

UNITED STATES OF AMERICA

Federal Trade Commission WASHINGTON, D.C. 20580

Statement of Chair Lina M. Khan and Commissioner Alvaro M. Bedoya In the Matter of Non-Alcoholic Beverages Price Discrimination Investigation Commission File No. 2210158

January 17, 2025

Congress passed the Robinson-Patman Act to provide a level playing field to all businesses, large and small. While the first part of the Act bans suppliers from discriminating in price among buyers, the Act also prevents suppliers from providing special payments or services to its favored customers. Last month, the Commission issued its first price discrimination complaint in decades. Today, the Commission resurrects two more provisions of the Act, faithfully enforcing the law that helps level the playing field for all retailers.

The focus of the Commission's	complaint today is on the	e disproportiona	te promotional
allowances and services that Pepsi prov	vides a large, big-box reta	niler, to	help
maintain a retail	. The alleged facts uncovered in staff's investigation		
establish a clear reason to believe that I	Pepsi has violated Section	as 2(d) and (e) o	f the Act by
giving disproportionate, special	and	to	The alleged
facts also establish reason to believe the	at Pepsi's conduct is harr	ning competition	n and driving up
prices. This action to enjoin Pepsi's con	ntinuing violations of the	law is thus in th	e public
interest,3 and it is our duty, pursuant to	our oaths to protect fair	competition in th	ne economy, to
do so.			
The complaint alleges that in or	der to appease its	2	—Pepsi

⁸ See Talmon Joseph Smith & Joe Rennison, Companies Push Prices Higher, Protecting Profits but Adding to Inflation, N.Y. Times (May 30, 2023) ("Companies are not just maintaining margins, not just passing on cost increases, they have used it as a cover to expand margins' PepsiCo has become a prime example of how large corporations have countered increased costs, and then some. ... The bags of Doritos, cartons of Tropicana orange juice and bottles of Gatorade sold by PepsiCo are now substantially pricier. Customers have grumbled, but they have largely kept buying. Shareholders have cheered."); Andy Larsen, How Much of Price Inflation Is Due to Corporate Greed, The Salt Lake Tribune (Dec. 16, 2023) ("[W]hat multiple researchers have consistently found is that those high-leverage companies consistently increased their prices more than their lower-power competitors during the inflationary period from 2021 to 2022. Kraft Heinz, Tyson Farms, General Mills, and PepsiCo are four examples you'll have heard of who were found to have done this."); Dee-Ann Durbin, PepsiCo's Second Quarter Profits Jump but Customers Slow Their Purchases After Years of Price Hikes, Associated Press (July 11, 2024) ("PepsiCo reported higher-than-expected earnings in the second quarter ... after raising prices every quarter for more than two years.... PepsiCo ... has leaned heavily into price increases over the past two years as its costs for ingredients and packaging rose. The fourth quarter of 2023 was the company's eighth straight quarter of double-digit percentage price increases and it hiked prices 5% to start the year, and another 5% in the just-completed quarter."); Steven Hill, Grocery Prices Keep Rising Because Too Few Companies Dominate the Market, Pittsburgh Post-Gazette (July 22, 2024) ("In 2021, during the middle of the pandemic, Pepsi raised its prices, blaming it on alleged higher costs. Yet somehow it still raked in \$11 billion in profits. Then in 2023, even though the pandemic was over and inflation was dropping, Pepsi still hiked its prices by double digits for the seventh consecutive quarter. Its profits soared another 14%."); Julie Creswell, PepsiCo Says Revenues Jumped After It Raised Prices, N.Y. Times (Apr. 26, 2022) ("Thanks to double-digit percent increases for the prices of many of its popular snack and beverage products, PepsiCo saw a big jump in revenues in the quarter. Overall, PepsiCo said on Tuesday, revenues rose 9.3 percent to \$16.2 billion in the first quarter. But the bulk of that growth was fueled by price increases in the three months."); Isabella M. Weber & Evan Wasner, Sellers' Inflation, Profits and Conflict: Why Can Large Firms Hike Prices in an Emergency?, Review of Keynesian Economics, Vol. 11, Issue 2 (Summer 2023) at 192 ("The Chief Executive Officer of Pepsi, Ramon Laguarta, for example, ... commented on the company's approach to price increases: 'So we do that in full coordination with our partners [i.e. retail businesses], trying to make sure that we keep the consumer with us, we keep the shopper coming to the stores."") (alteration in original); id. at 183, 190 (arguing that "the US COVID-19 inflation [wa]s predominantly a sellers' inflation that derive[d] from microeconomic origins, namely the ability of firms with market power to hike prices," and noting as an example, "when asked about 'historically high price' by one of the analysts, PepsiCo Chief Financial Officer Hugh Johnston replied that 'the environment is well set up for pricing to be positive going forward' despite these high levels thanks to 'the right way to compete, which is primarily around innovation and brand building and execution' CEO Laguarta added 'obviously with the set of inflation trends that we've seen in some of the commodities and so on, there's probably going to be very little incentive for anybody to break what is a very rational environment that we see today' -- where rational environment refers to firms increasing prices in response to cost increases...").

