I. INTRODUCTION ..... 1

II. SUMMARY OF RELEVANT FACTUAL ALLEGATIONS ..... 2

III. THE COMPLAINT PLEADS FACTS SUFFICIENT TO STATE A CLAIM FOR VIOLATION OF THE CARTWRIGHT ACT ..... 5

    A. The Complaint Affirmatively Pleads That Amazon Enters Into Unlawful Agreements with Third-Party Sellers and Wholesale Suppliers ..... 5

        1. Third-Party Sellers Expressly Agree to Price Parity ..... 6

        2. Amazon Coerces Third-Party Sellers to Comply with De Facto Price Parity Agreements ..... 8

    B. The Facts Pleaded Constitute a *Per Se* Violation of the Cartwright Act ..... 10

        1. Amazon’s Agreements with Third-Party Sellers and Wholesale Suppliers Are *Per Se* Unlawful Price-Tampering Agreements ..... 11

        2. Amazon’s Agreements with Third-Party Sellers and Wholesale Suppliers Are *Per Se* Unlawful Horizontal Restraints ..... 13

    C. Amazon’s Agreements with Third-Party Sellers and Wholesale Suppliers Violate the Cartwright Act Even If the *Per Se* Rule Does Not Apply ..... 18

IV. THE COMPLAINT ALLEGES A VIABLE CLAIM UNDER CALIFORNIA’S UNFAIR COMPETITION LAW ..... 22

    A. The Complaint Alleges a Valid “Unlawful” Prong Claim ..... 23

    B. The Complaint Alleges a Valid “Unfair” Prong Claim ..... 23

        1. The People’s “Unfair” Prong Claim Is Not Dependent on Violation of the Cartwright Act ..... 24

        2. The Facts Alleged Establish an “Unfair” Prong Claim Under Any of the Three Tests Recognized by the California Supreme Court ..... 26

            a. Amazon’s Alleged Conduct Is “Unfair” under the Balancing Test ..... 27

            b. Amazon’s Alleged Conduct Is “Unfair” Under the *Cel-Tech* Tethering Test ..... 28

            c. Amazon’s Alleged Conduct is “Unfair” under the FTC Act Test ..... 29

V. CONCLUSION ..... 30

1 **I. INTRODUCTION**

2 Amazon’s demurrer ignores and mischaracterizes the facts pleaded in the People’s  
3 Complaint, and attempts to introduce new facts, all in an effort to recast the People’s claims  
4 beyond recognition. Indeed, the opening paragraph of Amazon’s demurrer reads more like a  
5 motion for summary judgment, purporting to introduce unsupported facts about customer  
6 shopping habits, Amazon’s investments, and claimed procompetitive effects absent from, and  
7 contrary to, the facts pleaded throughout the Complaint. Reading the Complaint as a whole, and  
8 accepting all facts pleaded as true, together with all inferences that can be derived from those  
9 facts, the People have stated viable claims for violation of the Cartwright Act and the California  
10 Unfair Competition Law (“UCL”).

11 Contrary to Amazon’s mischaracterizations, the Cartwright Act claim is not premised on  
12 unilateral conduct; it is well-grounded on specific factual allegations detailing the express  
13 agreements Amazon requires third-party sellers and wholesale suppliers to enter. These  
14 agreements have both the purpose and effect of interfering with free-market price competition.  
15 Further, the Complaint pleads facts demonstrating that these unlawful agreements directly  
16 interfere with price competition, giving rise to a *per se* violation of the Cartwright Act under the  
17 controlling California Supreme Court decisions in *Oakland-Alameda County Builders’ Exchange*  
18 *v. F.P. Lathrop Construction Co.* (1971) 4 Cal.3d 354, 363 (*Lathrop*) and *Mailand v. Burckle*  
19 (1978) 20 Cal.3d 367, 377 (*Mailand*), precedent that Amazon fails to cite or even acknowledge in  
20 the demurrer. Moreover, even in the absence of a *per se* violation, the facts pleaded demonstrate  
21 that Amazon’s unlawful agreements have a substantially anticompetitive effect, creating a price  
22 floor that insulates Amazon from price competition. Amazon is thus able to extract higher overall  
23 fees and greater margins than in a competitive market free of unlawful restraints, and these higher  
24 fees and margins are passed along to consumers resulting in higher prices on and off Amazon.  
25 These facts, together with the direct evidence that third-party sellers and wholesale suppliers do  
26 raise prices and withhold product selection to comply with Amazon’s unlawful agreements, are  
27 more than sufficient to state a Cartwright Act claim under any analysis along the “sliding scale”  
28 continuum outlined by the California Supreme Court in *In re Cipro Cases I & II* (2015) 61

1 Cal.4th 116, 147 (*In re Cipro*). For all these same reasons, the Complaint also states a valid claim  
2 under the UCL “unlawful” prong.

3 Separately, even in the absence of a Cartwright Act violation, the Complaint alleges facts  
4 sufficient to state a claim for violation of the UCL “unfair” prong. As an initial matter, Amazon’s  
5 perfunctory argument fails to address two of the three separate tests that California courts apply to  
6 analyze “unfair” prong claims as recognized by the California Supreme Court. Under each of  
7 these tests, the Complaint states a viable UCL claim. Cobbling together snippets from inapt  
8 opinions, taken out of context, Amazon argues “that if a plaintiff fails to state a claim for a  
9 Cartwright Act violation, a UCL claim for ‘unfair’ competition based on the same alleged  
10 misconduct will necessarily fail as well.” (Demurrer at p. 20:10-12.) Not only does this argument  
11 inappropriately collapse the UCL “unlawful” and “unfair” prongs, but it contravenes the  
12 controlling California Supreme Court decision in *Cel-Tech Communications, Inc. v. Los Angeles*  
13 *Cellular Telephone Co.* (1999) 20 Cal.4th 163 (*Cel-Tech*), which permitted an “unfair” prong  
14 claim to proceed after dismissal of a Cartwright Act claim based on the same facts. (*Id.* at p. 188  
15 [“the trial court erred in concluding that the unfair competition law cause of action necessarily  
16 failed when the other causes of action failed”].)

17 For all these reasons, as detailed herein, Amazon’s demurrer should be overruled.

## 18 **II. SUMMARY OF RELEVANT FACTUAL ALLEGATIONS**

19 Amazon is the dominant online retail store in the United States, capturing roughly 50% of  
20 relevant online retail sales and 60% of sales among its critical competitors. (Cmpl. ¶¶ 103-104.)  
21 Amazon’s dominant position gives it substantial market power over both merchants (third-party  
22 sellers and wholesale suppliers) and consumers. (*Id.* ¶¶ 35-82, 103-111.) For hundreds of  
23 thousands of merchants, Amazon is a critical distribution outlet, representing 20-30% or more of  
24 the merchant’s total sales, and the access point to 160 million coveted Prime customers. (*Id.*  
25 ¶¶ 38-44.) Amazon has used this market dominance to require merchants to enter into agreements  
26 that prevent them from offering consumers lower prices on competing online sites, even where  
27 the costs of selling on those competing sites may be significantly lower. (*Id.* ¶¶ 1-12, 82, 206-  
28 210.) At the same time, while Amazon’s agreements insulate it from price competition, Amazon

1 has dramatically increased the costs for merchants selling on Amazon, which it knows are passed  
2 on to Amazon’s customers in the form of higher prices. (*Id.* ¶¶ 7-11, 45-64, 113, 175, 206-209.)

3         ***Retail price parity.*** From 2012 to the present, Amazon’s Business Solutions Agreement  
4 (“BSA”) has expressly required every third-party seller to agree that they will not offer products  
5 they sell on Amazon for a lower price on any off-Amazon retail website. (*Id.* ¶¶ 4-5, 112-129.)  
6 From 2012 through March 2019, this requirement was encapsulated in a section of the BSA titled  
7 “Price Parity Provision.” (*Id.* ¶¶ 4, 113-114, 125.) Third-party “sellers understood this policy as a  
8 prohibition on listing products off Amazon for a lower price than the price posted on Amazon,  
9 and sellers refrained from selling their products for less off Amazon because they had agreed not  
10 to do so in their BSA with Amazon.” (*Id.* ¶ 114.) After drawing scrutiny from various regulators,  
11 Amazon removed the Price Parity Provision language from the BSA in March 2019; nevertheless,  
12 other provisions of the BSA, including Amazon policies that are expressly incorporated into the  
13 BSA, continue to prohibit third-party sellers from offering lower prices off Amazon through  
14 today. (*Id.* ¶¶ 5, 115-129.) As Amazon explained at the time, with “the recent removal of the price  
15 parity clause in our BSA...our expectations and policies ***have not changed.***” (*Id.* ¶ 125, emphasis  
16 added.)

17         Amazon affirmatively counsels third-party sellers to comply with the price parity  
18 requirement by imposing higher prices or enforcing minimum resale/advertised prices on  
19 competing websites, by charging higher prices on their own direct-to-consumer (DTC) websites  
20 and competing online marketplaces, and by withholding selection from competing online stores  
21 and their own DTC sites; conduct Amazon euphemistically refers to as “channel management.”  
22 (*Id.* ¶ 7; see also *id.* ¶¶ 157-158, 161-163, 168, 174.) Amazon also engages in various coercive  
23 measures to force compliance from third-party sellers, imposing increasingly severe penalties—  
24 which it terms “escalating disincentives”—when it finds lower prices off Amazon. (*Id.* ¶¶ 5, 145-  
25 155.) Amazon’s own internal documents confirm that third-party sellers generally do not lower  
26 prices on Amazon to comply with the price parity requirement. (*Id.* ¶¶ 12, 156.) Instead, as a  
27 direct result of Amazon’s price parity agreements, and its efforts to coerce enforcement of price  
28

1 parity, third-party sellers maintain higher prices on their own websites, maintain higher prices on  
2 other marketplaces, and set higher price floors for resale. (*Id.* ¶¶ 7, 150, 205-206.)

