¶ 40. In doing so, Apple came into compliance with
16 Paragraph 1(ii) of the Injunction. *See infra* § II. This Court approved the settlement as fair,
17 reasonable, and adequate. *See* Perry Decl. Ex. 14.

18 Two additional developments have helped provide a framework for Apple’s
19 implementation of Paragraph 1(i) of the Injunction. First, in response to a December 2021 decision
20 by the Netherlands Authority for Consumers and Markets, which is currently on appeal, Apple
21 created an “entitlement” framework to permit dating apps on the Netherlands iOS and iPadOS App
22 Store storefronts to inform users of other purchase options (both within and outside of the app)
23 while still protecting user security. *See* Perry Decl. Ex. 15; *see also* note 4, *infra* (explaining
24 “entitlement” in this context). Second, in March 2022, Apple again used an entitlement and usage
25 requirements to implement changes to the Guidelines for reader apps as part of its effort to resolve
26
27
28

1 a competition investigation by the Japan Fair Trade Commission. *See* Perry Decl. Ex. 16.³

2 On April 24, 2023, the Ninth Circuit affirmed the Injunction in all respects. Perry Decl.
3 Ex. 9. The Ninth Circuit stayed the mandate (and the Injunction) pending Apple’s filing of a
4 petition for a writ of certiorari with the U.S. Supreme Court. Perry Decl. Ex. 19. The U.S. Supreme
5 Court denied Apple’s petition on January 16, 2024. Perry Decl. Ex. 20.

6 Apple is publishing the amended Guidelines and supporting materials on January 16, 2024.

7 DISCUSSION

8 **I. APPLE NOW PERMITS DEVELOPERS WITH APPS ON THE iOS OR iPadOS 9 APP STORE U.S. STOREFRONTS TO COMMUNICATE WITHIN THE APP REGARDING ALTERNATIVE PURCHASING MECHANISMS**

10 Paragraph 1(i) of the Injunction enjoins Apple from prohibiting developers from including
11 in their apps buttons, links, or other calls to action that direct customers to purchasing mechanisms
12 in addition to IAP. Apple is complying with this requirement by adopting a new Guideline that
13 expressly permits developers with apps on the iOS or iPadOS App Store U.S. storefronts to include
14 buttons or external links with calls to action within their apps that direct users to alternative,
15 out-of-app purchasing mechanisms.

16 Apple has long required that all iOS and iPadOS apps developed using Apple’s proprietary
17 tools and technologies protected by intellectual property use IAP for in-app transactions for digital
18 goods and services. Fischer Decl. ¶ 7. The Court rejected Epic’s challenge to the IAP requirement
19 and has made clear that its Injunction does not require Apple to change this requirement. Perry
20 Decl. Ex. 7, at 4. In addition, developers are already permitted to (and do) include within their
21 apps certain external links, directing customers to websites for support and other services. Fischer
22 Decl. ¶ 9. This Court has previously noted that “[c]onsumers are quite used to linking from an app
23 to a web browser.” Perry Decl. Ex. 7, at 3. What Apple has heretofore precluded are external

24
25 ³ Reader apps are apps that provide digital content—i.e., magazines, newspapers, books, audio,
26 music, or video—as the primary functionality of the app. With reader apps, people can sign into
27 their account created outside of the app, letting them view and enjoy previously purchased media
28 content or content subscriptions on their Apple device. This Guideline permits reader apps to link
to a website that is owned or maintained by the developer for the purpose of account creation or
management, subject to an entitlement and usage requirements. *See* Fischer Decl. ¶ 21.

1 links that direct customers to alternative *purchasing* mechanisms. In response to the Injunction,
 2 Apple is removing that prohibition with respect to apps on the U.S. storefronts of the iOS and
 3 iPadOS App Stores.

4 Section 3.1.1(a) of the Guidelines will now provide:

5 3.1.1(a) Link to Other Purchase Methods

- 6 • Developers may apply for an entitlement to provide a link in their app to a website the
 7 developer owns or maintains responsibility for in order to purchase such items. Learn
 8 more about the entitlement. In accordance with the entitlement agreement, the link
 9 may inform users about where and how to purchase those in-app purchase items, and
 10 the fact that such items may be available for a comparatively lower price. The
 11 entitlement is limited to use only in the iOS or iPadOS App Store on the United States
 12 storefront. In all other storefronts, apps and their metadata may not include buttons,
 13 external links, or other calls to action that direct customers to purchasing mechanisms
 other than in-app purchase.