violation of Sections 2(d) and (e) of the Robinson-Patman Act.²⁴ Disproportionate promotional allowances and services in violation of Sections 2(d) and (e) are per se illegal.²⁵

When confronted with the facts set fort	th in the complaint, Pepsi insisted that the
discounts it advances to	can only be
analyzed under Section 2(a) (which is not gove	erned by the per se rule), because Pepsi funds these
promotional events through	In
contrast, when Pepsi funds promotional events	s (e.g., "\$3 for 12" deals) at
competitors, it generally does so through	
²⁶ Com	missioners Ferguson and Holyoak, who have
voted to allow this conduct to continue, will lil	kely seize on Pepsi's argument, accusing the
majority Commissioners of trying to "get arou	nd" the more burdensome requirements of Section
2(a) by analyzing Pepsi's	under Section 2(d).
But the courts have rejected the conten	tion that
	zed under Section 2(a) as price adjustments and
	ices. Instead, as the Supreme Court explained in
AND AND ASSESSMENT OF THE PROPERTY OF THE PROP	isaction may not violate one section of the Act
does not answer the question whether another	
does not answer the question whether another	section has occir violated.

For example, in *American News*, the FTC found that Union News Company, the nation's largest retail newsstand operator, violated Section 5 of the FTC Act by "induc[ing] and receiv[ing] substantial special payments from publishers" that violated Robinson-Patman Act Section 2(d). ²⁸ Union "demand[ed]" and was given "what were generally called 'display promotional allowances' or 'promotional allowance rebates'" from publishers. ²⁹ One publisher gave Union "a 10 per cent sales rebate on the retail price of the magazine"—much akin to the that Pepsi gives

The Second Circuit affirmed the Commission's finding that Union had unlawfully induced payments that violated Section 2(d). The court rejected Union's argument (similar to Pepsi's here) that "the payments made by the publishers did not contravene § 2(d), because ... the allowances paid were price adjustments, not true promotional allowances." This contention "lack[ed] any merit" because, just like in the case of and Pepsi, "special display rights were indeed often given to publishers who [like Pepsi] paid the promotional allowances," and, like Pepsi, "[t]he publishers who acquiesced in [Union's] demands for promotional rebates expressed the hope that they would get better display service as a result" and Union "frequently

referred to these payments as 'promotional allowances.'"³² In any event, the court held, "even if these payments were all no more than disguised price adjustments, as petitioners contend, they would nevertheless violate § 2(d)" because "Section 2(d) was aimed explicitly at promotional allowances which have the effect of price adjustments."³³

Moreover, far from requiring the exclusive application of Section 2(a), the special manner in which Pepsi pays its promotional allowances to a distinguished from the a methods it uses for sometimes, compels us to analyze them under Section 2(d). This kind of deliberate obfuscation of the true net prices paid by each retail customer is precisely what Congress sought to eradicate with per se liability for Section 2(d) violations: under the statutory scheme, "sellers would be forced to confine their discriminatory practices to price differentials, where they could be more readily detected and where it would be much easier to make accurate comparisons with any alleged cost savings." If Pepsi had "confine[d] [its] discriminatory practices to price differentials," it would then be straightforward for Pepsi to ensure that at reasonably contemporaneous points in time, no retail customer receives an unfair price advantage. But Pepsi has affirmatively obscured

Congress decided that in the face of such gamesmanship, the onus should not be on law enforcement to wade through price, discount, and payment amounts housed in separate databases accounted for in different ways and paid at differing times to divine whether or not a price discrimination occurred and whether, as a result, competition was harmed. Congress instead put the onus on businesses to stop disguised price discriminations in the form of promotional allowances, by making such payments per se illegal.