3       **Wholesale price parity.** Amazon employs similarly anticompetitive agreements with  
4 wholesale suppliers covering billions of dollars in sales every year. (Cmpl. ¶¶ 6, 175-179; see also  
5 *id.* ¶ 203.) These agreements further insulate Amazon from price competition by punishing  
6 suppliers who allow their products to be priced lower off Amazon. (*Id.* ¶¶ 175-182.) Unlike a  
7 “most-favored-nation” clause, these agreements do not guarantee Amazon the lowest wholesale  
8 cost. Rather, Amazon’s Guaranteed Minimum Margin (“GMM”) agreements require wholesale  
9 suppliers to guarantee the minimum profit margin Amazon will make when it sells the product.  
10 (*Id.* ¶¶ 6, 175-177.) Amazon’s wholesale suppliers guarantee Amazon’s margin, even though they  
11 know Amazon follows a strict “tit-for-tat” pricing strategy whereby Amazon will always lower its  
12 price to match a lower price it finds virtually anywhere else online. (*Id.* ¶ 33, 175, 178, 180, 189-  
13 198.) Under these GMM’s, if Amazon finds a lower retail price off Amazon, Amazon  
14 automatically lowers its retail price to match; if Amazon’s profit margin falls below the  
15 guaranteed minimum margin, the wholesale supplier is required to pay Amazon a penalty  
16 “true-up” payment. (*Id.* ¶¶ 175-177.) Amazon also enters into profitability agreements that  
17 function as “informal or de facto” GMM’s, requiring Amazon suppliers to make Matching  
18 Compensation Program (“MCP”) payments when Amazon fails to meet “profitability targets” as  
19 a result of matching a lower price off Amazon. (*Id.* ¶ 178-183; see *id.* ¶ 189 [each year, a  
20 wholesale supplier “enters into agreements with Amazon that ‘set out [the supplier’s] suggested  
21 retail price for each product, along with an Amazon margin associated with that price’”].) The  
22 Complaint refers to Amazon’s GMM and de facto GMM/MCP agreements as “minimum margin  
23 agreements” (hereafter MMA’s). (See *id.* ¶¶ 6, 175-178.) To comply with these MMA’s, and  
24 avoid true-up/MCP payments, Amazon encourages suppliers to, and suppliers do in fact, engage  
25 in “channel management,” withholding product from competing retailers or enforcing minimum  
26 resale/advertised price policies. (*Id.* ¶¶ 7, 176, 184, 195-198.)

27       **Harm to competition.** Amazon’s retail and wholesale price parity agreements cause  
28 third-party sellers and wholesale suppliers to charge higher prices on their own DTC websites and

1 other online marketplaces than they would otherwise charge on these less expensive distribution  
2 channels, to adopt and enforce minimum advertised/resale price policies against competing online  
3 retailers, and to raise their prices to, and withhold products from, competing online retailers so  
4 that those Amazon competitors cannot offer the same products for less than the Amazon price.  
5 (Cmpl. ¶¶ 2, 7, 8, 12, 114-115, 140, 150, 152-154, 156-158, 160, 164-169, 171-173, 177, 184,  
6 187-194, 197-198, 202, 205, 207-210.) While Amazon attempts to characterize the effects as  
7 *de minimis*, the facts pleaded establish that the agreements at issue cover the majority of all sales  
8 on Amazon impacting tens of billions of dollars in sales in California alone. (*Id.* ¶¶ 7, 23-24, 175,  
9 178-179, 203, 213.) Further, by enlisting its merchants to abstain from and prevent online  
10 discounting off Amazon, Amazon interferes with the ability of its rivals to compete for customers  
11 by offering lower prices. (*Id.* ¶¶ 82, 202, 206-210.) Insulated from free-market price competition,  
12 Amazon can and does charge substantially higher seller fees and demand larger profit margins,  
13 which it knows are passed along to consumers through higher prices on Amazon, and which  
14 translates into higher prices off Amazon as a result of its price parity agreements. (*Id.* ¶¶ 11, 55-  
15 62, 206-210.)

### 16 **III. THE COMPLAINT PLEADS FACTS SUFFICIENT TO STATE A CLAIM FOR** 17 **VIOLATION OF THE CARTWRIGHT ACT**

#### 18 **A. The Complaint Affirmatively Pleads That Amazon Enters into Unlawful** 19 **Agreements with Third-Party Sellers and Wholesale Suppliers**

20 The Cartwright Act “generally outlaws any combinations or agreements which restrain  
21 trade or competition or which fix or control prices.” (*In re Cipro, supra*, 61 Cal.4th at p. 136,  
22 quoting *Pac. Gas & Elec. Co. v. County of Stanislaus* (1997) 16 Cal.4th 1143, 1147.)<sup>1</sup> As detailed  
23 above, Amazon enters into express agreements with every third-party seller, and generally with  
24 wholesale suppliers, with the purpose and effect of protecting Amazon from price competition.  
25 (Cmpl. ¶¶ 1-6, 113, 175-179, 205-206, 208-211.) Further the Complaint alleges that while

26 <sup>1</sup> Amazon suggests in a footnote that the Cartwright Act has a “relatively narrower scope” than  
27 the federal Sherman Act. (Demurrer at p. 9:26-28, fn. 5.) But the California Supreme Court  
28 expressly recognized the opposite in the *In re Cipro* decision cited extensively by Amazon:  
“[T]he Cartwright Act is broader in range and deeper in reach than the Sherman Act. [citation]”  
(*In re Cipro, supra*, 61 Cal.4th at pp. 160-161.)

1 Amazon altered the explicit language of its agreements with third-party sellers in 2019, those  
2 agreements continue to expressly prohibit third-party sellers from offering or allowing lower  
3 online prices off Amazon through today. (*Id.* ¶¶ 4-5, 113-130, 157-158, 161-162.) Amazon’s  
4 demurrer ignores these allegations, attempting to improperly dissect the Complaint, then  
5 recharacterize select allegations as targeting only unilateral conduct. In fact, the Complaint targets  
6 Amazon’s unlawful agreements with third-party sellers and wholesale suppliers together with  
7 Amazon’s conduct to coerce compliance with and otherwise enforce those agreements.

### 8 **1. Third-Party Sellers Expressly Agree to Price Parity**

9 Amazon’s unilateral conduct argument ignores the factual allegations establishing that the  
10 BSA has expressly required all third-party sellers to agree to maintain price parity continuously  
11 from 2012 to the present. (Cmpl. ¶¶ 4-5, 113-130.) Although Amazon deleted certain price parity  
12 language from the BSA in March 2019, as alleged in the Complaint, the BSA nonetheless  
13 continues to expressly require third-party sellers to agree to price parity—prohibiting sellers from  
14 offering or allowing lower online prices anywhere off Amazon—through incorporation of the  
15 Amazon Standards for Brands (“ASB”), the Marketplace Fair Pricing Policy, and the Seller Code  
16 of Conduct. (*Id.* ¶¶ 115-125.) For example, the ASB requires third-party sellers to maintain “price  
17 competitiveness,” which is defined as price parity (prohibiting lower online prices off Amazon).  
18 (*Id.* ¶¶ 116-117; see also *id.* ¶¶ 145-147.) Similarly, the Fair Pricing Policy prohibits pricing that  
19 harms customer trust, which includes offering lower online prices off Amazon. (*Id.* ¶¶ 118-120;  
20 see also *id.* ¶ 162.) Likewise, the Seller Code of Conduct requires third-party sellers to  
21 “act fairly,” which again prohibits third-party sellers from offering lower online prices off  
22 Amazon. (*Id.* ¶¶ 121-122.) Amazon’s demurrer ignores these factual allegations.

23 Further, as alleged in the Complaint, Amazon’s documents confirm that the March 2019  
24 change to the BSA did not in fact alter the requirements imposed on third-party sellers, and  
25 Amazon continued to tell third-party sellers they had to maintain price parity. (Cmpl. ¶¶ 4-5,  
26 125-130, 142, 157-158, 162, 172.) Moreover, while the demurrer quotes from the Complaint to  
27 suggest that Amazon ““worked on background with reporters’ to publicize the change,”  
28 (Demurrer at p. 6:6-7), the Complaint actually pleads the opposite: “Amazon worked with

1 reporters on background at the time it retired the Price Parity Provision from the BSA to make  
2 clear that [its] expectations and policies *have not changed*.” (Cmpl. ¶ 128, emphasis added.)<sup>2</sup> As  
3 alleged in the Complaint, third-party sellers share this same, correct understanding that the BSA  
4 continues to require price parity, prohibiting lower online prices off Amazon. (*Id.* ¶¶ 4-5, 120,  
5 122, 125-126, 129, 140-143.)

6 The express agreements alleged in the Complaint are more than sufficient to establish a  
7 combination or agreement under the Cartwright Act. (See, e.g., *In re Cipro, supra*, 61 Cal.4th at  
8 pp. 132-133, 151 [evaluating express agreement].) Amazon’s lengthy discussion of the decisions  
9 in *State ex rel. Van de Kamp v. Texaco, Inc.* (1988) 46 Cal.3d 1147 (*Texaco*) and *Freeman v.*  
10 *San Diego Association of Realtors* (1999) 77 Cal.App.4th 171 (*Freeman*) do nothing to  
11 undermine the People’s claim that the express agreements pleaded in the Complaint violate the  
12 Cartwright Act. (Demurrer at pp. 9:1-10:7.) *Texaco* held only that a merger cannot give rise to a  
13 Cartwright Act claim because the parties to the merger cease to exist as separate, independent  
14 entities. (*Texaco*, at p. 1163.) Of course, that is not the case here. Likewise, in *Freeman*, the  
15 Cartwright Act claim failed because the alleged concerted action depended on ignoring the  
16 separate corporate form of the challenged listing service. (*Freeman*, at pp. 192-193.) The People’s  
17 claim here does not turn on ignoring Amazon’s corporate form or that of its third-party sellers or  
18 wholesale suppliers. There is no question that Amazon and its third-party sellers and wholesale  
19 suppliers are separate entities. Finally, the decision in *Chavez v. Whirlpool Corp.* (2001)  
20 93 Cal.App.4th 363 (*Chavez*) does not help Amazon. First, *Chavez* did not involve express  
21 agreements like those alleged here. (*Id.* at p. 367.) Further, as set forth below (see Section  
22 III.A.2., *infra*), *Chavez* affirmatively recognized that an unlawful combination could arise under  
23 the Cartwright Act where the defendant seeks acquiescence to its policies through coercion. Such  
24 is the case here.

25  
26 \_\_\_\_\_  
27 <sup>2</sup> Notably, Amazon’s request for judicial notice only further supports the People’s allegations.  
28 As reported, Amazon refused to make any public comment confirming that the BSA no longer  
required third-party sellers to maintain price parity. This is consistent with the factual allegations  
in the Complaint that Amazon did not go on the record because it had competing strategic  
interests; namely, Amazon’s agreements continued to require price parity. (Cmpl. ¶¶ 128-129.)