If your app engages in misleading marketing practices, scams, or fraud in relation to
 the entitlement, your app will be removed from the App Store and you may be removed
 from the Apple Developer Program.

14 Fischer Decl. ¶ 13; *see also id.* Ex. 1. Under Section 3.1.1(a), Developers may apply for the
 15 StoreKit External Purchase Link Entitlement (US) (the “Link Entitlement”).⁴ Developers who are
 16 approved for the entitlement can include within their apps buttons or links with calls to action
 17 directing users to out-of-app purchasing mechanisms other than IAP. Fischer Decl. ¶ 14. For
 18 convenience, we refer to the in-app communications permitted by the Link Entitlement as
 19 “External Purchase Links.”

20 As Apple has previously explained, and Epic has never disputed, unregulated external
 21 payment links will “harm users, developers, and the iOS platform more generally.” Perry Decl.
 22
 23
 24

25 ⁴ An “entitlement” is a right or privilege granted to a developer to activate certain features,
 26 capabilities, technologies, or functionalities for its app not otherwise available to developers.
 27 Fischer Decl. ¶ 15. Apple requires entitlements for many features, particularly where privacy,
 28 safety, and security concerns are heightened or where a requested feature carries additional risk to
 users. *Id.*

1 Ex. 12 ¶ 10.⁵ In order to minimize the considerable risks posed by external payment links, Apple
2 will require developers to adhere to certain requirements to qualify for and use the Link
3 Entitlement. These requirements are necessary to protect user privacy and security, maintain the
4 integrity of Apple’s ecosystem, promote the flow of information, avoid user confusion, and enable
5 efficient review of developers’ apps by App Review. They also guard against the uncompensated
6 use of, among other things, Apple’s platform, services (including but not limited to marketing and
7 external advertising), and proprietary tools and technologies protected by intellectual property.
8 Fischer Decl. ¶¶ 22, 35. The requirements are informed by Apple’s substantial experience. *Id.*
9 ¶ 21; *see also* Perry Decl. Ex. 7, at 3 (noting that Apple could look to “alternatives outside the app”
10 like the reader rule to promote security and maintain its ecosystem); Perry Decl. Ex. 5, at 37
11 (recognizing that privacy and security are not “static” issues, and require Apple to respond and
12 react to new developments and technological advancements).

13 ***Entitlement Application.*** A developer who wants to use the Link Entitlement must
14 complete and submit a request form to Apple providing details about its app, the External Purchase
15 Link it wishes to include, and the website domain to which the External Purchase Link will direct
16 users. *See* Fischer Decl. ¶ 16; *see also id.* Ex. 4. Developers approved for the entitlement may
17 “provide a link in their app to a web site the developer owns or maintains responsibility for in
18 order to purchase” digital goods and services for use within the app. *Id.* ¶ 13.

19 In order to qualify for the Link Entitlement, developers must certify that the third-party
20 payment services provider(s) they have contracted with for out-of-app purchasing mechanisms
21 meet certain industry standards for payment processors, that the digital goods and services users
22 purchase on their websites can be used within the apps, and that they will provide users with
23 processes for disputing unauthorized transactions, managing subscriptions, and requesting refunds.

24 _____
25 ⁵ Since the Injunction was entered, Epic has entered into two settlements with the Federal Trade
26 Commission that, based on publicly available information, appear to bolster Apple’s concern that
27 developers may take advantage of children and other users. *See* Perry Decl. Exs. 17, 18.
28 Specifically, the FTC found that, among other things, Epic had deceptively saved users’ payment
information without their knowledge, thus enabling kids to make impulse purchases without their
parents’ knowledge or approval. *Id.* Ex. 17.

1 See Fischer Decl. ¶¶ 17–18. Apps participating in the Apple Video Partner Program or the News
 2 Partner Program are not eligible for the Link Entitlement. *Id.* ¶ 19. This application process
 3 provides notice to Apple that the developer intends to use the Link Entitlement and allows Apple
 4 to confirm whether a developer is adhering to the rules and requirements applicable to the Link
 5 Entitlement. *Id.* ¶ 20.