The investigatory record is replete with evidence that Pepsi has engaged in indirect price discrimination in violation of Sections 2(d) and (e) to the disadvantage of competitors. For example, the complaint notes that Pepsi and

Congress uncovered similar behavior in the retail marketplace in 1935, when "[a] lengthy investigation conducted in the 1930's by the Federal Trade Commission disclosed that several large chain buyers were effectively avoiding [Section] 2 by taking advantage of gaps in its coverage. Because of their enormous purchasing power, these chains were able to exact ... competitive advantages," including "[a]dvertising allowances' [that] were paid by the sellers to the large buyers in return for certain promotional services undertaken by the latter. ... Lacking the purchasing power to demand comparable advantages, the small independent stores were at a hopeless competitive disadvantage." The same is true today of the ever-shrinking cadre of regional chain stores—supermarkets like Stater Bros., Meijer, Piggly Wiggly, Woodman's, and Raley's that today provide at least some semblance of competitive diversity in the markets in which they operate. Under its personnel of the provide at least some semblance of competitive diversity in the markets in the competitors at a "hopeless competitive disadvantage" by taking steps every day to

Grocery stores have claimed that they must merge to position themselves to extract the same illegal concessions that commands. But a greater capacity to violate the Robinson-Patman Act has never been and never will be a cognizable defense to a merger that threatens to substantially lessen competition. In other words, the answer to one power buyer extracting unlawful price advantages from suppliers is not to create another power buyer that can do the same thing. The answer is to enforce the antitrust laws, including the Robinson-Patman Act.

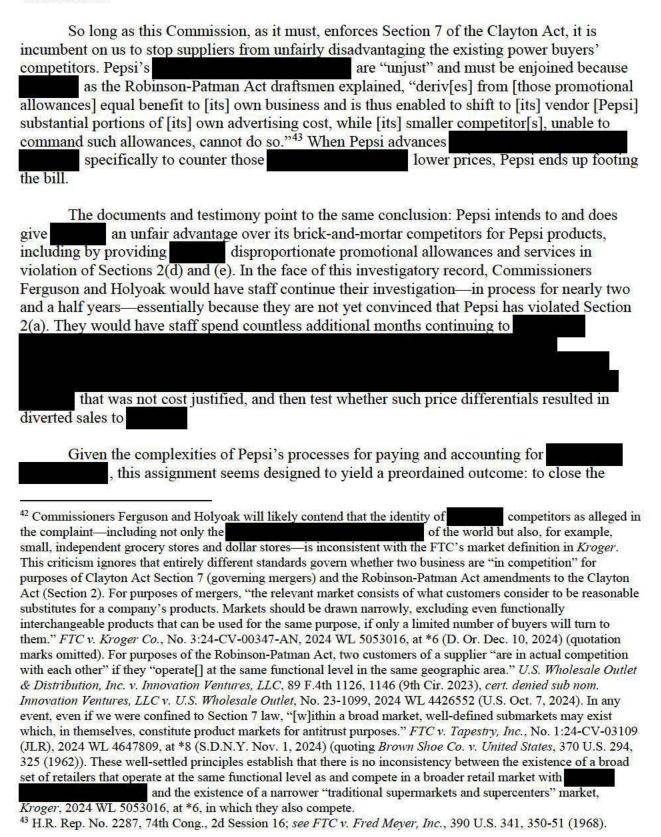

When antitrust enforcers fail to enforce this valid law based on second-guessing of Congress's wisdom in passing it and speculation that it will lead to higher prices (speculation that this case should put to bed), we may inadvertently encourage competition-reducing mergers—mergers leading to higher prices, lower quality, and reduced wages. By enforcing the

Robinson-Patman Act as Congress intended, we eliminate a major impetus for corporate consolidation. 42

investigation. We will not stand by to this course of inaction. At this highly advanced stage of the investigation, with the survival of competing businesses hanging in the balance, and with the relentless price increases American consumers have had to endure year over year due in part to Pepsi and conduct, directing staff to continue to spin their wheels in terabytes of Pepsi data looking for further confirmation of the patently illegal scheme alleged in the complaint would be an abdication of our duty.

For these reasons, today we cast our vote in the affirmative to issue a complaint against Pepsi for violations of the Robinson-Patman Act.