1                   **2. Amazon Coerces Third-Party Sellers to Comply with De Facto Price**  
2                   **Parity Agreements**

3                   The Complaint separately alleges facts from which price parity agreements between  
4 Amazon and its third-party sellers can be inferred or implied—referred to in the Complaint as  
5 de facto agreements—even if the express agreements on their own were ultimately found  
6 insufficient. (Cmpl. ¶¶ 5, 127, 129.) While the Cartwright Act does not extend to unilateral  
7 conduct, it is well settled that use of “coercive tactics to impose restraints on otherwise  
8 uncooperative businesses” is sufficient to satisfy the combination or agreement element of a  
9 Cartwright Act claim. (*G.H.I.I. v. MTS, Inc.* (1983) 147 Cal.App.3d 256, 268 (*G.H.I.I.*); accord  
10 *Kolling v. Dow Jones & Co.* (1982) 137 Cal.App.3d 709, 720 (*Kolling*) [“[T]he ‘conspiracy’ or  
11 ‘combination’ necessary to support an antitrust action can be found where a supplier or producer,  
12 by coercive conduct, imposes restraints to which distributors involuntarily adhere.”].) An illegal  
13 combination exists where the defendant “secures compliance with announced policies in restraint  
14 of trade by means which go beyond mere announcement of policy and the refusal to deal,” where  
15 “for example, the [defendant] takes ‘affirmative action’ to bring about the involuntary  
16 acquiescence” with its policies. (*Kolling*, at p. 721; see also *Chavez, supra*, 93 Cal.App.4th at  
17 p. 372 [unlawful combination may arise where defendant goes beyond mere refusal to deal but  
18 compels compliance through coercion]; *R.E. Spriggs Co. v. Adolph Coors Co.* (1979) 94  
19 Cal.App.3d 419, 425-426 (*Spriggs*) [unlawful combination arises under the Cartwright Act where  
20 alleged conduct goes beyond announcement of policy and refusal to deal].) In *Spriggs*, the Court  
21 found sufficient evidence to support an agreement or combination in violation of the Cartwright  
22 Act where “[defendant’s] ideas about proper prices at the wholesale and retail level may only  
23 have been couched in terms of suggestions, but having in mind [defendant’s] relative economic  
24 clout, particularly its power to cancel valuable distributor franchises almost at will, it seems clear  
25 that there is evidence that [defendant] engaged in price maintenance through suggestions which  
26 the distributors could not refuse.” (*Spriggs*, at pp. 425.)

27                   As alleged in the Complaint, Amazon not only affirmatively seeks and obtains agreement  
28 from third-party sellers that they will comply with its policies through explicit terms in the BSA

1 (Cmpl. ¶¶ 113-124), it uses its “relative economic clout” to force their acquiescence and  
2 compliance. (*Id.* ¶¶ 31, 38-44, 65-69, 127, 135, 145-150, 152-155.) Further, if Amazon finds  
3 lower online prices off Amazon, it punishes third-party sellers through a series of increasing  
4 penalties (referred to as “escalating disincentives”) in an effort to coerce price parity. (*Id.* ¶¶ 31,  
5 127, 135, 140, 145-150.) These penalties include removing the “Buy Box” on the product detail  
6 page (the box containing the button customers click to add the product to their cart)—causing  
7 sales to plummet—as well as demoting sellers’ product offers in search results and prohibiting  
8 them from operating as third-party sellers. (*Id.* ¶¶ 30-31, 132-48.) Contrary to Amazon’s assertion  
9 that price parity was “rarely enforced” (Demurrer at pp. 2:25-26, 15:15-17), the Complaint  
10 alleges that since as early as 2016 and 2017—well before Amazon removed the Price Parity  
11 Provision language—Amazon has used Buy Box suppression and the ASB policy to force  
12 compliance with price parity when it identified lower online prices off Amazon. (*Id.* ¶¶ 135, 145;  
13 see also *id.* ¶ 149.) Amazon’s escalating disincentives to coerce compliance with price parity have  
14 real teeth, because Amazon is an indispensable distribution channel for third-party sellers. (*Id.*  
15 ¶¶ 10, 31, 38-44, 107.)

16 The Complaint further alleges that Amazon “counsels its third-party sellers” to comply  
17 with price parity by employing what it refers to as “channel management”: “to impose higher  
18 prices or enforce minimum advertised price policies on Amazon’s rivals, to charge higher prices  
19 on their own websites and on competing marketplaces, and to withhold selection from these  
20 competing online stores and their own sites.” (*Id.* ¶ 7; see also *id.* ¶¶ 150, 158, 161-163, 174.)<sup>3</sup> An  
21 Amazon executive confirmed in sworn testimony that sellers interpret Buy Box suppression  
22 notifications as “asking them to adjust their prices externally.” (*Id.* ¶ 133.) Amazon’s assertion in  
23 its demurrer that “[t]here is no allegation that Amazon directly or indirectly asks third-party

24 \_\_\_\_\_  
25 <sup>3</sup> Attempting to sidestep the facts alleged, Amazon references a single statement out of context  
26 to suggest that the Complaint attributes its continuing advice that merchants control their channels  
27 and not to allow discounts off Amazon to ecommerce consultants. (Demurrer at p. 4:21-23.) Not  
28 true. The Complaint alleges that Amazon itself counsels merchants to manage their channels so  
their products are not found for less anywhere off Amazon (See Cmpl. ¶¶ 7, 157-158, 162-163,  
195-198). The allegations regarding ecommerce consultants only buttress that Amazon’s price  
parity requirement is well known and widely followed under coercion. (See, e.g., *id.* ¶¶ 142, 147,  
151, 176.)

1 sellers to increase their prices or reduce product availability in stores other than Amazon” is  
2 simply incorrect. (Demurrer at p. 4:17-18; see also *id.* at p. 12:11-12.) In response to Amazon’s  
3 coercive tactics, third-party sellers raise prices on their own DTC websites and on other  
4 marketplaces, and also raise prices to and withhold products from competing online retailers, all  
5 to prevent lower prices off Amazon. (Cmpl. ¶¶ 150-154, 157-158, 160-169, 171-173.) In other  
6 words, they comply.

7         These facts, alongside sellers’ express acquiescence to price parity in their written  
8 agreements with Amazon, are more than sufficient to satisfy the circumstances under which  
9 Amazon concedes “an unlawful combination *could* hypothetically arise”—“if a manufacturer  
10 communicated and sought a dealer’s agreement of compliance by coercive means.” (Demurrer at  
11 p. 11:5-6, citing *Chavez, supra*, 93 Cal.App.4th at pp. 372-373; accord *G.H.I.I., supra*, 147  
12 Cal.App.3d at p. 268; *Kolling, supra*, 137 Cal.App.3d at p. 720; *Spriggs, supra*, 94 Cal.App.3d at  
13 pp. 425-426.) Indeed, the tactics employed by Amazon to coerce agreement to, and compliance  
14 with, price parity go far beyond the unilateral conduct at issue in *Chavez*, where the defendant  
15 merely announced a minimum resale price policy and refused to deal with distributors who failed  
16 to comply. (*Chavez*, at p. 373.) In sum, the “coercive tactics” Amazon employs “to impose  
17 restraints on otherwise uncooperative businesses” are more than sufficient to establish a de facto  
18 combination or agreement under the Cartwright Act. (See *G.H.I.I.*, at p. 268; *Kolling*, at p. 720.)

19         **B. The Facts Pleaded Constitute a *Per Se* Violation of the Cartwright Act**

20         In its demurrer, Amazon argues that the Court must apply the “rule of reason—and not the  
21 *per se* standard” to evaluate the People’s Cartwright Act claim. (Demurrer at p. 13:6-8.)  
22 Amazon’s argument fails for multiple reasons. First, Amazon presents the issue as a choice  
23 between a *per se* and rule of reason dichotomy. But the California Supreme Court has made clear  
24 that “[t]here is generally no categorical line to be drawn between restraints that give rise to an  
25 intuitively obvious inference of anticompetitive effect and those that call for more detailed  
26 treatment.” (*In re Cipro, supra*, 61 Cal.4th at p. 147 [rejecting “the choice between *per se* and rule  
27 of reason analysis as a necessary threshold inquiry involving rigidly distinct analytic boxes”].)  
28 Indeed, rejecting the dichotomy presented by Amazon, the Court referenced the traditional *per se*

1 analysis, the “quick look” analysis, and the rule of reason analysis as points along a continuum or  
2 “sliding scale” in antitrust analysis. (*Ibid.* [“categories of analysis of anticompetitive effect are  
3 less fixed than the terms like ‘per se,’ ‘quick look,’ and ‘rule of reason’ tend to make them  
4 appear”].) Second, none of the cases cited by Amazon require this Court to determine the  
5 appropriate antitrust analysis to apply at the demurrer stage. Again, the California Supreme  
6 Court’s decision in *In re Cipro* is instructive. In that case, the Court confirmed that determining  
7 the appropriate antitrust analysis in any particular case is not “a necessary threshold inquiry” but  
8 requires “an enquiry meet for the case, looking to the circumstances, details, and logic of a  
9 restraint.” (*Ibid.*) Accordingly, it would be premature to conclude the ultimate analysis to apply  
10 absent a more fully developed factual record. While the Court need not determine now whether  
11 the agreements at issue here warrant *per se* treatment, the People have adequately pleaded a  
12 *per se* violation of the Cartwright Act.