6 ***Technical Requirements.*** A developer who is approved for the Link Entitlement must
 7 abide by the requirements set forth in the StoreKit External Purchase Link Entitlement Addendum
 8 for US Apps. Fischer Decl. ¶ 16; *see also* Fischer Decl. Ex. 2. These requirements serve a variety
 9 of purposes, but they all arise largely from the fact that an External Purchase Link encourages
 10 users to leave the app and the Apple ecosystem, and undertake a transaction on the open Internet.
 11 *Id.* ¶ 22. Apple has designed the App Store, iOS, and iPadOS so that it can use established and
 12 predictable mechanisms to review apps for a variety of purposes, including protecting user security
 13 and privacy and deterring fraud and scams. Apple lacks similar capabilities with respect to
 14 transactions on the open Internet, as the Court has already recognized. Perry Decl. Ex. 5, at 108–
 15 09. Accordingly, the requirements of the Link Entitlement help to inform users of the benefits
 16 they may be losing and the risks they are assuming when they leave the Apple ecosystem, while
 17 still allowing developers to communicate with users regarding purchase alternatives. Fischer Decl.
 18 ¶ 22.

19 These requirements include:

20 **3.1** Your StoreKit External Purchase Link App (US) must continue to offer in-app
 21 purchases in accordance with the Developer Agreement and the App Store Review Guidelines.
 22 Your StoreKit External Purchase Link App (US), including any link You provide under this
 Addendum, may not discourage end users from making in-app purchases.

23 This requirement ensures that IAP remains available for in-app transactions in digital goods
 24 and services. Fischer Decl. ¶ 24. As noted above, this Court has already ruled that Apple may
 25 continue to require developers to offer IAP for in-app transactions in digital goods and services.
 26
 27
 28

1 **3.2** Prior to each instance of linking from Your StoreKit External Purchase Link App (US)
2 to an external website for purchases, You must:

- 3 • Call the canMakePayments API and determine that the end user may authorize
4 payments; and
- 5 • Call the StoreKit External Purchase Link API and determine that the end user is a
6 user of the United States App Store, and if so, surface to the end user the associated
7 system disclosure.

8 These requirements help ensure that users are adequately informed about alternative
9 purchasing options. The system disclosure sheet explains (1) that the user is leaving the app and
10 going to the open Internet to make purchases through a mechanism other than IAP, and (2) that
11 certain App Store protections and features will not be available. *See* Fischer Decl. ¶¶ 26–27.
12 Apple requires that users tap a button that says “Continue” before being redirected to the
13 developer’s website. *See* Fischer Decl. ¶ 26. Apple has already implemented a similar
14 requirement for reader apps. *See* Perry Decl. Ex. 16 (Reader Apps Addendum) § 3.3. Apple is
15 implementing this requirement because users should, in the first instance, understand that they are
16 tapping a link that will take them outside of the Apple ecosystem and that they are assuming risks
17 by doing so. *See* Fischer Decl. ¶ 26. The requirement is thus consistent with the underlying
18 purpose of the Injunction—that users be apprised of their choices. Perry Decl. Ex. 5, at 179; *see*
19 *also id.* Ex. 9, at 85 (Injunction helps consumers “becom[e] would-be . . . consumers” of other
20 platforms). Additionally, the system disclosure sheet advises users that certain App Store-specific
21 features will not be available if they proceed, such as the ability of Apple to provide subscription
22 management or process refund requests for digital goods and services. *See* Fischer Decl. ¶¶ 26–
23 27.
24
25
26
27
28

Apple is concerned that some developers may provide information within their apps that does not accurately reflect what users can receive or are charged on a website. Apple will have less ability to prevent or address fraudulent or misleading statements made by developers in connection with linked transactions than it does (and its users are used to) with IAP. Accordingly, the system disclosure sheet may require adjustment to protect the user experience and mitigate any confusion.