13 **1. Amazon’s Agreements with Third-Party Sellers and Wholesale**  
14 **Suppliers Are *Per Se* Unlawful Price-Tampering Agreements**

15 As alleged in the Complaint, Amazon’s agreements with third-party sellers and wholesale  
16 suppliers interfere with the normal free-market forces by which online retail prices would  
17 otherwise be set. In particular, Amazon’s retail price parity agreements prohibit third-party sellers  
18 from offering or allowing lower online prices off Amazon, even where the costs of selling  
19 through other online channels would support lower prices in a free market. (Cmpl. ¶¶ 1-4, 7, 11-  
20 12, 82, 114-125, 150-154, 206, 205-206, 209.) Likewise, Amazon’s MMA’s force wholesale  
21 suppliers to maintain and enforce higher prices off Amazon to avoid making true-up payments to  
22 Amazon. (*Id.* ¶¶ 1-4, 7, 176-177, 184, 202, 205-206, 208.) In effect, through these agreements,  
23 Amazon requires third-party sellers and wholesale suppliers to agree that the prices offered on  
24 Amazon will constitute a price floor, and products offered anywhere else online will be priced the  
25 same or higher. Under controlling California Supreme Court precedent applying the Cartwright  
26 Act’s express statutory prohibition against combinations which “directly or indirectly unite any  
27 interests” connected with product sales so that “price might in any manner be affected” (Bus. &  
28 Prof. Code 16720(e)(4)), such agreements “fixing or tampering with prices are illegal *per se.*”

1 (*Lathrop, supra*, 4 Cal.3d at p. 363; accord *In re Cipro, supra*, 61 Cal.4th at p. 146, citing  
2 *Lathrop*.) Further, following *Lathrop*, the California Supreme Court has confirmed that such  
3 price-fixing and price-tampering agreements are illegal *per se* whether they are horizontal or  
4 vertical in nature. (*Mailand, supra*, 20 Cal.3d at p. 377; see also *Cellular Plus, Inc. v. Superior*  
5 *Court* (1993) 14 Cal.App.4th 1224, 1244 (*Cellular Plus*) [under *Lathrop* and *Mailand* price fixing  
6 and price tampering are illegal *per se* whether horizontal or vertical]; *Kolling, supra*, 137  
7 Cal.App.3d at p. 721 [same].)

8 Notably, Amazon’s demurrer does not even reference the California Supreme Court  
9 decisions in *Lathrop* and *Mailand*, nor the Cartwright Act’s express prohibition against  
10 agreements which “directly or indirectly unite any interests” such that “price might in any manner  
11 be affected.” (Bus. & Prof. Code 16720(e)(4).) Moreover, while Amazon cites the recent federal  
12 district decision in *Frame-Wilson v. Amazon.com, Inc.* (W.D. Wash. 2022) 591 F.Supp.3d 975  
13 (*Frame-Wilson*) as support for the position that *per se* analysis does not apply to vertical restraints  
14 under the Cartwright Act (Demurrer at p. 13:15-20), the opposite is true. Indeed, *Frame-Wilson*  
15 expressly recognized that while the alleged agreements were not *per se* illegal under federal law,  
16 *per se* analysis was mandated under the Cartwright Act ““whether the price-fixing scheme is  
17 horizontal or vertical; that is, whether the price is fixed among competitors...or businesses at  
18 different economic levels.”” (*Frame-Wilson*, at p. 993, quoting *Mailand, supra*, 20 Cal.3d at  
19 p. 377.)<sup>4</sup>

20 Ignoring the controlling California Supreme Court authority, Amazon’s demurrer cites a  
21 handful of appellate court decisions for the proposition that California courts “have consistently  
22 held that the rule of reason governs vertical restraints of trade.” (Demurrer at p. 13:9-10.)  
23 However, none of these cases involved vertical price-fixing or price-tampering agreements:  
24

25  
26 <sup>4</sup> While the *Frame-Wilson* court did dismiss the parade of various state law claims alleged in  
27 that case without prejudice under the federal pleading standard, it did so only after characterizing  
28 the state law allegations as a “cursory listing” of State statutes. (*Frame-Wilson, supra*, 591  
F.Supp.3d at p. 994 & fn. 3 [reiterating the court’s rejection of Amazon’s argument that *per se*  
treatment was inappropriate under the Cartwright Act].) Of course, the Complaint here goes far  
beyond merely identifying the Cartwright Act or restating the elements of a Cartwright Act claim.

1 *Flagship Theatres* and *Redwood Theatres* both involved vertical “circuit-dealing” agreements<sup>5</sup>  
2 and *Ben-E-Lect* and *Marsh* both involved non-price-related vertical boycotts.<sup>6</sup> Further, none of  
3 these cases suggest that *Lathrop* and *Mailand* are no longer good law, or otherwise indicates that  
4 agreements fixing or tampering with prices (whether horizontal or vertical) are not *per se* illegal  
5 under the Cartwright Act. In sum, applying controlling California Supreme Court precedent, the  
6 People have stated a viable *per se* Cartwright Act claim, and Amazon’s demurrer should be  
7 overruled on this basis alone.

8 **2. Amazon’s Agreements with Third-Party Sellers and Wholesale**  
9 **Suppliers Are *Per Se* Unlawful Horizontal Restraints**

10 Amazon’s argument that the *per se* rule does not apply here is based on its  
11 characterization of the alleged restraints—directly contrary to the facts pleaded in the  
12 Complaint—as purely “vertical,” or “existing between participants at different levels in the chain  
13 of distribution.” (Demurrer at p. 13:9-10.) As detailed above, Amazon’s argument fails under  
14 controlling California Supreme Court precedent holding price-fixing and price-tampering claims  
15 such as those alleged here are *per se* violations whether characterized as horizontal or vertical.  
16 Amazon’s argument separately fails because, as alleged in the Complaint, Amazon’s third-party  
17 sellers and wholesale suppliers, in addition to being direct horizontal competitors with other  
18 merchants, are also direct horizontal competitors with Amazon and other online retail stores.  
19 (Cmpl. ¶¶ 9, 212.) As such, the agreements impose horizontal restraints not to compete on price  
20 and to boycott or otherwise limit horizontal competition—nakedly anticompetitive agreements  
21 “that can be said to always lack redeeming value and thus qualify as *per se* illegal.” (*In re Cipro*,  
22 *supra*, 61 Cal.4th at p. 146.) Moreover, Amazon’s argument that its agreements cannot be *per se*  
23 illegal under the Cartwright Act because federal courts have considered “parity clauses and  
24 margin guarantees” as generally lawful and procompetitive falls far short. (Demurrer at p. 14:23-  
25 24.) This argument not only ignores controlling precedent that price-fixing and price-tampering

26 <sup>5</sup> *Flagship Theatres of Palm Desert, LLC v. Century Theatres, Inc.* (2020) 55 Cal.App.5th 381,  
27 400 (*Flagship Theatres*); *Redwood Theatres v. Festival Enters.* (1988) 200 Cal.App.3d 687, 695  
(*Redwood Theatres*).

28 <sup>6</sup> *Ben-E-Lect v. Anthem Blue Cross Life and Health Ins. Co.* (2020) 51 Cal.App.5th 867, 873;  
*Marsh v. Anesthesia Servs. Med. Group, Inc.* (2011) 200 Cal.App. 480, 494 (*Marsh*).

1 agreements and horizontal price restraints and boycotts are *per se* unlawful but relies on  
2 resolution of underlying factual issues not appropriate at this stage.

3       ***Horizontal Price Restraints.*** As alleged in the Complaint, Amazon’s third-party sellers  
4 and wholesale suppliers are direct horizontal competitors with Amazon. (Cmpl. ¶¶ 9, 212.) For  
5 example, Amazon third-party seller Nutpods—a manufacturer of coffee creamer—operates its  
6 own online DTC store, [www.nutpods.com](http://www.nutpods.com), which competes directly with Amazon for sales to  
7 consumers. (Cmpl. ¶ 141.) Likewise, Amazon wholesale supplier Spalding—a manufacturer of  
8 basketballs—operates its own DTC site, [www.spalding.com](http://www.spalding.com), which competes directly with  
9 Amazon for sales to consumers. (*Id.* ¶ 199.) There are thousands of Amazon third-party sellers  
10 and wholesale suppliers like Nutpods and Spalding that either can or do operate their own DTC  
11 online retail stores in direct competition with Amazon. (*Id.* ¶¶ 9, 24, 69, 87-88, 137, 212.) Indeed,  
12 the relevant market in which Amazon competes expressly includes these third-party sellers’ and  
13 wholesale suppliers’ own DTC websites. (*Id.* ¶ 85.) Moreover, Amazon itself expressly  
14 recognizes that its third-party sellers and wholesale suppliers are its actual and potential  
15 horizontal competitors. (*Id.* ¶¶ 9, 60, 87-88, 119, 137, 212.) The fact that these merchants also  
16 have a vertical relationship with Amazon does not negate this clearly pleaded coexistent  
17 horizontal relationship. Because the relationship has “some horizontal component,” the rule of  
18 reason does not automatically apply, providing a separate rationale for application of the *per se*  
19 rule in this case. (*Flagship Theatres, supra*, 55 Cal.App.5th at p. 407; see also *Bert G. Gianelli*  
20 *Distributing Co. v. Beck & Co.* (1985) 172 Cal.App.3d 1020, 1045-1046 [“per se violations have  
21 been found in several cases involving ostensibly ‘vertical’ restrictions that were determined to be  
22 ‘primarily horizontal in nature,’” especially where “the motivating factor” was to protect the  
23 defendant “from price competition”], disapproved on another ground in *Dore v. Arnold*  
24 *Worldwide, Inc.* (2006) 39 Cal.4th 384, 390-391 & 394, fn. 2.)

25       Because Amazon’s third-party sellers and wholesale suppliers are Amazon’s direct  
26 horizontal competitors, their price parity agreements with Amazon—in which they agree that the  
27 prices in their own online stores will not be lower than the Amazon prices for the same  
28 products—are naked anticompetitive agreements between horizontal competitors on price.

1 (See, e.g., Cmpl. ¶ 160 [seller reporting he “keeps prices on our own website the same as the  
2 prices on Amazon” because of price parity]; *id.* ¶¶ 9, 114-126, 140-143, 150, 152-154, 184, 192,  
3 202, 206, 208-212.) Such “a horizontal combination (an anticompetitive agreement among  
4 competitors who are at the same level of distribution) is ordinarily illegal per se.” (*Marsh, supra*,  
5 200 Cal.App.4th at p. 493; see also *Knevelbaard Dairies v. Kraft Foods, Inc.* (9th Cir. 2000) 232  
6 F.3d 979, 986 [horizontal agreements eliminating a form of competition between rivals, including  
7 horizontal price fixing and other horizontal restrictions on price and output, are *per se* illegal  
8 under the Cartwright Act], *People v. Building Maintenance Contractors’ Ass’n* (1953) 41 Cal.2d  
9 719, 722-723 [holding agreement among contractors not to quote a lower price to a customer than  
10 the price the customer was already paying to a co-conspirator contractor *per se* unlawful].)

11 ***Horizontal Boycott.*** In their price parity agreements with Amazon, merchants agree that  
12 Amazon will not find a lower price not only in these merchants’ own competing online stores, but  
13 also on other online retail websites, such as Walmart.com and eBay.com. (Cmpl. ¶¶ 3, 114-126,  
14 150, 157-169, 171-173, 175-178, 184.) As alleged, Amazon’s merchants carry out these  
15 agreements by withholding their products from competing online retailers, or supplying them  
16 conditioned on adherence to minimum advertised/resale prices. (*Ibid.*). Because these Amazon  
17 merchants’ DTC online stores also compete in the same market with these other online retailers  
18 like Walmart.com and eBay.com (*id.* ¶ 85), Amazon’s retail and wholesale price parity  
19 agreements therefore also operate as horizontal boycotts—refusals to deal or to deal on the same  
20 terms—with competing online stores that try to discount or lower their own prices. On this  
21 separate basis they are *per se* illegal. (See *Freeman, supra*, 77 Cal.App.4th at p. 196, fn. 26 [*per*  
22 *se* illegal “horizontal boycotts involve entities at the same level combining to deny a competitor at  
23 their level the benefits enjoyed by the members of the group”].) Indeed, the restraints constitute a  
24 classic, *per se* unlawful “direct boycott”—a concerted refusal to deal “aimed at coercing  
25 parties”—namely, other online retail stores—“to adopt noncompetitive practices”—that is, to  
26 limit discounting—with the “purpose [of] coerc[ing] the trade policy of [these other online retail  
27 stores] to secure their removal from competition.” (*Marin County Bd. of Realtors, Inc. v.*  
28 *Palsson* (1976) 16 Cal.3d 920, 932 (*Palsson*).)

1 As the foregoing makes clear, Amazon’s restraints bear no resemblance to the purely  
2 vertical arrangements at issue in the federal cases under the Sherman Act cited by Amazon.<sup>7</sup>  
3 Indeed, in stark contrast to this case, *Lewis* and *AAA Liquors* (which were decided on full  
4 evidentiary records) involved a *single* supplier agreeing to wholesale cost discounts to enable a  
5 *single* dealer to charge lower prices to the dealer’s customers. (See *Lewis, supra*, 714 F.2d at  
6 p. 843; *AAA Liquors, supra*, 705 F.2d at p. 1204.) If anything, these cases actually support the  
7 People, not Amazon. The allegations here establish that Amazon’s agreements prevent Amazon’s  
8 third-party sellers and wholesale suppliers from engaging in the exact type of discounting and  
9 promotions that *AAA Liquors* and *Lewis* concluded made the vastly different agreements at issue  
10 in those cases procompetitive. (See *Lewis*, at pp. 847-848; *AAA Liquors*, at pp. 1206-1207.)  
11 Nothing in these federal cases applying the Sherman Act compels or even suggests that the *per se*  
12 rule does not apply here under California law.<sup>8</sup>

13 ***Not Standard or Presumptively Procompetitive Agreements.*** Amazon’s argument that  
14 certain types of parity clauses and margin guarantees in other settings have not been struck as  
15 *per se* illegal relies on resolution of underlying factual issues not appropriate on demurrer and  
16 directly at odds with those pleaded in the Complaint. (Demurrer at p. 14:23-24.) For example,  
17 nothing in the Complaint, or the Demurrer, establishes that Amazon’s price parity agreements and  
18 MMA’s are equivalent to “most-favored-nation” clauses. To the contrary, as the federal authority  
19 relied on by Amazon sets forth, typical most-favored-nation clauses are purely vertical  
20 arrangements providing that a purchaser of products or services will itself pay no more than the  
21 lowest price charged by the supplier to anyone else. (See Demurrer at pp. 14:22-27, 15:1-2 &  
22 fn. 7, citing *Blue Cross, supra*, 65 F.3d at p. 1415; *Ocean State, supra*, 883 F.2d at p. 1110.) Such

23 <sup>7</sup> See Demurrer at pp.14:23-15:2 & fn. 7, citing *Blue Cross & Blue Shield United v. Marshfield*  
24 *Clinic* (1995) 65 F.3d 1406, 1415 (*Blue Cross*), *Lewis Serv. Ctr. Inc. v. Mack Trucks, Inc.* (8th  
25 *Cir.* 1983) 714 F.2d 842, 844, 848 (*Lewis*), *Ocean State Physicians Health Plan, Inc. v. Blue*  
*Cross & Blue Shield of Rhode Island* (1st *Cir.* 1989) 883 F.2d 1101, 1110 (*Ocean State*), and *AAA*  
*Liquors, Inc. v. Joseph E. Seagrams and Sons, Inc.* (10th *Cir.* 1982) 705 F.2d 1203, 1206-1208  
(*AAA Liquors*).

26 <sup>8</sup> As set forth by the California Supreme Court, “the Cartwright Act was not modeled on federal  
27 antitrust statutes” and federal decisions interpreting federal antitrust law “are not conclusive,  
28 when construing the Cartwright Act.” (*In re Cipro, supra*, 61 Cal.4th at p. 142 [holding even  
where federal cases may be dispositive on federal antitrust issues, such authority “would not  
dictate how the Cartwright Act must be read”].)

1 agreements are materially different from Amazon’s agreements with third-party sellers as pleaded  
2 here, which do not involve the prices Amazon itself pays, but expressly control third-party pricing  
3 off Amazon. (See generally Cmpl. ¶¶ 4-5, 114-126.) Likewise, Amazon’s minimum margin  
4 agreements are not equivalent to such most-favored-nation clauses. Indeed, under Amazon’s  
5 MMA’s, wholesale suppliers are required to make “true-up”/MCP payments to Amazon even  
6 where the wholesale suppliers have already given Amazon their lowest wholesale prices. (See *id.*  
7 ¶¶ 6, 175-178.) In other words, Amazon’s MMA’s are not about wholesale cost control, but rather  
8 retail price control. (See also *Frame-Wilson, supra*, 591 F.Supp.3d at pp. 991-992 [rejecting  
9 Amazon’s reliance on the same federal cases].)

10 Amazon argues the restraints are not eligible for *per se* treatment because the Complaint  
11 supposedly “does not deny, for example, that similar agreements are ubiquitous in the retail  
12 industry and that they are intended to facilitate retailer discounting and increase product  
13 selection.” (Demurrer at p. 15:4-6). But the Complaint does include such allegations. For  
14 example, the Complaint alleges that other major marketplaces do not enforce retail price parity  
15 (Cmpl. ¶ 144) and that “Amazon’s online store competitors generally do not use minimum  
16 margin agreements.” (*Id.* ¶ 203; see also *id.* ¶ 201 [former Amazon executive describes Amazon’s  
17 GMM’s as “crazy,” “basically like writing Amazon a blank check,” and generally “a pretty bad  
18 idea”].) Likewise, not only is Amazon’s assertion regarding the intent of the agreements a factual  
19 argument not appropriate on demurrer, it is directly at odds with the facts alleged in the  
20 Complaint that the intent of these agreements is to “insulate Amazon from price competition,”  
21 “entrenching Amazon’s dominance,” and “preventing effective competition.” (*Id.* ¶ 2; see also *id.*  
22 ¶¶ 112, 175, 205-206.)

23 Amazon’s claim that “no California court has addressed the competitive effects of an  
24 alleged price parity clause, and likewise no court has addressed the competitive effects of GMM’s  
25 or MCP payments (Demurrer at p. 14:17-19) is irrelevant. The labels Amazon has given its  
26 restraints do not alter their fundamental nature as naked horizontal price restraints and boycotts  
27 that have long been condemned as *per se* unlawful. (See *In re Cipro, supra*, 61 Cal.4th at p. 146  
28 [courts have identified “categories of agreements or practices that can be said to always lack

1 redeeming value and thus qualify as per se illegal”]; *Marsh, supra*, 200 Cal.App.4th at p. 494;  
2 *Flagship Theatres, supra*, 55 Cal.App.5th at pp. 399, 402.)

3 **C. Amazon’s Agreements with Third-Party Sellers and Wholesale Suppliers**

4 **Violate the Cartwright Act Even If the *Per Se* Rule Does Not Apply**

5 As detailed above, controlling California Supreme Court precedent compels application of  
6 the *per se* rule based on the facts as pleaded. Nonetheless, even if the *per se* rule did not  
7 ultimately apply, Amazon’s demurrer still fails. First, the California Supreme Court has made  
8 clear that the appropriate analytic approach involves “a continuum, with the circumstances,  
9 details and logic of a particular restraint dictating how the courts that confront the constraint  
10 should analyze it.” (*In re Cipro, supra*, 61 Cal.4th at p. 147.) “In lieu of an undifferentiated one-  
11 size-fits all rule of reason, courts may devise rules for offering proof, or even presumptions where  
12 justified, to make the rule of reason a fair and efficient way to prohibit anticompetitive restraints  
13 and to promote procompetitive ones.” (*Ibid.*) Amazon does not, and cannot at this early stage,  
14 establish that as a matter of law the Court must apply a full-blown rule of reason analysis.  
15 Second, assuming the facts pleaded as true, the People have pleaded a viable Cartwright Act  
16 claim under the quick look, rule of reason, or any other analysis along the “sliding scale”  
17 continuum outlined in *In re Cipro*. (See *ibid.*)

18 **“Quick-Look” or Other Similar Analysis** – Based on Amazon’s market dominance and  
19 the inherently horizontal nature of Amazon’s price restraints, which have the effect of creating an  
20 online price floor, Amazon’s ability to impede the free play of market forces and create  
21 anticompetitive effects for consumers is clear. (See generally Cmpl. ¶¶ 1-3, 7-12, 205-212.) These  
22 facts are sufficient to state a prima facie case under the “quick look” analysis. (See, e.g., *In re*  
23 *Cipro, supra*, 61 Cal.4th at pp. 146-147 [describing the “quick look approach, applicable to cases  
24 where ‘an observer with even a rudimentary understanding of economics could conclude that the  
25 arrangements in question would have an anticompetitive effect on customers and markets,’”  
26 under which “a defendant may be asked to come forward with procompetitive justifications for a  
27 challenged restraint without the plaintiff having to introduce elaborate market analysis first”],  
28 quoting *Cal. Dental Ass’n v. Fed. Trade Comm’n* (1999) 526 U.S. 756, 769-770; see also *Nw.*

1 *Wholesale Stationers, Inc. v. Pac. Stationery & Printing Co.* (1985) 472 U.S. 284, 294-295  
2 [modified *per se* rule applies where dominant dealer coerces suppliers to “deny relationships the  
3 [dealer’s] competitors need in the competitive struggle”].)