3.3 The link You provide in Your StoreKit External Purchase Link App (US) under this Addendum must:

- Go directly to Your website without any redirect or intermediate links or landing page;
- Open a new window in the default browser on the device, and may not open a web view;

- Not pass additional parameters in the URL, to protect the end user (for example, their privacy);
- Be statically-defined in the <<SKExternalPurchaseLink>> in Your app’s info.plist before submission to the App Store;
- Be submitted with Your StoreKit External Purchase Link App (US) to the App Store, and shall be resubmitted if the URL changes;
- Be accompanied by language and a button adhering to the requirements provided in the Apple Materials;
- Not mimic Apple’s in-app purchase system, nor discourage end users from using it;
- Be displayed in Your StoreKit External Purchase Link App (US) on no more than one app page the end user navigates to (not an interstitial, modal, or pop-up), in a single, dedicated location on such page, and may not persist beyond that page;
- Not be displayed on any page that is part of an in-app flow to merchandise or initiate a purchase using in-app purchase; and
- Comply with any additional requirements provided in the Apple Materials.

These requirements are designed to minimize fraud, scams, and confusion. Developers must take responsibility for the linked website, send users only to that website, and inform Apple of that website so that Apple can review the app (including the destination of the proposed External Purchase Link). Fischer Decl. ¶ 28.

These requirements give developers a meaningful opportunity to “entice users to other platforms” (Perry Decl. Ex. 5, at 93), while also enabling users to make an informed choice between “the convenience of IAP” and out-of-app payment systems (Perry Decl. Ex. 7, at 4).⁶ The requirements regarding placement of the External Purchase Links serve multiple purposes, including preventing users from being overloaded with duplicative information that might interrupt their app experience, ensuring a consistent user experience, minimizing confusion between options, and reducing the risk of users inadvertently leaving the app. *See* Fischer Decl. ¶ 28; *see also* Perry Decl. Ex. 5, at 164 (describing Injunction’s purpose of facilitating the flow of

⁶ Because the Court upheld Apple’s IAP requirement and the Ninth Circuit affirmed (Perry Decl. Ex. 5, at 150; Perry Decl. Ex. 9), the Guidelines will still require that developers use IAP as the exclusive purchasing mechanism for in-app purchases.

1 information). They also prevent developers from free-riding on Apple’s reputation for creating a
2 “seamless” purchasing mechanism and protect Apple’s right to require IAP for all in-app
3 purchases, which the Court did not enjoin. Fischer Decl. ¶ 28; Perry Decl. Ex. 7, at 4; *see also*
4 Perry Decl. Ex. 5, at 66 (“Creating a seamless system to manage all its e-commerce was not an
5 insignificant feat. Further, expanding it to address the scale of the growth required a substantial
6 investment.”).

7 The “Apple Materials” referred to in Section 3.3 include several templates that Apple is
8 providing to developers to include as part of their External Purchase Links. Fischer Decl. ¶ 29.
9 These templates allow developers to advertise prices to users, but use curated language to avoid
10 misleading or confusing offers. *Id.* ¶ 30. For example, developers may insert language stating:
11 “To get [X]% off, go to [link to developer’s website],” or “Lower price offered at [link to
12 developer’s website].” *Id.* ¶ 29. Users will therefore be able to price-compare across platforms,
13 consistent with the Injunction’s purpose. *See* Perry Decl. Ex. 5, at 164 (noting “the benefit of price
14 advertising” and the desirability of “cross-platform information” in technology markets). These
15 templates also make it more efficient for Apple to review developers’ apps for compliance with
16 Link Entitlement requirements and App Review Guidelines, while still preserving developers’
17 ability to convey information to their users. *See* Perry Decl. Ex. 7, at 4 (“Links can be tested by
18 App Review”); Perry Decl. Ex. 5, at 179 (Injunction should “increase competition, increase
19 transparency, [and] increase consumer choice and information while preserving Apple’s iOS
20 ecosystem which has procompetitive justifications”).

21 These templates do not allow developers to make subjective claims within the app about
22 competing purchasing mechanisms. Fischer Decl. ¶ 30. Developers will still be able to
23 communicate information to users, in-app, such that users can make informed decisions whether
24 to leave the app for other options. *See* Perry Decl. Ex. 5, at 165 (noting that the main objection to
25 the prior anti-steering provisions was that they prohibited developers from “letting users know that
26 [other payment] options exist”). And importantly, as described below, Apple places no limitations
27 on developers’ *out-of-app* communications with users. Fischer Decl. ¶ 30.