4 ***Rule of Reason Analysis*** – Even under a full-blown rule of reason analysis, the Complaint  
5 alleges facts more than sufficient to support a finding of harm to competition. The Complaint  
6 expressly alleges that Amazon’s price parity agreements and MMA’s have caused third-party  
7 sellers and wholesale suppliers to charge higher prices on their own DTC sites and other online  
8 marketplaces than they would in the absence of Amazon’s unlawful restraints. (Cmpl. ¶¶ 7, 12,  
9 140-143, 150, 152-154, 160, 164, 171-173, 184, 191, 199, 202, 206, 208, 210.) Likewise, the  
10 facts pleaded establish that Amazon’s agreements have caused third-party sellers and wholesale  
11 suppliers to impose minimum advertised/resale price conditions on their supply of products to  
12 Amazon’s competitors in order to prevent online retailers from offering lower prices than  
13 available on Amazon. (*Id.* ¶¶ 7, 12, 150, 158, 165-168, 184, 187-194, 202, 206, 208, 210.)  
14 Amazon’s price parity agreements and MMA’s also cause third-party sellers and wholesale  
15 suppliers to withhold product selection from competing online retailers to prevent them from  
16 offering lower prices than available on Amazon. (*Ibid.*; see also *id.* ¶¶ 169, 198.) By insulating  
17 Amazon from free-market price competition, the price parity agreements and MMA’s permit  
18 Amazon to command higher, supra-competitive fees and margins that are passed along to  
19 consumers through higher prices. (*Id.* ¶¶ 11, 45-48, 53-56, 63, 209.) These factual allegations are  
20 supported by extensive direct evidence obtained from Amazon’s own files and executives,  
21 third-party sellers, wholesale suppliers, ecommerce consultants, and other online retailers. (*Id.*  
22 ¶ 12; see also, e.g., *id.* ¶¶ 7, 48, 142-143, 150, 153-154, 158, 160, 164, 166-169, 171-172, 187-  
23 191, 193-194, 198.) The facts pleaded further establish that Amazon’s unlawful price parity  
24 agreements and MMA’s cover the majority of all sales on Amazon, including tens of billions of  
25 dollars annually in California. (See *id.* ¶¶ 7, 23-24, 175, 178-179, 203, 213.)

26 Taken as true, these facts demonstrate harm to competition more than sufficient to  
27 establish violation of the Cartwright Act under the rule of reason analysis, and none of the cases  
28 cited in the demurrer come close to supporting dismissal of a Cartwright Act claim in the face of

1 such extensive, detailed allegations. To the contrary, the facts pleaded here far exceed the types of  
2 allegations deemed sufficient to state a claim for violation of the Cartwright Act. (See, e.g.,  
3 *Quelimane Co. v. Stewart Title Guaranty Co.* (1998) 19 Cal.4th 26, 50-51 [reversing dismissal of  
4 Cartwright Act claim]; *Corwin v. Los Angeles Newspaper Serv. Bureau, Inc.* (1971) 4 Cal.3d 842,  
5 855 [same]; *Cellular Plus*, 14 Cal.App.4th at pp. 1239-1240 [same]; *G.H.I.I.*, *supra*, 147  
6 Cal.App.3d at p. 270 [same]; see also *Redwood Theatres*, *supra*, 200 Cal.App.3d at p. 713  
7 [finding facts sufficient to reverse entry of summary judgment on Cartwright Act claim and  
8 holding the question whether “a restraint of trade is reasonable is a question of fact to be  
9 determined at trial”].)

10 In the face of the People’s extensive and detailed factual allegations, Amazon’s arguments  
11 that the Complaint fails to plead “a market-wide anticompetitive effect” (Demurrer at p. 15:15-  
12 17), and that the impact of the alleged conduct is “*de minimis*” (*id.* at p. 16:5-8), are not well  
13 founded. First, the cases cited by Amazon hold only that allegations demonstrating harm to a  
14 single competitor, absent harm to the competitive process, are insufficient; none require pleading  
15 the quantitative impact of the alleged anticompetitive harm. (See, e.g., *Flagship Theatres*, *supra*,  
16 55 Cal.App.5th at pp. 418-419.) As set forth above, the extensive factual allegations here detail  
17 the considerable harm to competition caused by Amazon’s unlawful agreements.

18 Amazon’s effort to parse the allegations in the Complaint, and cabin off each unlawful  
19 agreement it enters, ignoring their overall effects, also fails. As an initial matter, Amazon does  
20 not, and cannot, point to any decision that applies the Cartwright Act so narrowly in light of its  
21 clear purpose to protect against restraints that harm competition. The decision in *Redwood*  
22 *Theatres*, cited by Amazon to support this argument, held only that each individual distributor’s  
23 *market share* could not be aggregated to calculate their “collective *market power*.” (*Redwood*  
24 *Theatres*, *supra*, 200 Cal.App.3d at pp. 704-705, emphasis added.) Indeed, the *Redwood Theatres*  
25 court went on to discuss the potential anticompetitive evils of the multiple individual “exclusive  
26 dealing agreements” at issue in that case in the aggregate, suggesting if anything that aggregation  
27 here is similarly appropriate. (See *id.* at pp. 707-708.) While Amazon also cites to the split  
28 decision in *Dickson v. Microsoft Corp.* (4th Cir. 2002) 309 F.3d 193, 210 to support this

1 argument, not only is *Dickson* a distinguishable federal decision applying the Sherman Act, but  
2 the federal courts have long held that it is necessary and appropriate to aggregate the types of  
3 agreements alleged here to evaluate their overall impact—exactly opposite of the contention for  
4 which Amazon cites *Dickson*. (See, e.g., *Toys “R” Us, Inc. v. FTC* (7th Cir. 2000) 221 F.3d 928,  
5 930, 936-937 [affirming finding that, in the alternative even absent any horizontal agreement,  
6 dominant toy retailer’s “network of vertical agreements” with toy manufacturers considered in the  
7 aggregate were anticompetitive].)<sup>9</sup>

8 In making its market impact argument, Amazon focuses only on GMM’s, MCP’s, and the  
9 pre-March 2019 BSA (see Demurrer at p. 15:15-17), but ignores the factual allegations that  
10 Amazon’s express and de facto agreements with third-party sellers continue to prohibit  
11 third-party sellers from offering lower prices off Amazon (Cmpl. ¶¶ 5-6, 115-145, 155), and the  
12 fact that these third-party seller agreements cover the majority of all sales on Amazon. (See *id.*  
13 ¶¶ 23-24). Likewise, while Amazon attempts to redirect the Court’s attention to the meaningless  
14 calculation of the total size of “true-up”/MCP payments under the alleged MMA’s divided by the  
15 volume of covered sales, the facts alleged establish that these agreements cover billions of dollars  
16 of sales on Amazon alone (*id.* ¶¶ 175, 179), and have broad anticompetitive impacts, including  
17 higher consumer prices on and off Amazon and reduced product selection from Amazon’s  
18 competitors. (*Id.* ¶¶ 184, 187-194, 197-198, 202-203, 208.)<sup>10</sup>

19  
20 <sup>9</sup> See also *Standard Oil Co. v. United States* (1949) 337 U.S. 293, 313 [considering the  
21 aggregate effect of 5,939 separate vertical agreements to determine that a prohibited effect on  
22 competition had occurred, even though no individual vertical agreement was alleged to have had  
23 an anticompetitive effect]; *United States v. Microsoft Corp.* (D.C. Cir. 2011) 253 F.3d 34, 70-71  
24 [aggregating the effects of the defendant’s many separate vertical agreements to conclude  
25 plaintiff had shown substantial “harm to competition”]; *Twin City Sportservice, Inc. v. Charles O.*  
26 *Finley & Co.* (9th Cir. 1982) 676 F.2d 1291, 1302 [the court “may look to the overall effects of a  
27 defendant’s conduct in the relevant market,” not just “the market implications of the one  
28 contract”]; *Orchard Supply Hardware LLC v. Home Depot USA* (N.D. Cal. 2013) 967 F. Supp.  
2d 1347, 1360-1363 [following *Twin City* to holding that “aggregating the effect” of separate  
vertical agreements “is appropriate for the purpose of showing [defendant’s] conduct was  
anticompetitive”]. By contrast *Dickson* analyzed the two agreements at issue there separately  
because plaintiff affirmatively pursued claims based on two “separate vertical conspiracies.”  
(*Dickson, supra*, 309 F.3d at pp. 204, 211); see *Sitts v. Dairy Farmers of America, Inc.* (D. Vt.  
2019) 417 F.Supp.3d 433, 467-468 & n.17 [distinguishing *Dickson* on these same grounds].

<sup>10</sup> Amazon’s meaningless calculation also ignores that the effects of the MMA’s would remain  
even if every wholesale supplier complied fully and thereby never made any “true-up” payment.  
At best, Amazon’s argument raises a factual question that cannot be resolved on demurrer.

1           Given that the Cartwright Act rests “on the premise that the unrestrained interaction of  
2 competitive forces will yield the best allocation of our economic resources, the lowest prices, the  
3 highest quality and the greatest material progress,” the facts pleaded here are more than sufficient  
4 to establish anticompetitive harm under the Cartwright Act. (*Palsson, supra*, 16 Cal.3d at p. 935  
5 [reversing lower court decision after non-jury trial, finding Cartwright Act violation under the  
6 rule of reason, and remanding for determination of damages]; see also *People v. Nat’l Ass’n of*  
7 *Realtors* (1981) 120 Cal.App.3d 459, 478 [same].) In sum, Amazon’s assertion that the  
8 Complaint plainly alleges the conduct at issue impacts “only a miniscule fraction of sales in the  
9 alleged market” (Demurrer at p. 16:17-18) is completely at odds with any fair reading of the  
10 Complaint and the detailed factual allegations regarding the anticompetitive harm caused by  
11 Amazon’s conduct. For these reasons, the Complaint pleads sufficient facts to state a viable  
12 Cartwright Act claim anywhere along the *In re Cipro* sliding scale continuum from *per se* to rule  
13 of reason. Accordingly, the demurrer to the Cartwright claim should be overruled.

14 **IV. THE COMPLAINT ALLEGES A VIABLE CLAIM UNDER CALIFORNIA’S**  
15 **UNFAIR COMPETITION LAW**

16           The UCL has three distinct prongs, broadly prohibiting conduct that is “unlawful,”  
17 “unfair,” or “fraudulent.” (Bus. & Prof. Code § 17200 [“unfair competition shall mean and  
18 include any *unlawful, unfair or fraudulent* business act or practice”], emphasis added); see also  
19 *In re Tobacco II Cases* (2009) 46 Cal. 4th 298, 311 [under the UCL “there are three varieties of  
20 unfair competition: practices which are unlawful, unfair or fraudulent”].) The unlawful prong’s  
21 “coverage is ‘sweeping, embracing anything that can properly be called a business practice and  
22 that at the same time is forbidden by law.’” (*Cel-Tech, supra*, 20 Cal.4th at p. 180, quoting *Rubin*  
23 *v. Green* (1993) 4 Cal.4th 1187, 1200.) Likewise, the “unfair” prong has been interpreted to be  
24 “intentionally broad, thus allowing courts maximum discretion to prohibit new schemes to  
25 defraud.” (*State Farm Fire & Cas. Co. v. Superior Court* (1996) 45 Cal. App. 4th 1093, 1103.)  
26 As articulated by the California Supreme Court in *Cel-Tech*, the “‘Legislature...intended by this  
27 sweeping language to permit tribunals to enjoin on-going wrongful business conduct in whatever  
28 context such activity might occur.’” (*Cel-Tech*, at p. 181, quoting *Am. Philatelic Soc. v.*

1 *Claibourne* (1935) 3 Cal.2d 689, 698 (*Claibourne*.) Indeed, the UCL “was intentionally framed  
2 in its broad, sweeping language, precisely to enable judicial tribunals to deal with the  
3 innumerable ‘new schemes which the fertility of man’s invention would contrive.’” (*Ibid.*)

4 **A. The Complaint Alleges a Valid “Unlawful” Prong Claim**

5 The Complaint asserts a violation of the California UCL under both the “unlawful” and  
6 “unfair” prongs. As detailed above, the People have pleaded facts sufficient to state a claim for  
7 violation of the Cartwright Act. This is sufficient to establish a claim under the “unlawful” prong.  
8 (See *Zhang v. Superior Court* (2013) 57 Cal.4th 364, 370 (*Zhang*) [“By proscribing any  
9 ‘unlawful’ business act or practice, the UCL ‘borrows’ rules set out in other laws and makes  
10 violations of those rules independently actionable”], quoting *Cel-Tech, supra*, 20 Cal.4th at  
11 p. 180.) For this reason alone, Amazon’s demurrer to the UCL claim should be overruled, and the  
12 Court need not consider the separate arguments made under the UCL “unfair” prong.

13 **B. The Complaint Alleges a Valid “Unfair” Prong Claim**

14 Even in the absence of the Cartwright Act claim, the People have pleaded a viable UCL  
15 claim under the “unfair” prong. The UCL’s statutory language “makes clear that a practice may  
16 be deemed unfair even if not specifically proscribed by some other law.” (*Cel-Tech*, 20 Cal.4th at  
17 p. 180; see also *Zhang, supra*, 57 Cal.4th at p. 370 [“a practice may violate the UCL even if it is  
18 not prohibited by another statute”].) “Whether a practice is...unfair is generally a question of fact  
19 which requires consideration and weighing of evidence from both sides’ and which usually  
20 cannot be made on demurrer.” (*Klein v. Chevron U.S.A., Inc.* (2012) 202 Cal.App.4th 1342, 1376  
21 (*Klein*.) At the pleading stage, a court “cannot presume that [the] alleged harms are not  
22 ‘substantial’ or are otherwise outweighed by benefits that consumers derive.” (*Ibid.*, citing  
23 *Camacho v. Automobile Club of Southern California* (2006) 142 Cal.App.4th 1394, 1403  
24 (*Camacho*); accord *McKell v. Washington Mutual, Inc.* (2006) 142 Cal.App.4th 1457, 1473  
25 [“[T]he determination [as to] whether [a business practice] is unfair is one of fact which requires  
26 a review of the evidence from both parties. [citation] It thus cannot usually be made on  
27 demurrer.”], citing *Schnall v. Hertz Corp.* (2000) 78 Cal.App.4th 1144, 1166.)

1 As summarized above, (see *supra*, Section II), the People have pleaded facts regarding  
2 Amazon’s retail and wholesale price parity agreements, Amazon’s efforts to coerce compliance  
3 with and enforce price parity, and the considerable harms caused by Amazon’s conduct. (See  
4 generally, e.g., Cmpl. ¶¶ 2-12, 114-125, 127-130, 135, 140-150, 175-182, 205-212.) Amazon  
5 argues that its price parity agreements are similar to most-favored-nation agreements, and asserts  
6 that minimum margin agreements are common. However, these arguments are contrary to the  
7 facts alleged and raise factual issues that cannot be resolved on demurrer. Indeed, the Complaint  
8 alleges that Amazon uses price parity and MMA’s to control prices. (See, e.g., *id.* ¶ 2 [“The intent  
9 and effect of these agreements is to insulate Amazon from price competition], ¶ 82 [“other  
10 competitors generally cannot draw customers away from Amazon with lower prices, because  
11 Amazon *compels* suppliers and sellers to cause prices on those competing websites to be the same  
12 or higher than the prices for the same products on Amazon”], ¶ 113 [“A key tactic Amazon  
13 employs to insulate its online store from competition and perpetuate its ability to charge  
14 supra-competitive prices is coercing third-party sellers to enter into anticompetitive price parity  
15 agreements.”], ¶ 200 [“Amazon demands minimum margin agreements and MCP funding as a  
16 penalty for facilitating lower prices at Amazon’s competitors.”].) In the face of these allegations,  
17 under any of the three tests applied to evaluate “unfair” prong claims, Amazon cannot establish  
18 that the People’s UCL claim fails as a matter of law.

19 **1. The People’s “Unfair” Prong Claim Is Not Dependent on Violation of**  
20 **the Cartwright Act**

21 Amazon generally argues that because the Cartwright Act claim fails, any UCL claim based  
22 on the same facts must also fail. (Demurrer at p. 20:8-12; see also *id.* at pp. 2:10-12, 18:18-19.)  
23 But this argument improperly collapses the distinct “unlawful” and “unfair” prongs of the UCL  
24 into one another, directly contravening the California Supreme Court’s controlling decision in  
25 *Cel-Tech* that an “unfair” prong claim is not prohibited “merely because some other statute on the  
26 subject does not, itself, provide for the action or prohibit the challenged conduct.” (*Cel-Tech*,  
27 *supra*, 20 Cal.4th at pp. 182-183.) To the contrary, “acts may, if otherwise unfair, be challenged  
28

1 under the unfair competition law even if the Legislature failed to proscribe them in some other  
2 provision.” (*Id.* at p. 183.)

3 In *Cel-Tech* itself, the California Supreme Court found that the “unfair” prong claim could  
4 proceed even after the trial court found, and the appellate court affirmed, that the plaintiff had  
5 failed to prove its Cartwright Act claim at trial. (*Cel-Tech, supra*, 20 Cal.4th at pp. 170, 191  
6 [affirming reversal of non-jury trial decision that “unfair” prong claim necessarily failed with  
7 Cartwright Act and Unfair Practices Act claims].) In fact, as detailed in the appellate court  
8 decision, the Cartwright Act claim in *Cel-Tech* was rejected on exactly the same grounds that  
9 Amazon now urges the Court to dismiss the People’s Cartwright Act claim: the absence of an  
10 agreement. (See *Cel-Tech Communications, Inc. v. Los Angeles Cellular Tel. Co.* (1997) 69  
11 Cal.Rptr.2d 207, 214 [“On the second cause of action, alleging agreements between L.A. Cellular  
12 and its exclusive agents, constituting a combination in restraint of trade in violation of section  
13 16720, there was no evidence of any conspiracy or coercive activity by L.A. Cellular.”]. But,  
14 again, even absent a combination or agreement sufficient to establish a violation of the Cartwright  
15 Act, the California Supreme Court still permitted the “unfair” prong claim to proceed. (*Cel-Tech*  
16 at pp. 170, 191.) The recent decision in *Epic Games, Inc. v. Apple Inc.* (N.D. Cal. 2022) 559  
17 F.Supp.3d 898, cited by Amazon, recognizes that under *Cel-Tech* an “unfair” prong claim may  
18 proceed even if the conduct at issue does not give rise to violation of the Cartwright Act. (*Id.* at  
19 pp. 1051, 1053-1054.) While Amazon attempts to characterize the *Epic Games* decision as an  
20 aberration, it is not only consistent with, but compelled by, the California Supreme Court’s  
21 holding in *Cel-Tech*. Moreover, multiple other decisions have allowed such UCL claims to  
22 proceed even in the absence of a separate antitrust violation. (See *Sun Microsystems, Inc. v.*  
23 *Microsoft Corp.* (N.D. Cal. 2000) 87 F.Supp.2d 992, 1000 [granting injunction under “unfair”  
24 prong even absent any antitrust violation]; *Korea Kumho Petrochemical v. Flexsys America*  
25 *LP* (N.D. Cal., Mar. 11, 2008, No. C07-01057 MJJ) 2008 WL 686834 at \*9 [dismissing  
26 Cartwright Act claim but allowing “unfair” prong claim to proceed].)

27 The cases Amazon relies on to argue that an “unfair” prong claim cannot proceed where a  
28 Cartwright Act claim falls short cannot save its argument. *RLH Industries, Inc. v. SBC*

1 *Communications, Inc.* (2005) 133 Cal.App.4th 1277, 1286 affirmatively acknowledges that “some  
2 unfair competition causes of action can survive independently of an actual antitrust violation....”  
3 In *SC Manufactured Homes, Inc. v. Liebert* (2008) 162 Cal.App.4th 68, 92 the court held that the  
4 plaintiff gave “only passing reference to” his UCL cause of action, thereby waiving that claim.  
5 The cursory discussion cited by Amazon that follows is dicta, quoting *Chavez* out of context. (*Id.*  
6 at 93.) The *Chavez* court explicitly rejected the argument that “unlawful” and “unfair” were  
7 coextensive: “We do not hold that in all circumstances an ‘unfair’ business act or practice must  
8 violate an antitrust law to be actionable under the unfair competition law.” (*Chavez, supra*, 93  
9 Cal.App.4th at p. 375.) Finally, as detailed above, to the extent these cases could be read as  
10 suggested by Amazon, they run afoul of the California Supreme Court’s decision in *Cel-Tech*.