1 **3.5** You may not include information about purchasing on Your website or a link to Your
2 website for purchasing on the product page of Your StoreKit External Purchase Link App (US).

3 This requirement limits the External Purchase Link to the app itself rather than the product
4 page in the App Store on which the app appears. Fischer Decl. ¶ 31.

5 **3.6** Digital purchases sold on Your website to end users after link out that are marketed as
6 being for use in an Application must be available for use in that Application.

7 This requirement helps ensure that users are able to use the digital goods and services that
8 they purchase from the developer’s external website within an app. Fischer Decl. ¶ 32.

9 **Commission.** The Court did not enjoin Apple’s core business model of monetizing the App
10 Store by charging a percentage commission rate on sales of digital goods and services facilitated
11 by its platform. Instead, it found that “under all models, Apple would be entitled to a commission
12 or licensing fee, even if IAP was optional.” Perry Decl. Ex. 5, at 67; *see also id.* at 150 (“Even in
13 the absence of IAP, Apple could still charge a commission on developers.”). Accordingly, in view
14 of the substantial value Apple provides to developers, Apple will charge a commission on certain
15 out-of-app purchases of digital goods and services. Fischer Decl. ¶ 33. Epic has already
16 recognized that this approach is consistent with the injunction entered in this case: In a publicly
17 available letter regarding parallel litigation against Google, Epic (represented by the same counsel
18 as in this case) acknowledged that an “injunction such as the one ordered in *Epic v. Apple*” would
19 “not prevent Google from . . . introducing a new fee . . . on linked out-of-app transactions.” Perry
20 Decl. Ex. 21, at 3–4.

21 Apple will apply a 27% commission to transactions for digital goods and services that take
22 place on a developer’s website within seven days after a user taps through an External Purchase
23 Link from the system disclosure sheet to an external website. Fischer Decl. ¶ 33. Developers
24 eligible for and participating in the App Store Small Business Program will be charged a 12%
25 commission on purchases made within seven days after a user taps on an External Purchase Link
26 and continues from the system disclosure sheet to an external website. *Id.* ¶ 34. Auto-renewals in
27
28

1 the second year or later of an auto-renewing subscription that was purchased within seven days
2 after a user taps through an External Purchase Link from the system disclosure sheet will be
3 charged a 12% commission. *Id.* Apple’s commission policies regarding purchases made through
4 External Purchase Links are set forth in the StoreKit External Purchase Link Entitlement
5 Addendum for US Apps. *See* Fischer Decl. Ex. 2.

6 Charging a commission on transactions facilitated by External Purchase Links not only
7 complies with the Injunction’s plain terms (*see* Perry Decl. Ex. 21, at 3–4), but is also consistent
8 with the Court’s rationale for upholding Apple’s other App Store policies. All App Store
9 developers—including those who place buttons or links with calls to action in their apps—benefit
10 from (among other things) Apple’s platform integrity, proprietary tools and technologies protected
11 by intellectual property, developer services and support, services that help developers acquire,
12 retain, and reengage users, marketing and external advertising, and a safe environment for users to
13 download and purchase apps and in-app content. Fischer Decl. ¶ 35. Developers benefit from
14 Apple’s “enormous” investment in “tools and features for iOS” (Perry Decl. Ex. 5, at 113–14),
15 including the “thousands of developer tools, SDKs, and APIs” and Apple’s “constant upgrading
16 of . . . cellphones to allow for more sophisticated apps.” (*id.* at 67; *see id.* at 150 (“Apple is entitled
17 to some compensation for use of its intellectual property.”)). Developers also benefit from “access
18 to Apple’s vast consumer base” (Perry Decl. Ex. 9, at 14), as well as “the safe environment created
19 by the App Store,” which encourages users to “download apps freely and without care” (Perry
20 Decl. Ex. 5, at 111; *see also id.* at 145 (“Apple provides a safe and trusted user experience on iOS,
21 which encourages users and developers to transact freely and is mutually beneficial.”); Perry Decl.
22 Ex. 9, at 58 (Apple’s provision of a “safe and trusted user experience . . . “increas[es] the per-user
23 average number of app transactions”)). “[T]he developer’s use of the App Store platform . . . and
24 access to Apple’s user base . . . justifies a commission.” Perry Decl. Ex. 5, at 118; *see also id.* at
25 150 n.617 (developers should not be allowed to “avoid the commission while benefitting from
26 Apple’s innovation and intellectual property free of charge”).

27 Apple is limiting the commission to those transactions taking place on the developer’s
28

1 website within seven days after a user taps on an External Purchase Link and continues from the
2 system disclosure sheet to an external website, consistent with how other platforms address similar
3 kinds of transactions. Fischer Decl. ¶ 36. Undoubtedly, this window will not capture all
4 transactions that Apple has facilitated through the App Store, but it balances (1) Apple’s
5 entitlement to a commission for purchases facilitated through the App Store, even if the user waits
6 a small amount of time after leaving the App Store to actually finalize the purchase, with (2) the
7 fact that the longer the time between the link out and the purchase, the more attenuated the
8 connection between the purchase and Apple’s facilitation of the purchase. Through out-of-app
9 communications (*see infra*), developers can encourage users to go directly to the website, without
10 the use of an External Purchase Link and without incurring a commission. At all times, users
11 remain free to select whichever purchasing method they prefer.

12 To help ensure collection of Apple’s commission, developers are required to provide a
13 periodic accounting of qualifying out-of-app purchases, and Apple has a right to audit developers’
14 accounting to ensure compliance with their commission obligations and to charge interest and
15 offset payments. Fischer Decl. Ex. 2 § 7. As both this Court and the Ninth Circuit recognized,
16 collecting a commission in this way will impose additional costs on Apple and the developers. *See*
17 Perry Decl. Ex. 5, at 150 n. 617 (contractual auditing “would seemingly impose both increased
18 monetary and time costs to both Apple and the developers”); Perry Decl. Ex. 9, at 64. It also
19 carries considerable risk to Apple: Although developers are contractually obligated to pay the
20 commission, as a practical matter, with hundreds of thousands of developers with apps on the U.S.
21 storefronts for the iOS and iPadOS App Stores, collection and enforcement will be exceedingly
22 difficult and, in many cases, impossible.

23 ***Non-Compliance.*** Apple may terminate the Link Entitlement of any developer who
24 violates the terms of the StoreKit External Purchase Link Entitlement Addendum for US Apps,
25 and may, in its discretion, remove the offending app, terminate the developer’s account with
26 Apple, or take any other appropriate action to stop the violation of the App Store rules. *See* Fischer
27 Decl. ¶¶ 38–39. In Apple’s view, these measures are necessary to enforce the above guardrails
28

1 and protect users. *Id.* Apple will be monitoring the use of External Purchase Links and may
2 modify the requirements for the Link Entitlement if issues arise that are not adequately addressed
3 in the current requirements. *Id.* ¶ 37.

4 **II. APPLE ALSO PERMITS DEVELOPERS TO COMMUNICATE OUTSIDE THE**
5 **APP REGARDING ALTERNATIVE PURCHASING MECHANISMS**

6 Paragraph 1(ii) of the Injunction enjoins Apple from prohibiting developers from
7 communicating with customers using contact information obtained within the app. Apple came
8 into compliance with this provision as part of the *Cameron* settlement, which has already been
9 approved by this Court. *See* Perry Decl. Ex. 14. Guideline 3.1.3 now provides, in relevant part:

10 Developers can send communications outside of the app to their user base about purchasing
11 methods other than in app purchase

12 Fischer Decl. ¶ 40. Separately, Guideline 5.1.1(x) provides:

13 Apps may request basic contact information (such as name and email address) so long as the
14 request is optional for the user, features and services are not conditional on providing the
15 information, and it complies with all other provisions of these guidelines, including imitations
on collecting information from kids.

16 *Id.* ¶ 42. Accordingly, Apple does not limit developers' ability to send out-of-app communications
17 to users regarding alternative purchasing methods. *Id.* ¶ 41. These Guidelines comply with the
18 plain terms of the Injunction because developers now can “[c]ommunicat[e] with customers
19 through points of contact obtained voluntarily from customers through account registration within
20 the app.” Perry Decl. Ex. 6 ¶ 2.

CONCLUSION

For the foregoing reasons, Apple has timely complied with the Court's Injunction.

Dated: January 16, 2024

Respectfully submitted,

WEIL, GOTSHAL & MANGES LLP

By: /s/ Mark A. Perry