## 11 **2. The Facts Alleged Establish an “Unfair” Prong Claim under Any of the** 12 **Three Tests Recognized by the California Supreme Court**

13 There are three tests commonly used to determine whether conduct violates the UCL  
14 under the “unfair” prong. In cases between competitors, the California Supreme Court’s decision  
15 in *Cel-Tech* mandates what is known as the *Cel-Tech* tethering test. (*Cel-Tech*, 20 Cal.4th at  
16 pp. 186-187.) But the California Supreme Court has declined to require application of this test to  
17 claims beyond those brought between competitors. Instead, the Supreme Court has recognized a  
18 split of authority regarding the proper standard for evaluating “unfair” prong claims in other  
19 situations, with appellate courts applying three different tests: the balancing test, the *Cel-Tech*  
20 tethering test, and the Federal Trade Commission Act (“FTC Act”) test. (*Nationwide Biweekly*  
21 *Admin., Inc. v. Superior Court* (2020) 9 Cal.5th 279, 303 & fn. 10; see also *Zhang, supra*, 57  
22 Cal.4th at p. 380, fn. 9 [collecting cases].)

23 Amazon argues that this Court must apply the *Cel-Tech* tethering test, ignoring the other  
24 two entirely. As support for this position, Amazon asserts that the “First District has consistently  
25 applied the *Cel-Tech* ‘tethering test’ to *all* actions under the ‘unfair prong’....” (Demurrer at  
26 pp. 18:28-19:1, emphasis in original.) But unlike the federal appellate courts, “the decisions of  
27 every division of the District Court of Appeal are binding on all superior courts of this state.”  
28 *Cuccia v. Superior Court* (2007) 153 Cal.App.4th 347, 353, citing *Auto Equity Sales, Inc. v.*

1 *Superior Court of Santa Clara County* (1962) 57 Cal.2d 450, 455.) Thus, Amazon cannot ignore  
2 decisions applying the balancing or FTC Act tests simply because they originate from other  
3 appellate districts. Likewise, while Amazon quotes certain language from *Cel-Tech* criticizing  
4 earlier appellate definitions of “unfair” as amorphous, the California Supreme Court neither  
5 expressly considered nor rejected use of the balancing test in other situations. (*Cel-Tech, supra*,  
6 20 Cal.4<sup>th</sup> at pp. 184-185.) And the Court expressly turned to Section 5 of the FTC Act for  
7 guidance. (*Id.* at p. 185-186; see also *Nationwide Biweekly Admin., Inc. v. Superior Court, supra*,  
8 9 Cal.5<sup>th</sup> at pp. 303-304 & fn. 10.) Because the facts alleged are sufficient to find that Amazon’s  
9 conduct is “unfair” under any of the three tests articulated by the appellate courts, the Court need  
10 not decide which test should apply to overrule Amazon’s demurrer.

11 **a. Amazon’s Alleged Conduct Is “Unfair” under the Balancing Test**

12 The balancing test requires the Court to determine whether a business practice is unfair by  
13 examination of the impact of the practice or act on its victim balanced against the reasons,  
14 justifications, and motives of the alleged wrongdoer. “In brief, the court must weigh the utility of  
15 defendant’s conduct against the gravity of the harm to the alleged victim.” (*Progressive W. Ins.*  
16 *Co. v. Superior Court*, (2005) 135 Cal.App.4th 263, 285.) The balancing test continues to be  
17 applied in consumer cases. (See, e.g., *id.* at p. 286.) The People are prosecuting this action to  
18 rectify the direct harm to competition caused by Amazon’s conduct, including higher consumer  
19 prices. Accordingly, Amazon’s demurrer fails to establish that the balancing test is not  
20 appropriate as a matter of law.

21 The People satisfy the balancing test through the detailed facts alleged in the Complaint.  
22 These facts include allegations that Amazon imposes retail and wholesale price parity on its  
23 merchants, and this conduct results in higher consumer prices on and off Amazon, limits the  
24 availability of products off Amazon, and insulates Amazon from competition, allowing it to  
25 command higher fees and margins. (See e.g., Cmpl. ¶¶ 74-79, 117-120, 150-173.) Amazon’s  
26 attempt to suggest its conduct has procompetitive benefits improperly introduces factual issues  
27 that cannot be evaluated without ““consideration and weighing of evidence from both sides’ and  
28 which usually cannot be made on demurrer.” (*Brady v. Bayer Corp.* (2018) 26 Cal.App.5th 1156,

1 1164, quoting *Linear Technology Corp. v. Applied Materials, Inc.* (2007) 152 Cal.App.4th 115,  
2 134-135.) Further, even the claimed procompetitive benefits are a mirage. Nothing Amazon  
3 argues demonstrates that its conduct actually results in lower prices for consumers, only that  
4 consumers will not see lower prices elsewhere. (Cmpl. ¶¶ 1-2.) Thus, even Amazon’s  
5 inappropriate efforts to introduce factual arguments only reinforce that any claimed “benefits”  
6 accrue to Amazon and its profits at the expense of free-market price competition and consumers.

7 **b. Amazon’s Alleged Conduct Is “Unfair” under the**  
8 ***Cel-Tech* Tethering Test**

9 Under the *Cel-Tech* tethering test, “unfair” means “conduct that [1] threatens an incipient  
10 violation of an antitrust law or [2] violates the policy or spirit of one of those laws because its  
11 effects are comparable to or the same as a violation of the law, or [3] otherwise significantly  
12 threatens or harms competition.” (*Cel-Tech, supra*, 20 Cal.4th at p. 187; see also Demurrer at  
13 pp. 19:20-20:1, citing *Cel-Tech* at p. 187.) California’s antitrust laws are designed to ensure “the  
14 preservation of fair business competition” (*id.* at p. 180), and to prevent “injury to competition.”  
15 (*Id.* at p. 186.) In other words, the policy and spirit underlying the antitrust laws are “to foster and  
16 encourage competition” by prohibiting “practices by which fair and honest competition is  
17 destroyed or prevented.” (*Ibid.*) Further, under *Cel-Tech*, conduct that significantly harms  
18 competition, or even just threatens such harm, gives rise to a UCL violation under the “unfair”  
19 prong. (*Id.* at 187.)

20 Here, the facts pleaded establish violation of the policy and spirit of California’s antitrust  
21 laws as well as significant harm to competition. The Complaint includes extensive, detailed  
22 factual allegations establishing harm to competition and Amazon’s affirmative efforts to interfere  
23 in fair and honest price competition. More specifically, the facts alleged establish that Amazon’s  
24 conduct has led to higher consumer prices on and off Amazon, limits on availability of products  
25 off Amazon, and interference with the ability of Amazon’s competitors to effectively compete on  
26 price. (See e.g., Cmpl. ¶¶ 74-79, 117-120, 150-173; see also generally Section II, *supra*, [Harm to  
27 competition].) As alleged in the Complaint, Amazon enforces price parity through an expansive  
28 pricing surveillance program, which relies on proprietary, automated tools and hundreds of

1 employees to conduct real-time price monitoring across the internet, and automatically punishes  
2 merchants who fail to comply. (Cmpl. ¶¶ 32-34, 180-182.) The speed and magnitude with which  
3 Amazon operates these tools, and the immediacy of consequences third-party sellers and  
4 wholesale suppliers face if they fail to comply with Amazon’s directives, are unprecedented. (See  
5 *id.* ¶¶ 32-34, 135-138, 148, 154.) In sum, the facts alleged establish that Amazon’s conduct has  
6 caused exactly the type of harm to competition, including interference with fair and honest price  
7 competition, that the antitrust laws were designed to prevent. (See *Cel-Tech, supra*, 20 Cal.4th at  
8 p. 180-181, 186-187.)

9 In *Cel-Tech*, the failure to satisfy the formalities of a Cartwright Act claim was not fatal to  
10 the plaintiff’s “unfair” prong claim because the alleged conduct was nonetheless sufficient to  
11 establish a violation of the policy and spirit of the antitrust laws or otherwise harm competition.  
12 (See generally Section IV.B.1, *supra*.) Likewise, the facts pleaded here are more than sufficient to  
13 establish violation of the policy and spirit underlying the Cartwright Act and harm to competition.  
14 Accordingly, Amazon cannot establish that the People’s “unfair” prong claim fails the *Cel-Tech*  
15 tethering test as a matter of law.

16 **c. Amazon’s Alleged Conduct is “Unfair” under the FTC Act Test**

17 A handful of California appellate courts have applied a test based on evaluation of  
18 allegedly unfair conduct under Section 5 of the FTC Act, 15 U.S.C. § 45(n)—which prohibits  
19 unfair methods of competition—when interpreting the UCL. As articulated in these cases, under  
20 this analysis, “a business practice is ‘unfair’ if (1) the consumer injury is substantial; (2) the  
21 injury is not outweighed by any countervailing benefits to consumers or competition; and (3) the  
22 injury could not reasonably have been avoided by the consumers themselves.” (*Klein, supra*, 202  
23 Cal.App.4th at p. 1376, citing *Camacho, supra*, 142 Cal.App.4th at p. 1403.) The People’s  
24 allegations of harm to consumers through higher prices on and off Amazon, and limited product  
25 selection on Amazon competitors, satisfy the first prong of the FTC test. Second, as set forth in  
26 the Complaint, the only benefit of Amazon’s agreements is to Amazon, providing it the ability to  
27 maintain high fees and margins without being subject to price competition from competing  
28 websites. There is no clear benefit to consumers or competition from these policies, which

1 artificially stabilize high prices across the internet, and limit the selection of products available to  
2 consumers. Third, because Amazon’s conduct causes higher prices on and off Amazon,  
3 consumers cannot avoid the harm simply by choosing to shop on websites other than Amazon.  
4 The Complaint withstands scrutiny under this test as well.

5 **V. CONCLUSION**

6 For the foregoing reasons, the Court should overrule Amazon’s demurrer.

7 Dated: January 27, 2023
